**Software and Mind** Andrei Sorin, 2013-01-01 Addressing general readers as well as software practitioners, *Software and Mind* discusses the fallacies of the mechanistic ideology and the degradation of minds caused by these fallacies. Mechanism holds that every aspect of the world can be represented as a simple hierarchical structure of entities. But, while useful in fields like mathematics and manufacturing, this idea is generally worthless, because most aspects of the world are too complex to be reduced to simple hierarchical structures. Our software-related affairs, in particular, cannot be represented in this fashion. And yet, all programming theories and development systems, and all software applications, attempt to reduce real-world problems to neat hierarchical structures of data, operations, and features. Using Karl Popper's famous principles of demarcation between science and pseudoscience, the book shows that the mechanistic ideology has turned most of our software-related activities into pseudoscientific pursuits. Using mechanism as warrant, the software elites are promoting invalid, even fraudulent, software notions. They force us to depend on generic, inferior systems, instead of allowing us to develop software skills and to create our own systems. Software mechanism emulates the methods of manufacturing, and thereby restricts us to high levels of abstraction and simple, isolated structures. The benefits of software, however, can be attained only if we start with low-level elements and learn to create complex, interacting structures. Software, the book argues, is a non-mechanistic phenomenon. So it is akin to language, not to physical objects. Like language, it permits us to mirror the world in our minds and to communicate with it. Moreover, we increasingly depend on software in everything we do, in the same way that we depend on language. Thus, being restricted

to mechanistic software is like thinking and communicating while being restricted to some ready-made sentences supplied by an elite. Ultimately, by impoverishing software, our elites are achieving what the totalitarian elite described by George Orwell in *Nineteen Eighty-Four* achieves by impoverishing language: they are degrading our minds.

*Daily Magic* Judika Illes, 2021-08-31 A year-long collection of spells and rituals for harnessing the magical power of each day from the author of the *Encyclopedia of 5000 Spells*. We all could use a little magic in our daily lives. But while the year is filled with mystical dates, we don't always know when and how to celebrate them. By knowing and preparing for these special days we can use their inherent power to change our lives. *Daily Magic* is a perpetual calendar focused on days of spiritual and magical significance. April 30th for example, is perfect for spellcasting—especially spells for love, romance, fertility, and prosperity. Judika Illes teaches you how to create rituals and cast spells, provides recipes for potions, and offers advice on creating feasts to honor sacred beings. While the most spiritually significant power dates of the year are Midsummer's Eve, Halloween/Samhain, and New Year's, opportunities to use rituals and spells for the most popular goals—love, prosperity, fertility, healing, and protection—occur every week. Illes offers guidance on when to perform a spell—whether it's best to conjure now or to wait for a special power date later in the year. *Daily Magic* is a spiritual daily calendar that give us the power and the tools we need to take control of our destiny!

*Magical Alphabets* Nigel Pennick, 1992-01-01 Here the alphabetical systems of the West, including Hebrew, Greek, Runic, Celtic, Medieval, and the Renaissance alphabets of the alchemical tradition

are examined in depth. Explains the numerological significance of the various alphabets, and provides exciting evidence for the widespread influence of Runes.

**Magic and Magicians in the Middle Ages and the Early Modern Time** Albrecht Classen, 2017-10-23 There are no clear demarcation lines between magic, astrology, necromancy, medicine, and even sciences in the pre-modern world. Under the umbrella term 'magic,' the contributors to this volume examine a wide range of texts, both literary and religious, both medical and philosophical, in which the topic is discussed from many different perspectives. The fundamental concerns address issue such as how people perceived magic, whether they accepted it and utilized it for their own purposes, and what impact magic might have had on the mental structures of that time. While some papers examine the specific appearance of magicians in literary texts, others analyze the practical application of magic in medical contexts. In addition, this volume includes studies that deal with the rise of the witch craze in the late fifteenth century and then also investigate whether the Weberian notion of disenchantment

pertaining to the modern world can be maintained. Magic is, oddly but significantly, still around us and exerts its influence. Focusing on magic in the medieval world thus helps us to shed light on human culture at large.

*The Sleepwalkers* Arthur Koestler, 2017-02-23 Arthur Koestler's extraordinary history of humanity's changing vision of the universe In this masterly synthesis, Arthur Koestler cuts through the sterile distinction between 'sciences' and 'humanities' to bring to life the whole history of cosmology from the Babylonians to Newton. He shows how the tragic split between science and religion arose and how, in particular, the modern world-view replaced the medieval world-view in the scientific revolution of the seventeenth century.

He also provides vivid and judicious pen-portraits of a string of great scientists and makes clear the role that political bias and unconscious prejudice played in their creativity.

