Masters of the Keyboard Konrad Wolff,1983 ... fluently written and often humorous... --Notes ... should be required reading for performers and teachers. -- The Eighteenth Century Konrad Wolff characterizes in detail the personal musical language of several great masters of the piano, pursuing different lines of investigation to discover each composer's essential traits. He brings the accumulated wisdom of his long career as a pianist and teacher to this delineation of compositional styles. Both intellect and musicality contribute to his cogent observations, and his literary style is as eloquent as the music he describes.

Empress Marie Therese and Music at the Viennese Court, 1792-1807 John A. Rice, 2003-07-24 Study of Empress Marie Therese as music patron in the Vienna of Haydn and Beethoven.

Interpreting Historical Keyboard Music Dr Andrew Woolley, Dr John Kitchen, 2013-12-28 Research in the field of keyboard studies, especially when intimately connected with issues of performance, is often concerned with the immediate working environments and practices of musicians of the past. An important pedagogical tool, the keyboard has served as the 'workbench' of countless musicians over the centuries. In the process it has shaped the ways in which many historical musicians achieved their aspirations and went about meeting creative challenges. In recent decades interest has turned towards a contextualized understanding of creative processes in music, and keyboard studies appears well placed to contribute to the exploration of this wider concern. The nineteen essays collected here encompass the range of research in the field, bringing together contributions from performers, organologists and music historians. Questions relevant to issues of creative practice in various historical contexts, and of interpretative issues faced today, form a guiding thread. Its scope is wide-ranging, with contributions covering the mid-sixteenth to early twentieth century. It is also inclusive, encompassing the diverse range of approaches to the field of contemporary keyboard studies. Collectively the essays form a survey of the ways in which the study of keyboard performance can enrich our understanding of musical life in a given period.

Makers of the Piano: 1820-1860 Martha Novak Clinkscale, 1993 This book continues the overview of early pianos begun in Clinkscale's *Makers of the Piano 1700-1820* (OUP, 1993). Although a few of the biographies overlap, the majority of the makers are completely new. Approximately 2,400 makers and manufacturers and about 2,200 pianos are listed. Of this total, about 645 are English, the majority of whom were active in London; more than 200 of the London makers have not been discussed in previous publications.
