The Weakest Manga Villainess Wants Her Freedom! Kazuki Karasawa,2020-05-22 Oh, crud, I just realized that I've been reincarnated into my favorite manga as the first boss defeated by the heroine at the start of the story! Worst yet, it turns out my fiancé is the strongest of the Four Grand Magi and the very villain who slanders my character as a disgrace on her deathbed! I'm outta here! This is the story of the weakest manga villainess who seeks out the slow life instead of the villain life.

Antimagic Stephen Hayes,2022-05-15 After having been on the back-foot for some time, John and his circle of friends now have an opportunity to end the war once and for all. But the new ruler of the world has other ideas entirely as he works tirelessly to consolidate his power at every possible point of infiltration. With the stakes rising ever higher, our heroes must consider the unthinkable: that magic itself must be destroyed in order to save humanity from it. Only when the world itself is on the brink of destruction is the darkest hour upon them, and yet there remains one last possibility for salvation. But can our heroes harness a power so great that it can literally bend fate itself to their will? Or will such an attempt doom them once and for all?

Magical Explorer, Vol. 3 (light novel) Iris,2022-10-18 Still in his first year at Tsukuyomi Magic Academy, Kousuke Takioto continues his freewheeling routine of clearing dungeons with the heroines between bouts of training. However, his tendency to cut class isn't lost on the other students, who now view him as a slacker. Despite this, Yukine Mizumori can't help but marvel at how none of this seems to phase our hero. But Kousuke isn't content leaving things there—this time, he'll settle for nothing less than achieving the fastest dungeon clear time in the Academy!

Emotional Engineering Volume 4 Shuichi Fukuda,2016-06-15 This book describes the important role of emotion in a hyper-connected society and how product development and manufacture change. It explores how our work and lifestyle may be affected by

forthcoming technologies and presents key research on multisensory informatics, one of the most important tools for making the most of emotion. This fourth volume of the Emotional Engineering Series focuses on the human issues relating to Cyber Physical Systems, or Industrie 4.0, and discusses the important role emotion plays in these smart environments. Introducing related works in the field of multisensory research, which provide the basic tools for becoming context- and situation aware in this imminent revolutionary society, it discusses not only the changes in production and product development this new revolution will bring about, but also highlights how emotion plays a crucial role in making us happy in such a connected society and in bringing about harmonization between human and human, between human and machine and, last but not least, in maintaining a good work-life balance.

The Crystal Entanglement J.Molyneux,2018-06-23 Can a pile of crystals be evil? They can, especially if they are possessed by the soul of a malevolent witch bent on destruction and revenge on the living. When they become the property of a mad aristocrat the capital becomes the domain of a monster who consumes the souls of both men and wizards; but wizards are tastier.

The Quicksilver Wyrms J.Molyneux,2019-05-07 Do creepy crawlies make your spine tingle? Well, get ready for the Quicksilver Wyrms... one bite induces madness and death. They are the latest weapon deployed by Hitler's magical forces against Britain. How do you defend the country against an army that can be smuggled ashore in a shoebox?

Cycles of Therran Zakk Duffy,2015-02-27 The Cycles of Therran began when the tainted god first appeared and attempted to annihilate the land of Therran and all life upon it. Since his defeat, the tainted god rises from dormancy every thousand years, creating the Cycles. Seepage of Darkness is the first volume that chronicles the occurrence of the 5th Cycle. Tret is raised by his parents on a reclusive mountainside. His parents are killed from a

magical attack just prior to his thirteenth birthday. For the next four years he lives alone on the mountainside, surviving as best as he is able. Moreck, a friend of his deceased parents, finally locates him. Tret finds out the truth about himself and his parents, which had been hidden from him since his birth. The young sorcerer follows Moreck, a master swordsman, to continue with the quest his parents began before he was born. The races of the elf, dwarf, and fae separated themselves from the human race almost one thousand ago, after the ending of the last Cycle; becoming present day myths. A magical talisman, belonging to each of the races, must find a wielder of it and come together for the final battle with the tainted god. Three different harbingers appear in the world, one at a time, preparing the way for the coming of their master. Records of them and the past Cycles were written in an ancient language that has been forgotten. Moreck and Tret set out to uncover lost knowledge, unite the talismans and their wielders, engage in a campaign to defend the land of Therran from the harbingers, and battle an evil group of sorcerers known as the Pentad.

