*The Flavonoids* Jeffrey B. Harborne,Helga Marby,T. J. Marby,2013-11-11 The flavonoids, one of the most numerous and widespread groups of natural constituents, are important to man not only because they contribute to plant colour but also because many members (e.g. coumestrol, phloridzin, rotenone) are physiologically active. Nearly two thousand substances have been described and as a group they are universally distributed among vascular plants. Although the anthocyanins have an undisputed function as plant pigments, the raison d'etre for the more widely distributed colourless flavones and flavonols still remains a mystery. It is perhaps the challenge of discovering these yet undiscovered functions which has caused the considerable resurgence of interest in flavonoids during the last decade. This book attempts to summarize progress that has been made in the study of these constituents since the first comprehensive monograph on the chemistry of the flavonoid compounds was published, under the editorship of T. A. Geissman, in 1962. The present volume is divided into three parts. The first section (Chapters 1-4) deals with advances in chemistry, the main emphasis being on spectral techniques to take into account the recent successful applications of NMR and mass spectral measurements to structural identifications. Recent developments in isolation techniques and in synthesis are also covered in this section. Advances in chemical knowledge of individual classes of flavonoid are mentioned inter alia in later chapters of the book.

*The Date Palm* Emirates Center for Strategic Studies and Research,2004-06-18 The date palm has come of age. Cultivated for millennia in the arid regions of the world, from the Atlantic Ocean across North Africa, the importance of the date palm is being rediscovered. Its value as the sustaining pillar of market gardens in marginal agricultural communities cannot be overemphasized. As a tree that has emerged from ancient history into the modern world, the date palm is eliciting a great deal of interest in fields as diverse as biotechnology and international marketing. This book provides expert contributions on the full range of topics pertaining to the date palm, from its archaeology, cultivation and traditional uses, to biotech applications in modern propagation methods and disease control. It provides a thorough overview for any reader wanting to gain insight into this industry, from its ancient roots to its modern day practices.

*The First Discourse of the Buddha* Rewata Dhamma,Revatadhamma (Bhadanta.),1997 After enlightenment, the Buddha delivered his first discourse to five disciples in Deer Park, India. Known as the Four Noble Truths, this lesson forms the foundation and essence of all the Buddha's teachings. It contains all the necessary information and instruction for us to become free from suffering and gain insight into the truth of enlightenment. The First Discourse of the Buddha includes a history of the Buddha's life, background on Buddhism, and a contemporary translation of and commentary on the Four Noble Truths.

*Status Anxiety* Bruce VonCannon,2020-09-17 In this book, retired banking CEO Bruce VonCannon considers the past, present and future of Hong Kong, the dynamic finance-driven autonomous city that is beset by global issues- US-China tension, income inequality, housing scarcity, climate change- within the microcosm of a small island archipelago and a hyper-specific local culture. The Hong Kong Special Administrative Region is today one of the world's foremost economic and financial hubs and a repository for 18% of the world's stored wealth, home to the region's most vibrant stock market, a major free trade port city and traditional gateway to mainland China, the world's 2nd largest economy. The recent street protests which broke out in June 2019 have been described as a pro-democracy movement. However, other analysts disagree and argue that the street protests have more in common with the populist movements springing up in other parts of the world as the result of a growing divide between rich and poor. This book delves into financial realities, Hong Kong's position within the new global competition between China and the United States, and as a model for the urbanization of the future.

**Prospects for Saline Agriculture** R. Ahmad,K.A. Malik,2013-11-09 Saline land is a resource capable of significant production. Recent advances in research in breeding for salt tolerance in wheat, biotechnology in rice, and selection and rehabilitation of salt-tolerant plants are of economic importance in arid/saline conditions. This book gives some practical approaches for saline agriculture and afforestation, and describes examples of cultivating salt-tolerant/halophytic plants for commercial interest on salt-affected land or with highly salinized water in Australia, China, Central Asia, Egypt, Pakistan, and Russia. It also explores the possibilities of arid/saline agriculture and afforestation in UAE.

Domestication of Plants in the Old World Daniel Zohary,Maria Hopf,1988 In this definitive volume, the authors review the origin and subsequent spread of the plants on which Old World food production was founded. Their account is based on the detailed consideration of the plant remains found at archaeological sites and accumulated knowledge about the present-day wild relatives of cultivated plants.

*Salt Marshes and Salt Deserts of the World* Valentine Jackson Chapman, 1960
