Missing Middle Housing Daniel G. Parolek, 2020-07-14 Today, there is a tremendous mismatch between the available housing stock in the US and the housing options that people want and need. The post-WWII, auto-centric, single-family-development model no longer meets the needs of residents. Urban areas in the US are experiencing dramatically shifting household and cultural demographics and a growing demand for walkable urban living. Missing Middle Housing, a term coined by Daniel Parolek, describes the walkable, desirable, yet attainable housing that many people across the country are struggling to find. Missing Middle Housing types—such as duplexes, fourplexes, and bungalow courts—can provide options along a spectrum of affordability. In *Missing Middle Housing*, Parolek, an architect and urban designer, illustrates the power of these housing types to meet today's diverse housing needs. With the benefit of beautiful full-color graphics, Parolek goes into depth about the benefits and qualities of Missing Middle Housing. The book demonstrates why more developers should be building Missing Middle Housing and defines the barriers cities need to remove to enable it to be built. Case studies of built projects show what is possible, from the Prairie Queen Neighborhood in Omaha, Nebraska to the Sonoma Wildfire Cottages, in California. A chapter from urban scholar Arthur C. Nelson uses data analysis to highlight the urgency to deliver Missing Middle Housing. Parolek proves that density is too blunt of an instrument to effectively regulate for twenty-first-century housing needs. Complete industries and systems will have to be rethought to help deliver the broad range of Missing Middle Housing needed to meet the demand, as this book shows. Whether you are a planner, architect, builder, or city leader, *Missing Middle Housing* will help you think differently about how to address housing needs for today's

communities.

Developing Strategic Marketing Plans that Really Work Terry Kendrick, 2006 Public libraries are increasingly aware of the need for good marketing. Underlying this is a need for competence in marketing planning. Many government and other reports stress the need to get public libraries back into the lives of their users and potential users and this requires significant marketing effort. However, it quickly becomes apparent to public librarians that marketing is far more than simply creating a set of leaflets for their marketing communications. What they need is a simple, practical guide to the whole marketing planning process from goals to implementation of marketing strategies and communications. And along the way they need to troubleshoot the barriers that such activities meet. This highly practical and down-to-earth book, with free downloadable templates and forms on the web, will de-mystify the marketing planning process and set it in the context of modern public library services. Through a series of easy to implement process steps and ideas the reader will see not just what is possible but what is likely to work quickly, and deliver real impact on performance indicators, in a public library context. The book is structured as follows: strategic marketing planning for public libraries: an introduction ambition as the basis for marketing planning making sense of the market for your public library services creating segment-specific value propositions for users and non-users priorities: making sound choices clear objectives and winning strategies attention-

grabbing marketing communications implementation and quick progress. Readership: The text is fully international in scope and is written for all those practitioners who recognize the importance of marketing in shaping and positively influencing the direction of public library services.
