Software and Mind Andrei Sorin, 2013-01-01 Addressing general readers as well as software practitioners, *Software and Mind* discusses the fallacies of the mechanistic ideology and the degradation of minds caused by these fallacies. Mechanism holds that every aspect of the world can be represented as a simple hierarchical structure of entities. But, while useful in fields like mathematics and manufacturing, this idea is generally worthless, because most aspects of the world are too complex to be reduced to simple hierarchical structures. Our software-related affairs, in particular, cannot be represented in this fashion. And yet, all programming theories and development systems, and all software applications, attempt to reduce real-world problems to neat hierarchical structures of data, operations, and features. Using Karl Popper's famous principles of demarcation between science and pseudoscience, the book shows that the mechanistic ideology has turned most of our software-related activities into pseudoscientific pursuits. Using mechanism as warrant, the software elites are promoting invalid, even fraudulent, software notions. They force us to depend on generic, inferior systems, instead of allowing us to develop software skills and to create our own systems. Software mechanism emulates the methods of manufacturing, and thereby restricts us to high levels of abstraction and simple, isolated structures. The benefits of software, however, can be attained only if we start with low-level elements and learn to create complex, interacting structures. Software, the book argues, is a non-mechanistic phenomenon. So it is akin to language, not to physical objects. Like language, it permits us to mirror the world in our minds and to communicate with it. Moreover, we increasingly depend on software in everything we do, in the same way that we depend on language. Thus, being restricted to mechanistic software is like thinking and communicating while being restricted to some ready-made sentences supplied by an elite. Ultimately, by impoverishing software, our elites are achieving what the totalitarian elite described by George Orwell in *Nineteen Eighty-Four* achieves by impoverishing language: they are degrading our minds.

Welcome to a world where nightmarish creatures reign supreme. Five hundred years ago, Jack made a deal with the devil. It's difficult for him to remember much about his mortal days. So he focuses on fulfilling his sentence as a Lantern--one of the watchmen who guard the portals to the Otherworld, a realm crawling with every nightmarish creature imaginable. Jack has spent centuries jumping from town to town, ensuring that nary a mortal--or not-so-mortal--soul slips past him. That is, until he meets beautiful Ember O'Dare. Seventeen, stubborn, and a natural-born witch, Ember feels a strong pull to the Otherworld. Undeterred by Jack's warnings, she crosses into the forbidden plane with the help of a mysterious and debonair vampire--and the chase through a dazzling, dangerous world is on. Jack must do everything in his power to get Ember back where she belongs before both the earthly and unearthly worlds descend into chaos. Colleen Houck, the New York Times bestselling author of the *Tiger's Curse* series and the *Reawakened* series, breathes new life into classic folklore in this wild, twisting adventure propelled by the spirit of Halloween. [Houck] offers a fresh spin on *The Legend of Sleepy Hollow*. --Kirkus Reviews A wild and seductive adventure. . . . **Cut Both Ways** Carrie Mesrobian,2017-02-28 A TOP 10 RAINBOW LIST BOOK William C. Morris YA Debut Award nominee Carrie Mesrobian delivers a "raw, sympathetic coming-of-age story [that] uncovers the messy, painful, yet vitally important process of self-discovery" (Booklist, starred review) when a high school senior comes to terms with his attraction to both his girlfriend and his male best friend. It took Will Caynes seventeen years to have his first kiss. He should be ecstatic...except that it was with his best friend, Angus, while they were both drunk and stoned. Will's not gay, but he did sort of enjoy whatever it was he felt with Angus. Unsettled by his growing interest in Angus, Will avoids his friend and even starts dating a sophomore, Brandy. When he's hooking up with her, he's totally into it, so he must be straight, right? Then why does he secretly keep going back to Angus? Confusing as Will's feelings are, they're a welcome distraction from his complicated home life. His father has started drinking earlier each day when he should be working on never-ending house renovations. And his mom—divorced and living in a McMansion with her new husband—isn't much help, unless she's buying Will a bunch of stuff he doesn't need. Between the two of them, neither feels like much of a parent—which leaves Will on his own in figuring things out with his girlfriend and best friend. He loves them both, but deciding who to be with will ultimately hurt someone. Himself, probably the most.

**The Transcendental Temptation** Paul Kurtz,2013-09-10 In this landmark work, Paul Kurtz examines the reasons why people accept supernatural and paranormal belief systems in spite of substantial evidence to the contrary. According to Kurtz, it is because there is within the human species a deeply rooted tendency toward magical thinking—the "transcendental temptation"—which undermines critical judgment and paves the way for willful beliefs. Kurtz explores in detail the three major monotheistic religions—Judaism, Christianity, and Islam—finding striking psychological and sociological parallels between these religions, the spiritualism of the nineteenth century, and the paranormal belief systems of today. This acclaimed and controversial book includes sections on mysticism, belief in the afterlife, the existence of God, reincarnation, astrology, and ufology. Kurtz concludes by explaining and advocating rational skepticism as an antidote to belief in the transcendental.
