A Handbook for Preparing Graduate Papers in Music J. David Boyle, Richard K. Fiese, Nancy Zava, 2004 The purpose of Preparing Graduate Papers in Music is to provide music students with some guidelines to assist in the preparation of theses, essays, dissertations, and other papers that may be written as part of their graduate program. This manual includes information and examples for preparing such papers and is designed specifically to assist students in writing about music and in documenting references to music, music notation, recordings, and other musical resources. It is intended to complement guidelines provided by a university's graduate office and the two style manuals most used by music students, A Manual for Writers of Term Papers, Theses, and Dissertations (Turabian 1996) and the Publication Manual of the American Psychological Association (APA 1994).

Alone with Others Katja Haustein, 2023-09-30 Times of crisis expose how we experience social, physical, and emotional forms of distance. Alone with Others explores how these experiences overlap, shaping our coexistence. Departing from conventional debates that associate intimacy with affection and distance with alienation, Haustein introduces tact as a particular mode of feeling one's way and making space in the sphere of human interaction. Reconstructing tact's conceptual history from the late eighteenth century to the present, she focuses on two World Wars, and 1968, as three periods of socio-political upheaval. In a series of reading encounters with Marcel Proust, Helmuth Plessner, Theodor Adorno, François Truffaut, and Roland Barthes, Haustein invites us to reconsider our own ways of engaging with other people, images, and texts, and to gauge the significance of tact today. The Girl from Berlin Ronald H. Balson, 2018-10-09 In the newest novel from internationally-bestselling author Ronald H. Balson, Liam and Catherine come to the aid of an old friend and are drawn into a property dispute in Tuscany that unearths long-buried secrets. An old friend calls Catherine Lockhart and Liam Taggart to his famous Italian restaurant to enlist their help. His aunt is being evicted from her home in the Tuscan hills by a powerful corporation claiming they own the deeds, even though she can produce her own set of deeds to her land. Catherine and Liam's only clue is a bound handwritten manuscript, entirely in German, and hidden in its pages is a story long-forgotten... Ada Baumgarten was born in Berlin in 1918, at the end of the war. The daughter of an accomplished first-chair violinist in the prestigious Berlin Philharmonic, and herself a violin prodigy, Ada's life was full of the rich culture of Berlin's interwar society. She formed a deep attachment to her childhood friend Kurt, but they were torn apart by the growing unrest as her Jewish family came under

suspicion. As the tides of history turned, it was her extraordinary talent that would carry her through an unraveling society turned to war, and make her a target even as it saved her, allowing her to move to Bologna—though Italy was not the haven her family had hoped, and further heartache awaited. What became of Ada? How is she connected to the conflicting land deeds of a small Italian villa? As they dig through the layers of lies, corruption, and human evil, Catherine and Liam uncover an unfinished story of heart, redemption, and hope—the ending of which is yet to be written. Don't miss Liam and Catherine's latest adventures in *The Girl from Berlin*!

Maestros and Their Music John Mauceri, 2018-11-06 John Mauceri, who has stood on podiums before storied symphonies, operas, and ballets around the world, brings a lifetime of experience to bear in this informative, brilliantly entertaining exploration of his profession. As Mauceri traces the lineage of his craft, from Felix Mendelssohn (the first to use a baton) to the present day, he shows us how conducting is itself a composition: of legacy and tradition, of techniques handed down—and more than a trace of ineffable magic. Weaving clear musical explanations together with memorable accounts of working alongside masters like Bernstein and Stokowski, Mauceri reveals how conductors approach a piece with a combination of personal interpretation, imagination, and insight into the composer's intent; what it takes to communicate solely through gesture, with sometimes hundreds of performers at once; and the occasionally glamorous, often challenging life of the itinerant maestro. Illuminating and instructive, inflected with candor, humor, and grace, *Maestros and Their Music* is the perfect guide to the allure and theater, passion and drudgery, rivalries and relationships of the conducting life.

**Enlightening Symbols** Joseph Mazur, 2016-12-06 An entertaining look at the origins of mathematical symbols While all of us regularly use basic math symbols such as those for plus, minus, and equals, few of us know that many of these symbols weren't available before the sixteenth century. What did mathematicians rely on for their work before then? And how did mathematical notations evolve into what we know today? In *Enlightening Symbols*, popular math writer Joseph Mazur explains the fascinating history behind the development of our mathematical notation system. He shows how symbols were used initially, how one symbol replaced another over time, and how written math was conveyed before and after symbols became widely adopted. Traversing mathematical history and the foundations of numerals in different cultures, Mazur looks at how historians have disagreed over the origins of the numerical system for the past two centuries. He follows the transfigurations of algebra from a rhetorical style to a symbolic one, demonstrating that most algebra before the sixteenth century was written in prose or in verse employing the written names of numerals. Mazur also investigates the subconscious and psychological effects that mathematical symbols have had on mathematical thought, moods, meaning, communication, and comprehension. He considers how these symbols influence us (through similarity, association, identity, resemblance, and repeated imagery), how they lead to new ideas by subconscious associations, how they make connections between experience and the unknown, and how they contribute to the communication of basic mathematics. From words to abbreviations to symbols, this book shows how math evolved to the familiar forms we use today.

**A Thousand Perfect Notes** C. G. Drews, 2018-06-07 An emotionally charged story about the power of dreams, and how passion can turn to obsession. Beck hates his life. He hates his violent mother. He hates his home. Most of all, he hates the piano that his mother forces him to play hour after hour, day after day. He will never play as she did before illness ended her career and left her bitter and broken. But Beck is too scared to stand up to his mother, and tell her his true passion, which is composing his own music - because the least suggestion of rebellion on his part ends in violence. When Beck meets August, a girl full of life, energy and laughter, love begins to awaken within him and he glimpses a way to escape his painful existence. But dare he reach for it? Thrilling and powerfully written, this is an explosive debut for YA readers which tackles the dark topic of domestic abuse in an ultimately hopeful tale.

*Semiotics of Classical Music* Eero Tarasti, 2012-10-01 Musical semiotics is a new discipline and paradigm of both semiotics and musicology. In its tradition, the current volume constitutes a radically new solution to the theoretical problem of how musical meanings emerge and how they are transmitted by musical signs even in most absolute and abstract musical works of Western classical heritage. Works from symphonies, lied, chamber music to opera are approached and studied here with methods of semiotic inspiration. Its analyses stem from systematic methods in the author's previous work, yet totally new analytic concepts are also launched in order to elucidate profound musical significations verbally. The book reflects the new phase in the author's semiotic approach, the one characterized by the so-called existential semiotics elaborated on the basis of philosophers from Kant, Hegel and Kierkegaard to Jaspers, Heidegger, Sartre and Marcel. The key notions like musical subject, Schein, becoming, temporality, modalities, Dasein, transcendence put musical facts in a completely new light and perspectives of interpretation. The volume attempts to make explicit what is implicit in every musical interpretation, intuition and understanding: to explain how compositions and composers talk to us. Its analyses are accessible due to the book's universal approach. Music is experienced as a language, communicating from one subject to another.