Spontaneous Combustion Thom L. Nichols, 2010-03 A werewolf doesn't transform into existence, it is exchanged into this world from a parallel universe. That transportation is painful and violent because the world it comes from is dominated by evil magic. After a bizarre experience with a UFO, Greg finds himself spontaneously combusting. Then, everything turns upside down. He finds himself involved with a group of people that have also spontaneously transformed. Greg combusted, so he is now made of fire. Others are made of air, water, lightning, and shadows. They only have two things in common. They all had a weird experience and they are no longer at the top of the food chain. They are now the main course for the werewolves. Outside of the real world, but able to see it, Greg finds that the only way to survive and try to get back is to use magic. It is readily available, but he can't access the good magic. He has to use the evil, and it exacts a terrible

price.

Real Time Visual Effects for the Technical Artist Chris Roda, 2022-04-05 Visual effects (VFX) are one of the most complicated components of feature film and television creation. With advancements in such technologies as Ray Tracing and Virtual Reality, the visual quality of the real-time rendering engine is now rivaling feature film. Real-time rendering requires years of programming experience with advanced understanding in math and physics. As the power of the real-time rendering engine improves, so too do the interfaces for VFX creation. With limited technical understanding, artists can create VFX with the push of a button and tug of a slider. As powerful as the interfaces are, they can only expose a portion of the true potential of the rendering engine. Artists are limited by their understanding of the engine interface. *Real Time Visual Effects for the Technical Artist* is written for digital artists to explain the core concepts of VFX, common in all engines, to free them from interface bounds. **Features:** Introduces the reader to the technical aspects of real-time VFX Built upon a career of more than 20 years in the feature film VFX and the real-time video game industries and tested on graduate and undergraduate students Explores all real-time VFX in four categories: in-camera effects, in-material effects, simulations, and particles This book is written to complement undergraduate- or graduate-level courses focused on the fundamentals of modern real-time VFX. Chris Roda is a Technical Art instructor at the Florida Interactive Entertainment Academy (FIEA), a graduate degree program in interactive, real-time application development at the University of Central Florida. Early in his career, Chris was a visual effects artist in the film and television industries where he contributed visual effects for films such as *Spider-Man*, *Titanic*, and *The Fifth Element*. Before coming to FIEA, Chris was a CG Supervisor at Electronic Arts, where he worked on video game titles such as *NCAA Football* and *Madden NFL Football*. In addition to teaching, Chris works on generating tools and pipelines for the

creation of immersive experiences: the amalgamation of the narrative of films, the interactivity of video games, and the immersion of theme parks.

World's Best Hobby Dave Bell, W6AQ, 2014-05 World's Best Hobby is an unusual title for a memoir, which is exactly what this book is. It's my life in the fascinating hobby of Amateur Radio. Much of my professional life is spent producing documentary and reality programs for television (including more than a few about Ham Radio) where I learned that the purpose of a title is to attract an audience and if it was also true, all the better. The challenge with documentary films is to make them entertaining first and foremost, and informational if possible. I've tried very hard to make this book entertaining, and from feedback I've gotten (from Hams and wannabee Hams who found it posted online as I was writing it) I've succeeded, at least to some extent. I tried to make the book fun because Ham Radio is fun. And Ham Radio has more facets than a cheap diamond, as you'll discover as you dig into World's Best Hobby. Enjoy! PS. Let me know what you think of World's Best Hobby - especially if you like it. 73, Dave Bell, W6AQ

Magical Explorer, Vol. 5 (light novel) Iris, 2023-07-18 TWO LITTLE SISTERS, ONE HAPLESS DUDE When Kousuke's classmate Gabby gets word that she's been appointed assistant vice minister of the Ceremonial Committee, she's so scandalized that she challenges him (and Yuika) to a dungeon clearing race where the losers have to step down from their positions. Despite the high stakes, Kousuke agrees to her terms when he realizes he can use the knowledge of Gabby's up bringing he gleaned from the game to ensure she goes down the right path. But does Kousuke really have what it takes to stave off the sadness and insecurity weighing on Gabby's heart?

