  INSPIRATIONAL STORIES OF THE VISUALLY CHALLENGED Plus RESOURCES Margaret Phalor Barnhart,2019-04-28 According to the National Eye Institute by 2020 it is estimated that 5.5 million people of all ages will be blind or have low vision. Low vision is impairment that cannot be corrected by standard eyeglasses, contact lenses, medication, or surgery. That is 1 out of 28 and that is shocking. We also have a diabetes epidemic that can lead to diabetic retinopathy. Is the world ready? I don't think so. Are you aware of what this might mean to you?The purpose of this book is to let readers know that loss of eyesight is not a death sentence. Twelve people have shared their stories detailing how they met the enemy in their own lives and how they cope on a day-to-day basis. Some of them were born blind or became blind after a period of normal sight. Others have slowly lost vision and have learned to cope at different stages. Emotions play a major part in this experience and reading how others dealt with anger and depression helps the newcomers know they are not alone.The book began as a tribute to my husband who became instantly blind at the age of 10. When we married I entered his world and became a part of the low vision community. It is in Tucson, Arizona where I met the folks who graciously shared their stories with me. They detail not just the physical facts, but the emotional turmoil that took over when they were first told they had low vision that could not be restored with eyeglasses; or, they were blind or would gradually become so. Including Resources, Organizations and Definitions, along with the Stories makes this book useful to much of the population and particularly to those over the age of 60.I believe people who are already experiencing low vision will find this book valuable because of the sense of support they

find in the Stories, and Resources they might not be aware of.The book should be in libraries where it will be one of a kind. Lions Clubs that focus their volunteer work with collecting and distributing eyeglasses and conducting vision screenings will benefit from this book. Many have members who are blind as does Tucson Rincon Lions Club. Sellers of vision equipment will want to stock this book. Ophthalmologists could buy in bulk to hand to their patients at the time of diagnosis or worsening eyesight. I think bookstores will want this on their shelves so it can be available to all. It will be available on Amazon as paperback, e-book and audio. Inspirational Stories of the Visually Challenged plus Resources might not be something you need, but think about someone you know, be it family, friend or co-worker. I think you will be thanked profusely. It would benefit someone considering purchasing this book if you would take time to write a brief review on Amazon and Goodreads so others know the value of this book.

Security Challenges and Approaches in Internet of Things Sridipta Misra,Muthucumaru Maheswaran,Salman Hashmi,2016-09-03 This book provides a comprehensive survey of the security and privacy research advancements in Internet of Things (IoT). The book lays the context for the discussion by introducing a system model for IoT. Since IoT is very varied and has been introduced in many different contexts, the system model introduced plays a crucial role in integrating the concepts into a coherent framework. After the system model, the book introduces the vulnerable features of the IoT. By providing a comprehensive discussion of the vulnerable features, the book highlights the problem areas of IoT that should be studied concerning security and privacy. Using the vulnerable features as a motivation, the book presents a vast survey of existing security and

privacy approaches for IoT. The survey is a good way for the reader to pick up interesting directions of research that have already been explored and also hints at directions that could take additional investigation. Finally, the book presents four case studies that provide a detailed view of how some of the security and privacy concerns are addressed in specific problem areas.

A History of Gold and Money, 1450 to 1920 Pierre Vilar,1991 For much of human history, the motive force behind war, conquest, social conflict and world exploration has been the drive to acquire gold. From the ancient world of Croesus to the wealthy dynasties of Renaissance Italy, from the earliest European explorations into Africa, America, and Asia to the gold rushes of the nineteenth century and the banking crises that lay beyond them, Pierre Vilar depicts the awesome power of avarice to structure the world in which we live. The insidious power of gold and money is the subject of this enlightening and entertaining history. The age of exploration brought an influx of treasure into Western Europe, prompting disputes between theologians and early economists over the causes of inflation in the sixteenth century. In time, American silver distorted metropolitan Spanish society beyond recognition. Vilar goes on to examine the roots of the modern banking and financial systems in institutions founded in Holland, England and France during the seventeenth and eighteenth centuries. And in the nineteenth century, the gold rushes of Australia, California and South Africa generated new modifications in the international monetary system. Vilar concludes the story of these developments with a discussion of the crisis of the 1920s that, in the wake of the world credit crash of 2008, is more pertinent than ever. A History of Gold and Money provides a unique work of synthesis on the role of money in modern economic history.

Arsenals of a Democratic Culture Sidney Ditzion,2007-03 PREFACE. THE Author of this very

practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank shects for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when me say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is depend- ent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream- fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is

either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...
