Poetry Unbound Mike Chasar, 2020-04-28 It's become commonplace in contemporary culture for critics to proclaim the death of poetry. Poetry, they say, is no longer relevant to the modern world, mortally wounded by the emergence of new media technologies. In *Poetry Unbound*, Mike Chasar rebuts claims that poetry has become a marginal art form, exploring how it has played a vibrant and culturally significant role by adapting to and shaping new media technologies in complex, unexpected, and powerful ways. Beginning with the magic lantern and continuing through the dominance of the internet, Chasar follows poetry's travels off the page into new media formats, including silent film, sound film, and television. Mass and nonprint media have not stolen poetry's audience, he contends, but have instead given people even more ways to experience poetry. Examining the use of canonical as well as religious and popular verse forms in a variety of genres, Chasar also traces how poetry has helped negotiate and legitimize the cultural status of emergent media. Ranging from *Citizen Kane* to *Leave It to Beaver* to best-selling Instapoet Rupi Kaur, this book reveals poetry's ability to find new audiences and meanings in media forms with which it has often been thought to be incompatible. Illuminating poetry's surprising multimedia history, *Poetry Unbound* offers a new paradigm for understanding poetry's still evolving place in American culture.

Persian Carpets Mino Moallem, 2018-05-16 *Persian Carpets: the Nation As a Transnational Commodity* tracks the Persian carpet as an exotic and mythological object, as a commodity, and as an image from mid-nineteenth-century England to contemporary Iran and the Iranian diaspora. Following the journey of this single object, the book brings issues of labor into conversation with the politics of aesthetics. It focuses on the carpet as a commodity which crosses the boundaries of private and public, religious and secular, culture and economy, modern and traditional, home and diaspora, and art and commodity to tell the story of transnational interconnectivity. Bringing transnational feminist cultural studies, ethnography, and network studies within the same frame of reference, this book sheds light on Orientalia as civilizational objects that emerged as commodities in the encounter between the West and the many directly or indirectly colonized Middle Eastern and West Asian cultures, focusing on the specific example of Persian carpets as some of the most extensively valued and traded objects since colonial modernity.

Assessment in Game-Based Learning Dirk Ifenthaler, Deniz Eseryel, Xun Ge, 2012-06-13 The capabilities and possibilities of emerging game-based learning technologies bring about a new perspective of learning and instruction. This, in turn, necessitates alternative ways to assess the kinds of learning that is taking place in the virtual worlds or informal settings. accordingly, aligning learning and assessment is the core for creating a favorable and effective learning environment. The edited volume will cover the current state of research, methodology, assessment, and technology of game-based learning. There will be contributions from international distinguished researchers which will present innovative work in the areas of educational psychology, educational diagnostics, educational technology, and learning sciences. The edited volume will be divided into four major

parts.

Software and Mind Andrei Sorin, 2013-01-01 Addressing general readers as well as software practitioners, *Software and Mind* discusses the fallacies of the mechanistic ideology and the degradation of minds caused by these fallacies. Mechanism holds that every aspect of the world can be represented as a simple hierarchical structure of entities. But, while useful in fields like mathematics and manufacturing, this idea is generally worthless, because most aspects of the world are too complex to be reduced to simple hierarchical structures. Our software-related affairs, in particular, cannot be represented in this fashion. And yet, all programming theories and development systems, and all software applications, attempt to reduce real-world problems to neat hierarchical structures of data, operations, and features. Using Karl Popper's famous principles of demarcation between science and pseudoscience, the book shows that the mechanistic ideology has turned most of our software-related activities into pseudoscientific pursuits. Using mechanism as warrant, the software elites are promoting invalid, even fraudulent, software notions. They force us to depend on generic, inferior systems, instead of allowing us to develop software skills and to create our own systems. Software mechanism emulates the methods of manufacturing, and thereby restricts us to high levels of abstraction and simple, isolated structures. The benefits of software, however, can be attained only if we start with low-level elements and learn to create complex, interacting structures. Software, the book argues, is a non-mechanistic phenomenon. So it is akin to language, not to physical objects. Like language, it permits us to mirror the world in our minds and to communicate with it. Moreover, we increasingly depend on software in everything we do, in the same way that we depend on language. Thus, being restricted to mechanistic software is like thinking and communicating while being restricted to some ready-made sentences supplied by an elite. Ultimately, by impoverishing software, our elites are achieving what the totalitarian elite described by George Orwell in *Nineteen Eighty-Four* achieves by impoverishing language: they are degrading our minds.

