**Headaches in Women** Mark Green,2019-10-01 Women suffer from headaches far more than men. According to the World Health Organization, migraine is one of the most disabling medical conditions. The understanding of the pathophysiology of migraine has changed dramatically over the past decade, leading to more rational and targeted treatments. Since most migraineurs are young women, use of contraception, management of headaches with menstruation, pregnancy, lactation, and menopause are important issues addressed in this text. Headaches are often inherited, and, as such, the book also discusses genetic issues, particularly relevant in this era of customized medicine. The hormonal management of transgenders is important as many will experience severe headaches during their transitions. Comorbidities, including psychiatric syndromes and strokes, are also presented in detail. This text will be of interest to all practitioners who manage women with headaches.

**Cognition** Mark H. Ashcraft,Gabriel A. Radvansky,2013-07-23 For undergraduate level courses in Cognition and Theories of Learning. The psychology of human memory and cognition is fascinating, dealing with questions and ideas that are inherently interesting, such as how we think, reason, remember, and use language. Using a first person narrative, posing direct questions to the reader, and balancing classic research with cutting edge topics, the author draws in the reader and conveys the excitement of the field. Reflecting the increasing use of new technologies to study memory and cognition, Ashcraft and the new co-author, Gabriel Radvansky, continue to integrate sections on neurosciences within individual chapter topics.
