Find out Where spam comes from How to set up spam filters How folders help filter out spam What additional programs can help Where—and how—to report spam How best to lobby for spam control You'll get the plain-English explanation for activating any additional protection offered by your ISP, and discover how to make the best use of any spam filter that came with your e-mail program. *Fighting Spam For Dummies* will arm you with information about Making your address harder for spammers to grab Why simply hitting "delete" isn't enough Tracking down the source of the spam What you can learn from e-mail headers How spam filters work—and why they aren't foolproof Setting up the maximum level of filtration for your e-mail program and ISP What information your ISP needs when you report spam How—and how not—to complain Adding protection with POPFile Ways to protect your clients if you're a network administrator The ultimate solution to spam has yet to be found, but these Internet-savvy authors give you the tools to help level the playing field.