Remediating Region Gina Caison, Lisa Hinrichsen, Stephanie Rountree, 2021-12-08 Rather than a media history of the region or a history of southern media, *Remediating Region: New Media and the U.S. South* formulates a critical methodology for studying the continuous reinventions of regional space across media platforms. This innovative collection demonstrates that structures of media undergird American regionalism through the representation of a given geography's peoples, places, and ideologies. It also outlines how the region answers back to the national media by circulating ever-shifting ideas of place via new platforms that allow for self-representation outside previously sanctioned media forms. *Remediating Region* recognizes that all media was once new media. In examining how changes in information and media modify concepts of region, it both articulates the virtual realities of the twenty-first-century U.S. South and historicizes the impact of "new" media on a region that has long been mediated. Eleven essays examine media moments ranging from the nineteenth century to the present day, among them Frederick Douglass's utilization of early photography, video game representations of a late capitalist landscape, rural queer communities' engagement with social media platforms, and contemporary technologies focused on

revitalizing Indigenous cultural practices. Interdisciplinary in scope and execution, *Remediating Region* argues that on an increasingly networked planet, concerns over the mediated region continue to inform how audiences and participants understand their entrée into a global world through local space.

Uncanny Fidelity James Newlin, 2023 In the field of adaptation studies today, the idea of reading an adapted text as faithful or unfaithful to its original source strikes many scholars as too simplistic, too conservative, and too moralizing. In *Uncanny Fidelity: Recognizing Shakespeare in Twenty-First Century Film and Television*, James Newlin broadens the scope of fidelity beyond its familiar concerns of plot and language. Drawing upon Sigmund Freud's model of the Uncanny-the sudden sensation of peculiar, disconcerting familiarity-this book focuses on films and series that do not self-identify as adaptations of Shakespeare, but which invoke lost, even troubling aspects of the original. In doing so, Newlin demonstrates how the study of Shakespeare's afterlife can clarify both the historical context of his drama and its relevance for the current political moment. Modeling his new approach to the critical category of fidelity, Newlin closely examines four twentieth-century films and tv series next to their Shakespearean counterparts within the contexts of their casting, genre, and reception. When a director of an unconventional version of *The Tempest*, for example, chooses to cast a white man as either Caliban or Miranda, they seemingly depart from Shakespeare's original text. Yet with these casting decisions, Newlin argues that *The Master* (2012) and *Brigsby Bear* (2017) eerily recall the realities of the early modern theater. *The Master* unexpectedly depicts something like the mythic wild man figure that informed *The Tempest*'s early-colonial context, while *Brigsby Bear* invokes the exploitative, abusive treatment of boy-actors cast in female roles on the renaissance stage. Similarly, by not explicitly identifying as an adaptation of *Othello*, the cult comedy series *Vice Principals* (2016-17) frees itself to more faithfully capture the play's early modern comic context - while also illuminating the parallels between racist discourse in Shakespeare's age and our own. By reading these works as uncannily faithful adaptations, Newlin articulates something like the original response of Shakespeare's audience. Finally, Newlin demonstrates how a filmed adaptation might itself intervene in Shakespeare's critical reception. As a version of *The Winter's Tale* that ends tragically, the celebrated film *Manchester By The Sea* (2016) effectively rebuts Stanley Cavell's celebrated reading of Shakespeare's romance. Recognizing the parallels between *Manchester By The Sea* and *The Winter's Tale*, Newlin argues that Shakespeare views grief and guilt as forms of certainty - in contradistinction to Cavell's reading of the play as a portrait of skepticism. The first extended treatment of adaptation as a form of uncanny return, *Uncanny Fidelity* offers students and scholars of Shakespeare in film, adaptation studies, film studies, and psychoanalytic theory a critical framework to further engage the matter of personal response with deeper theoretical rigor. In redefining what constitutes adaptation, Newlin demonstrates how the study of Shakespeare's afterlife can radically challenge our own conception of what we consider to be authentically Shakespearean--

Digital Theatre Nadja Masura, 2020-10-21 Digital Theatre is a rich and varied art form evolving between performing bodies gathered together in shared space and the ever-expanding flexible reach of the digital

technology that shapes our world. This book explores live theatre performances which incorporate video projection, animation, motion capture and triggering, telematics and multisite performance, robotics, VR, and AR. Through examples from practitioners like George Coates, the Gertrude Stein Repertory Theatre, Troika Ranch, David Saltz, Mark Reaney, The Builder's Association, and ArtGrid, a picture emerges of how and why digital technology can be used to effectively create theatre productions matching the storytelling and expressive needs of today's artists and audiences. It also examines how theatre roles such as director, actor, playwright, costumes, and set are altered, and how ideas of body, place, and community are expanded.