*Perry's Department Store: A Buying Simulation* Karen

Videtic, Cynthia W. Steele, 2015-01-29 *Perry's Department Store: A Buying Simulation* bridges the gap between the principles of retail buying and mathematical concepts using a unique simulation approach that takes readers step-by-step through a real-life buying experience. Videtic and Steele present a simplified process for making complex buying decisions using the fictitious Perry's Department Store that walks students through the steps a new buyer would take to complete a six-month buying plan and a merchandise assortment plan for categories including junior, misses' bridge/contemporary, men's, children's, denim, accessories, or home fashion. The fourth edition has been revised with statistical information to reflect a more contemporary structure and business model for a successful department store. The new Perry's Department Store is organized to reflect a larger-scale department store in today's market. Students interact by researching current market and industry trends to build their business. The charts and forms in this book and companion website are replicas of those found in the retail and wholesale industry to expose student to the procedures and policies they can expect to find in a first job as an assistant buyer. This new edition and companion website launches students directly into the exciting role of a retail buyer in the fashion industry.

*The Architect as Magician* Albert C. Smith, Kendra Schank

Smith, 2020-05-07 *The Architect as Magician* explores the connection between magic and architecture. There is a belief that a greater understanding of the meaning of magic provides insights about

architecture and architects' design processes. Architects influence the effects of nature through the making of their buildings. In an analogous condition, magicians perform rituals in an attempt to influence the forces of nature. This book argues that architects could gain much by incorporating ideas from magic into their design process. The book demonstrates through historical and current examples the important influence magic has had on the practice of architecture. The authors explain how magic helps us to understand the way we infuse architecture with meaning and how magic affects and inspires architectural creation. Aimed at architects, students, scholars and researchers, *The Architect as Magician* helps readers discover the ambiguous and spiritual elements in their design process.

Reinventing Ourselves as Teachers Claudia Mitchell, Sandra Weber, 2003-10-04 Designed for use by teachers and teacher educators, this text should help both novice and experienced teachers reinterpret their working lives. The reader is led on a path of personal exploration that goes beyond standard approaches and leads from the personal to the critical. Illustrative material is drawn from all levels, from kindergarten to high school, to illuminate issues and questions fundamental to teachers' lives. Film and literary narratives supply further case studies and contribute to the fusion of critical reflection and everyday realities that typically inform teachers' experiences of work.

*Ancient Egyptian Magic for Modern Witches* Ellen Cannon Reed, 2021 Bring the wisdom of the gods and goddesses of ancient Egypt to life by merging their ancient traditions with modern Pagan practice. This book will provide readers with the tools to continue learning and developing their own methods of honoring them, including songs, rituals, information about hieroglyphs, how to make

incense and oils, and recipes for an ancient Egyptian feast--

Magic and Religion in the Ancient Mediterranean World

Radcliffe G. Edmonds III, Carolina López-Ruiz, Sofía Torallas-

Tovar, 2023-11-15 This volume explores aspects of ancient magic and religion in the ancient Mediterranean, specifically ways in which religious and mythical ideas, including the knowledge and practice of magic, were transmitted and adapted through time and across Greco-Roman, Near Eastern, and Egyptian cultures. Offering an original and innovative combination of case studies on the material aspects and cross-cultural transfers of magic and religion, this book brings together a range of contributions that cross and connect sub-fields with a pan-Mediterranean, comparative scope. Section I investigates the material aspects of magical practices, including first editions and original studies on papyri, gems, lamellae containing binding curses and protective texts, and other textual media in ancient book culture. Several chapters feature the Greco-Egyptian Magical Papyri, the compilation of magical recipes in the formularies, and the role of physical book-forms in the transmission of magical knowledge. Section II explores magic and religion as nodes of cultural exchange in the ancient Mediterranean. Case studies range from Egypt to Anatolia and from Syria-Phoenicia to Sicily, with Greco-Roman religion and myth integrated in a diverse and interconnected Mediterranean landscape. Readers encounter studies featuring charismatic figures of Magi and itinerant begging priests, the multiple understandings of deities such as Hekate, Herakles, or Aphrodite, or the perceived exotic origin of cult statues, mummies, amulets, and cursing formulae, which bring to light the rich intercultural networks of the ancient Mediterranean, and the crucial role of magic and religion in the process of cross-cultural adaptation and innovation. Magic and Religion in the Ancient

Mediterranean World appeals to both specialized and non-specialized audiences, with expert contributions written in an accessible way. This is a fascinating resource for students and scholars working on magic, religion, and mythology in the ancient Mediterranean.
