Harrod's Librarians' Glossary and Reference Book
Ray Prytherch,2016-04-15 Listing over 10,000
entries, Harrod's Librarians' Glossary and
Reference Book spans everything from traditional
printing terms to search engines and from book
formats to URLs. Revisions for this tenth edition
have centred in particular on the Information
Society and its ramifications, on the general
shift towards electronic resources, and on e-
commerce, e-learning and e-government, whilst at
the same time maintaining key areas predating the
IT revolution. Web terminology, URLs and IT terms
have been checked and updated, and coverage of
terms relating to digitization and digital
resources, portals, multimedia and electronic
products has been revised or expanded as
necessary. Harrod's Glossary now includes
Knowledge Management terms, and this edition has
also focused on developments in the field of
intellectual property, copyright, patents, privacy
and piracy. It gives wide international coverage
of names, addresses and URLs of major libraries
and other important organizations in the
information sector, of professional associations,
fellowships, networks, government bodies, projects
and programmes, consortia and institutions,
influential reports and other key publications.
Entries are included on classification and file
coding, on records management and archiving and on
both the latest and the most enduring aspects of
library and information skills. Even with the Web
at your fingertips Harrod's Librarians' Glossary
and Reference Book remains a quicker reference for
explaining specialist terms, jargon and acronyms,
and for finding the URLs you need, whether you are
working in a print-based or digital library, in
archiving, records management, conservation,
bookselling or publishing.

  Airlines and Air Mail F. Robert van der
Linden,2014-07-11 Conventional wisdom credits only
entrepreneurs with the vision to create America's
commercial airline industry and contends that it
was not until Roosevelt's Civil Aeronautics Act of
1938 that federal airline regulation began. In
Airlines and Air Mail, F. Robert van der Linden
persuasively argues that Progressive republican
policies of Herbert Hoover actually fostered the
growth of American commercial aviation. Air mail
contracts provided a critical indirect subsidy and
a solid financial foundation for this nascent
industry. Postmaster General Walter F. Brown used
these contracts as a carrot and a stick to ensure
that the industry developed in the public interest
while guaranteeing the survival of the pioneering
companies. Bureaucrats, entrepreneurs, and
politicians of all stripes are thoughtfully
portrayed in this thorough chronicle of one of
America's most resounding successes, the
commercial aviation industry.

seeing what researchers actually do in particular projects and by incorporating their procedures and strategies into one's own research practice. This is one of the most powerful and pragmatic ways of bringing to bear the range of qualitative methodological perspectives available. The chapters in this important new volume are written by leading, internationally distinguished qualitative researchers who recount and reflect on their own research experiences as well as others, past and present, from whom they have learned. It demonstrates the benefits of using particular methods from the viewpoint of real-life experience. From the outside, good research seems to be produced through practitioners learning and following standard theoretical, empiric

Organizational Information Systems in the Context of Globalization Mikko Korpela,Ramiro Montealegre,Angeliki Poulymenakou,2013-03-09 Organizational Information Systems in the Context of Globalization exemplifies the role of social theory in approaching ICT utilization challenges in a globalization context. The debates raised on implementation, policy, organizations and organizing, and social dynamics, increase our awareness of the diversity of perspectives we need to delve into when framing the role of ICTs in the globalization agenda. The equal representation of managerial and non-managerial decision making contexts alerts us to the fact that ICTs should not be considered only as a corporate wealth creation prerogative. This book contains the selected proceedings of the Working Conference on Information Systems Perspectives and Challenges in the Context of Globalization, sponsored by the International Federation for Information Processing (IFIP) and held in Athens, Greece in June 2003.

Dynamics of Critical Internet Culture (1994–2001) Geert Lovink,2009 This study examines the dynamics of critical Internet culture after the medium opened to a broader audience in the mid 1990s. It is Geert Lovink's PhD thesis, submitted late 2002, written in between his two books on the same topic: Dark Fiber (2002) and My First Recession (2003). The core of the research consists of four case studies of non-profit networks: the Amsterdam community provider, The Digital City (DDS); the early years of the nettime mailinglist community; a history of the European new media arts network Syndicate; and an analysis of the streaming media network Xchange. The research describes the search for sustainable community network models in a climate of hyper growth and increased tensions and conflict concerning moderation and ownership of online communities.

Dark Fiber Geert Lovink,2002 The Internet is being closed off by businesses and governments intent on creating an environment free of dissent. In this text, the author covers concerns and issues of navigation and usability without losing sight of the agenda of those who control hardware, software, content, design and delivery.

Travels in the Scriptorium Paul Auster,2010-11-25 An old man sits in a room, with a single door and window, a bed, a desk and a chair. Each day he awakes with no memory, unsure of whether or not he is locked into the room. Attached to the few objects around him are one-word, hand-written labels, and on the desk is a series of vaguely familiar black-and-white photographs and four piles of paper. Then a middle-aged woman called Anna enters and talks of

9

pills and treatment, but also of love and promises. Who is this Mr Blank, and what is his fate? What does Anna represent from his past – and will he have enough time to ever make sense of the clues that arise? After the huge success of The Brooklyn Follies, his new novel sees Auster return to the metaphysical territory familiar from his enormously influential The New York Trilogy. A dark puzzle, and a game that implicates both reader and writer alike, Travels in the Scriptorium is a mind-altering exploration of language, responsibility and the passage of time. ' Travels in the Scriptorium returns to . . . the nihilistic gaiety of Beckett (in particular Krapp) or the sub-dermal violence of Pinter.' New Statesman
