**11+ Guide to Figurative Language (Revised)** Elaine C. R. Heckingbottom, 2016-07-31 Aimed particularly at parents in the CSSE region who want to help their child to achieve the 'magic score' which will result in them being allocated a place at their chosen selective school! In today's increasingly competitive society, preparation for the 11+ has become incredibly tough, whichever education authority area you live in. For these children, it involves studying many concepts that they will not have faced before. Many of the questions are extremely hard, and not all the elements of the exam can be fully prepared for; however, even in the areas of the country where they now claim the exams cannot be 'tutored', there are still many tools that you can give your children to help their preparation - and one of those tools is a knowledge of the different aspects of Figurative Language. Introducing metaphors and similes, personification and pathetic fallacy, alliteration, idioms, onomatopoeia, hyperbole, irony and oxymoron in a way that they will be easily remembered, this book is a great introduction to Figurative Language for children from Upper Key Stage 2 to the end of Key Stage 3 (9 to 14 year olds)

*Resident Duty Hours* Institute of Medicine, Committee on Optimizing Graduate Medical Trainee (Resident) Hours and Work Schedules to Improve Patient Safety, 2009-04-27 Medical residents in hospitals are often required to be on duty for long hours. In 2003 the organization overseeing graduate medical education adopted common program requirements to restrict resident workweeks, including limits to an average of 80 hours over 4 weeks and the longest consecutive period of work to 30 hours in order to protect patients and residents from unsafe conditions resulting from excessive fatigue. *Resident Duty Hours* provides a timely examination of how those requirements were implemented and their impact on safety, education, and the training institutions. An in-depth review of the evidence on sleep and human performance indicated a need to increase opportunities for sleep during residency training to prevent acute and chronic sleep deprivation and minimize the risk of fatigue-related errors. In addition to recommending opportunities for on-duty sleep during long duty periods and breaks for sleep of appropriate lengths between work periods, the committee also recommends enhancements of supervision, appropriate workload, and changes in the work environment to improve conditions for safety and learning. All residents, medical educators, those involved with academic training institutions, specialty societies, professional groups, and consumer/patient safety organizations will find this book useful to advocate for an improved culture of safety.
