East European Transition and EU Enlargement Wojciech W. Charemza, Krystyna Strzala, 2012-12-06 In March 1998 the European Union formally launched the accession process that will lead to a significant enlargement of the Union. So far ten countries from Central Europe: Bulgaria, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, the Slovak Republic and Slovenia have submitted their applications for EU membership. This unique process immediately attracted attention of economists and policy makers. Nevertheless, it can be noticed that among numerous results already published, there is a distinctive shortage of books and papers in which quantitative research methods are applied. This is to a large extent justified by the fact that the transition and accession processes are new to the economic sciences, their methodology is not well researched, statistical data for the Central and East European countries are scarce and not always reliable and, generally, quantitative approach seems to be a risky and uncertain business. All these all problems can also be seen as a challenge rather than an obstacle. With this on mind, we have decided to clarify the status quo by organising a research seminar which focused on the methodology and quantitative analysis of the Central and East European transition and pre-accession processes. The seminar, East European Transition and EU Enlargement: a Quantitative Approach organised by Macroeconomic and Financial Data Centre (University of Gdansk and University of Leicester) took place in Gdansk in June 2001. Our edited volume contains papers developed from this seminar.

Web Component Development with Zope 3 Philipp Weitershausen, 2008-01-23 Zope is a powerful Python web application platform for rapidly and collaboratively developing complex web applications. With version 3, Zope has been rebuilt on top of a Component Architecture that combines the best ideas from modern web platforms. This new edition details all the changes and new features in Zope 3. It also makes it easier to get started with Zope, incorporating input and suggestions from Zope 3 experts and newcomers alike. In addition, the book addresses the needs of Zope 2 developers who want to use Zope 3 features as they are backported into the Zope 2 platform.

3G, 4G and Beyond Martin Sauter, 2013-01-04 Extensively updated evaluation of current and future network technologies, applications and devices This book follows on from its successful predecessor with an introduction to next generation network technologies, mobile devices, voice and multimedia services and the mobile web 2.0. Giving a sound technical introduction to 3GPP wireless systems, this book explains the decisions taken during standardization of the most popular wireless network standards today, LTE, LTE-Advanced and HSPA+. It discusses how these elements strongly influence each other and how network capabilities, available bandwidth, mobile device capabilities and new application concepts will shape the way we communicate in the future. This Second Edition presents a comprehensive and broad-reaching examination of a fast-moving technology which will be a welcome update for researchers and professionals alike. Key features: Fully updated and expanded to include new sections including VoLTE, the evolution to 4G, mobile Internet access, LTE-Advanced, Wi-Fi security and backhaul for wireless networks Describes the successful commercialization of Web 2.0 services such as Facebook, and the emergence of app stores, tablets and smartphones Examines the evolution of mobile devices and operating systems, including ARM and x86 architecture and their application to voice-optimized and multimedia devices

Macroeconomic Measurement Versus Macroeconomic Theory Merijn Knibbe, 2019-12-06 Ideally, scientific theory and scientific measurement should develop in tandem, but in recent years this has not been the case in economics. There used to be a time when leading economists, or their students, established or led statistical offices and took care that the measurements were consistent with the theory (and vice versa). Not anymore. Macroeconomic theorists and macroeconomic statisticians do not even speak the same

language any longer. They do use the same words, such as ‘consumption’, ‘investments’ or ‘unemployment’ but the meanings can often be different. This book maps the differences between macroeconomic theory and measurement and explores them in some detail while also tracking their intellectual, historical and, in some cases, ideological origins. It also explores the possible policy implications. In doing so, the book draws on two separate strands of literature which are seldom used in unison: macro-statistical manuals and theoretical macro-papers. By doing so, the book contributes to the effort to bridge the gap between them without compromising on the idea that a meaningful science of economics should, in the end, be based upon individual people and households and their social and cultural embedding instead of a ‘representative consumer’, or Robinson Crusoe figure. This work is essential reading for students, economists, statisticians, and professionals.

Micronutrients and Macronutrients as Nutraceuticals Prakash Chandra Gupta, Sayan Bhattacharyya, Nisha Sharma, Rajesh K. Kesharwani, Raj K. Keservani, 2024-02-06 This new volume explains in detail the properties of micronutrients and macronutrients and their diverse uses as nutraceuticals for their beneficial properties, such as their antioxidant activity and immunity-boosting properties and how they can be incorporated into the human diet for optimum health, for growing beneficial bacteria in the gut, and inhibition of pathogens. Interestingly, the authors look at how disease-promoting habits often unfold in childhood, even prenatally, and employing nutrigenomics early on goes a long way toward curbing these chronic diseases later on in life. With the advent of increasing drug costs and escalating antimicrobial resistance, the pharmacological and antibiotic-like effects of naturally derived nutraceuticals are worth exploring. This volume provides important information toward that goal that will be valuable for researchers, faculty, and graduate students in medical microbiology, pharmacy, chemical engineering, and medical informatics.

Il benessere del bambino da 0 a 6 anni AA.VV., 2020-12-14 Il benessere del bambino in età prescolare è il filo conduttore che lega insieme i diversi contributi dell’e-book. In un’unica narrazione sono affrontati temi cruciali per lo sviluppo dai 0 ai 6 anni, quali: i distacchi del crescere, l’importanza dell’alimentazione e del movimento, l’uso consapevole dei dispositivi elettronici, l’apprendimento, l’interazione tra pari, il gioco e, infine, la musica come mezzo per sostenere lo sviluppo del linguaggio, del gioco simbolico e della relazione con l’altro. Il volume fa parte della collana di e-book dell’Associazione In.Crea.Se. - Innovation Creativity Setting. Nato nel 2014, il gruppo di ricerca-azione InCreaSe è costituito da professori e ricercatori universitari, ricercatori di importanti centri di ricerca, imprenditori, liberi professionisti, manager del pubblico, del privato e del terzo settore di diverse regioni d’Italia. Ha scopi prettamente culturali e l’attività scientifica si articola in quattro sezioni di studio/ricerca: Intangible asset in azienda e territorio; SoIL Sostenibilità, Innovazione, Legami; Dinamiche sociali; Salute e società. In questo e-book : Silvia Vercellino,

Compendium of Polymer Terminology and Nomenclature Richard G Jones, Edward S Wilks, W. Val Metanowski, Jaroslav Kahovec, Michael Hess, Robert Stepto, Tatsuki Kitayama, 2009-01-19 The IUPAC system of polymer nomenclature has aided the generation of unambiguous names that reflect the historical development of chemistry. However, the explosion in the circulation of information and the globalization of human activities mean that it is now necessary to have a common language for use in legal situations, patents, export-import regulations, and environmental health and safety information. Rather than recommending a 'unique name' for each structure, rules have been developed for assigning 'preferred IUPAC names', while continuing to allow alternatives in order to preserve the diversity and adaptability of nomenclature. Compendium of Polymer Terminology and Nomenclature is the only publication to collect the most important work on this subject into a single volume. It serves as a handy compendium for scientists and removes the need for time consuming literature searches. One of a series issued by the International Union of Pure and Applied Chemistry (IUPAC), it covers the terminology used in many and varied aspects of polymer science as well as the nomenclature of several different types of polymer including regular and irregular single-strand organic polymers, copolymers and regular double-strand (ladder and spiro) organic polymers.
