Management of Nitrogen and Phosphorus Fertilizers in Sub-Saharan Africa Uzo M. Mokwunye, Paul Vlek, 2012-02-12 Food security, one of the basic human rights, seems to be ever eluding the people of sub-Saharan Africa. With each occurrence of crop failure, agriculturalists around the world reawaken to the challenge of ensuring stable, adequate food production in the tropical African environments. The International Fertilizer Development Center (IFDC), with its mandate of alleviating food shortages through judicious use of fertilizers, formulated a program to study fertilizer use strategies for sub-Saharan Africa. With generous financial assistance from the International Fund for Agricultural Development (IFAD), IFDC, in collaboration with the International Crop Research Institute for the Semi-Arid Tropics (ICRISAT) and the International Institute for Tropical Agriculture (IITA), initiated a research project aimed at assessing means to remedy soil nutrient deficiencies that constrain food production in the humid, subhumid, and semiarid tropics of Africa. The results of this project were summarized during a workshop held in Togo, March 25-28, 1985; the proceedings of that meeting are found in this volume. The project established collaboration with numerous national programs that were responsible for much of the data collection. The data presented in Chapters 6 and 9 include much of this information. We wish to acknowledge the contribution of the individual scientists, J.T. Ambe, F. Ganry, M. Gao, M. Issaka, J. Kiazolu, J. Kikafunde-Twine, K. Kpombrekou, F. Lompo, H.

Rational Choice and Security Studies Michael E. Brown,Owen R. Cote, Jr.,Sean M. Lynn-Jones,Steven E. Miller,2000-07-18 Opposing views on the merits of formal rational choice approaches as they have been applied to international security studies. Formal theories and rational choice methods have become increasingly prominent in most social sciences in the past few decades. Proponents of formal theoretical approaches argue that these methods are more scientific and sophisticated than other approaches, and that formal methods have already generated significant theoretical progress. As more and more social scientists adopt formal theoretical approaches, critics have argued that these methods are flawed and that they should not become dominant in most social-science disciplines. Rational Choice and Security Studies presents opposing views on the merits of formal rational choice approaches as they have been applied in the subfield of international security studies. This volume includes Stephen Walt's article Rigor or Rigor Mortis? Rational Choice and Security Studies, critical replies from prominent political scientists, and Walt's rejoinder to his critics. Walt argues that formal approaches have not led to creative new theoretical explanations, that they lack empirical support, and that they have contributed little to the analysis of important contemporary security problems. In their replies, proponents of rational choice approaches emphasize that formal methods are essential for achieving theoretical consistency and precision.

Songs of Love and Hate Courtney Milnestein, 2022-05-28 After two years hunched over her laptop at home, Deanna Spenser is finally back in the office, albeit only for three days a week, and predictably, she hates it. Driven by a deep desire for change, a yearning to not go back to the way things were before coronavirus, she finds herself consumed by memories of adolescence, of a friend lost to the past. Abruptly, she is offered a chance to reconnect with her friend. Yet as the past opens up before her, she finds herself wondering if perhaps there are things that should not be revisited after all.