Absorption and Scattering of Light by Small Particles

Craig F. Bohren, Donald R. Huffman, 2008-09-26 Absorption and Scattering of Light by Small Particles Treating absorption and scattering in equal measure, this self-contained, interdisciplinary

study examines and illustrates how small particles absorb and scatter light. The authors emphasize that any discussion of the optical behavior of small particles is inseparable from a full understanding of the optical behavior of the parent material-bulk matter. To divorce one concept from the other is to render any study on scattering theory seriously incomplete. Special features and important topics covered in this book include: * Classical theories of optical properties based on idealized models * Measurements for three representative materials: magnesium oxide, aluminum, and water * An extensive discussion of electromagnetic theory * Numerous exact and approximate solutions to various scattering problems * Examples and applications from physics, astrophysics, atmospheric physics, and biophysics * Some 500 references emphasizing work done since Kerker's 1969 work on scattering theory * Computer programs for calculating scattering by spheres, coated spheres, and infinite cylinders

Giving Bodies Back to Data Silvia Casini, 2021-08-03 An examination of the bodily, situated aspects of data-visualization work, looking at visualization practices around the development of MRI technology. Our bodies are scanned, probed, imaged, sampled, and transformed into data by clinicians and technologists. In this book, Silvia Casini reveals the affective relations and materiality that turn data into image--and in so doing, gives bodies back to data. Opening the black box of MRI technology, Casini examines the bodily, situated aspects of visualization practices around the development of this technology. Reframing existing narratives of biomedical innovation, she emphasizes the important but often overlooked roles played by aesthetics, affectivity, and craft practice in medical visualization. Combining history, theory, laboratory ethnography, archival research, and collaborative art-science, Casini retrieves the multiple presences and agencies of bodies in data visualization, mapping the traces of scientists' body work and embodied imagination. She presents an in-depth ethnographic study of MRI development at the University of Aberdeen's biomedical physics laboratory, from the construction of the first whole-body scanner for clinical purposes through the evolution of the FFC-MRI. Going beyond her original focus on MRI, she analyzes a selection of neuroscience- or biomedicine-inspired interventions by artists in media ranging from sculpture to virtual reality. Finally, she presents a methodology for designing and carrying out small-scale art-science projects, describing a collaboration that she herself arranged, highlighting the relational and aesthetic-laden character of data that are the product of craftsmanship and affective labor at the laboratory bench.

The Varieties of Magical Experience Lynne L. Hume

Ph.D., Nevill Drury, 2013-01-24 A rare combination of personal and academic, this book showcases the myriad avenues for transcending the boundaries of reality through direct sensory experience. *The Varieties of Magical Experience: Indigenous, Medieval, and Modern Magic* provides a comprehensive volume that examines magic in all its aspects. Through detailed case studies, verbatim accounts of personal experiences, and first-hand experience from the authors' own active participation in many alternative religious rituals and ceremonies, this unique book reveals how magic can be a universal phenomenon that crosses cultural, historical, and spatial boundaries. The work is organized in five sections that embrace several broad themes: indigenous magical and shamanic practices; medieval witchcraft; sorcery and hermetic magic; and contemporary Western magical practices, including the role of sexuality, trance, and meditation. The introductory section explores the idea of magic, other realities, and the employment of all the senses, while the final section discusses contemporary issues of ecology and cybermagic. The authors give voice to the powerful emotions and feelings that result from a magical encounter, providing engaging and accessible information to general readers, while those well versed in the opaque world of magic and occultism, consciousness studies, and imaginal and disembodied realms will appreciate the book's content at a deeper level.
