Guidelines on Firewalls and Firewall Policy Karen Scarfone,2010-03 This updated report provides an overview of firewall technology, and helps organizations plan for and implement effective firewalls. It explains the technical features of firewalls, the types of firewalls that are available for implementation by organizations, and their security capabilities. Organizations are advised on the placement of firewalls within the network architecture, and on the selection, implementation, testing, and management of firewalls. Other issues covered in detail are the development of firewall policies, and recommendations on the types of network traffic that should be prohibited. The appendices contain helpful supporting material, including a glossary and lists of acronyms and abreviations; and listings of in-print and online resources. Illus.

Design and Architecture of SNMP Monitoring System Tauseef Jamal,Muhammad Khan,2015-10-30 Today, the number of networks grows within organization and series of devices such as routers, switches, hubs, hosts, servers and bridges

etc. from different vendors are added to networks over the time. Due to the growth of networks, monitoring and maintenance for coherent network is an important task for network administrators. A network monitoring is considered to be an essential aspect of any network of any size. The importance of cyber security monitoring rises due to large number of cyber-attacks over the networks. The Cyber Security Monitoring System (CSMS) requires efficient methods to detect threats, risks, failures, faults, inappropriate accesses, and alerts over the networks.
