Fun Learning Activities for Modern Foreign Languages Jake Hunton, 2014-03-26 Students learning modern foreign languages often comment that it is just too hard to learn, and remember, all of vocabulary presented to them. Yes, there is a lot of content that needs to be covered, and a lot of vocabulary that needs to be learned. But there is a way of making this process engaging and motivating. Language lessons needn't be full of grammar worksheets, endless drilling and rote learning lists of vocabulary. Learning languages isn't always fun and games. But these aren't games; they are fun learning activities. And they can help revolutionise language teaching; enabling teachers to authoritatively impart knowledge while fostering a thirst for knowledge and love of learning in their students. First, the Vocab Fun Learning Activities (VFLAs) learn the vocabulary in ways which will improve recognition and recall. Then, the Fun Learning Activities use this vocabulary knowledge to build sentences and paragraphs; explore and use this language while keeping the whole class engaged and actively learning. The activities are designed to encourage all students to participate and learn more through enjoyment. Based on the author's extensive classroom experience, and underpinned by research into how students learn best, each activity comes complete with a detailed explanation and plenty of ideas for variations, differentiations and extensions. The activities come with example vocabulary lists in French, German and Spanish as a starting point, which are all available for download via a link provided in the book. However, the activities will work effectively in any language and with any vocabulary list of the teacher's choosing, and can be adapted to suit every

topic, learning objective and age range. Discover ready to use activities which will make for outstanding lessons in every class and ensure engagement, motivation, rapport, progress and attainment over time.

Exam Literacy Jake Hunton, 2018-08-13 In *Exam Literacy: A guide to doing what works (and not what doesn't)* to better prepare students for exams, Jake Hunton focuses on the latest cognitive research into revision techniques and delivers proven strategies which actually work. Foreword by Professor John Dunlosky. 'Read, highlight, reread, repeat if such a revision cycle sounds all too wearily familiar, you and your students need a better route to exam success. And in light of the recent decision to make all subjects at GCSE linear, so that students will be tested in one-off sittings, it will be even more important that students are well equipped to acquire and recall key content ahead of their exams. In this wide-ranging guide to effective exam preparation, Jake Hunton casts a careful eye over a wide range of research into revision techniques and details the strategies which have been proven to deliver the best results. With plenty of practical suggestions and subject-specific examples, *Exam Literacy* provides teachers with user-friendly advice on how they can make the content they cover stick, and shares up-to-date, evidence-based information on: - The nature of learning and the various types of memory. - How to improve students' retention of knowledge and recall of content. - Why popular revision techniques, such as rereading, highlighting and summarising, may not be as effective as you think. - How revision strategies that have been identified as being more effective such as interleaving, elaborative interrogation, self-explanation and retrieval practice can be embedded into day-to-day teaching. - How students can be encouraged to make use of these winning strategies when revising independently.

Facilitation Skills for Ministry Jo Whitehead, 2013-08-15 This book is designed for those who wish to encourage and empower through their leadership skills. Facilitation is about managing process - drawing people in, enabling them to contribute and holding the boundaries and values of a context to create a safe and productive place. Many ministry training courses do not teach facilitation skills per se and ministers are often left to learn on the job. Some become effective facilitators through reflection on their practice, others develop tacit skills. Many others flounder when it comes to facilitating effectively and participatively. In a culture where ministry roles increasingly involve community involvement and working with congregations who expect to participate in decision making and ministry, this skill set is one that is increasingly needed. This is particularly important in pioneer contexts where a more team-based approach is the norm.