Remediating Sound Holly Rogers,Joana Freitas,João Francisco Porfírio,2023-09-07 Remediating Sound studies the phenomena of remixing, mashup and recomposition: forms of reuse and sampling that have come to characterise much of YouTube's audiovisual content. Through collaborative composition, collage and cover songs to reaction videos and political activism , users from diverse backgrounds have embraced the democratised space of YouTube to open up new and innovative forms of sonic creativity and push the boundaries of audiovisual possibilities. Observing the reciprocal flow of influence that runs between various online platforms, 12 chapters position YouTube as a central hub for the exploration of digital sound, music and the moving image. With special focus on aspects of networked creativity that remain overlooked in contemporary scholarship, including library music, memetic media, artificial intelligence, the sonic arts and music fandom, this volume offers interdisciplinary insight into contemporary audiovisual culture.

Life-Like Characters Helmut Prendinger,Mitsuru Ishizuka,2004-01-22 Life-like characters is one of the most exciting technologies for human-computer interface applications today. They convincingly take the roles of virtual presenters, synthetic actors and sales personas, teammates and tutors. A common characteristic underlying their life-likeness or believability as virtual conversational partners is computational models that provide them with affective functions such as synthetic emotions and personalities and implement human interactive behavior. The wide dissemination of life-like characters in multimedia systems, however, will greatly depend on the availability of control languages and tools that facilitate scripting of intelligent conversational behaviour. This book presents the first comprehensive collection of the latest developments in scripting and representation languages for life-like characters, rounded off with an in-depth comparison and synopsis of the major approaches. Introducing toolkits for authoring animated characters further supports the ease of use of this new interface technology. Life-like characters being a vibrant research area, various applications have been designed and implemented. This book offers coverage of the most successful and promising applications, ranging from product presentation and student training to knowledge integration and interactive gaming. It also discusses the key challenges in the area and provides design guidelines for employing life-like characters.

Multimodal Literacies Across Digital Learning Contexts Maria Grazia Sindoni,Ilaria Moschini,2021-11-29 This collection critically considers the question of how learning and teaching should be conceived, understood, and approached in light of the changing nature of learning scenarios and new pedagogies in this current age of multimodal digital texts, practices, and communities. The book takes the concept of digital artifacts as being composed of multiple meaning-making semiotic resources, such as visuals, music, and design, as its point of departure to explore how diverse communities interact with these tools and develop and explore their understanding of digital practices in learning contexts. The first section of the volume examines different case studies in which involved participants learn to grapple with the introduction of digital tools for learning in children's early years of schooling. The second section extends the focus to secondary and higher education settings as digital learning tools grow more complex as do students, parents, and teachers' interactions with them and the subsequent need for new pedagogies to rethink these multimodal artifacts. A final section reflects on the implications of new multimodal tools, technologies, and pedagogies for teachers, such as on teacher training and community building among educators. In its in-depth look at multimodal approaches to learning as meaning-making in a digital world, this book will be of interest to students and scholars in multimodality, English language teaching, digital communication, and education.

Souls for Sale Terry Lindvall,2021-07-09 The beginning of the twentieth century evolved out of an era of

Freethinking atheists and agnostics who challenged the Protestant hegemony of the day. Key among these mavericks was author and filmmaker Rupert Hughes, uncle to Howard Hughes. In 1922, Hughes published *Souls for Sale*, his wickedly playful satire of the Bible belt and Hollywood, offering a mischievous snapshot of the film industry as it struggled against a conservative Zeitgeist. The novel follows the prodigal adventures of a clergyman's daughter as she stumbles into the movie industry and finds it to be a new and liberating moral universe. Hughes's adaptation of his sly work challenged the religious hierarchy of his day, but ultimately fell by the wayside, even with the support of Hollywood icons like Eric von Stroheim and Charlie Chaplin. *Souls for Sale* offers a glimpse into the emerging Jazz age of moviemaking against the backdrop of a country moving from its traditional roots into the kinetic ways of Hollywood.

The Image of the Puppet in Italian Theater, Literature and Film Federico Pacchioni, 2022-07-21 With the advancement of cybernetics, avatars, animation, and virtual reality, a thorough understanding of how the puppet metaphor originates from specific theatrical practices and media is especially relevant today. This book identifies and interprets the aesthetic and cultural significance of the different traditions of the Italian puppet theater in the broader Italian culture and beyond. Grounded in the often-overlooked history of the evolution of several Italian puppetry traditions – the central and northern Italian stringed marionettes, the Sicilian pupi, the glove puppets of the Po Valley, and the Neapolitan Pulcinella – this study examines a broad spectrum of visual, cinematic, literary, and digital texts representative of the functions and themes of the puppet. A systematic analysis of the meanings ascribed to the idea and image of the puppet provides a unique vantage point to observe the perseverance and transformation of its deeper associations, linking premodern, modern, and contemporary contexts.
