From the Mouth of the Mamba William Stegall,2002-04 This operations is based upon author's knowledge of how a Bio-Terrorist operation, with direct leads to the Al Queda Terrorist organization, could have happened. Indeed, there are certain truths mixed in with this story, but it would have been considered classified by both the government of the United States and the Secretary General of the United Nations. 11 September 2001 de-classified this story which began in Nazi Germany and continued into a small remote village in the Congo. There are strong ties into the Vatican, the World Health Organization, and a highly placed terrorist mastermind. The ultimate plot is to spread a deadly disease around the world with almost instant death to the people infected. This trail of terror and the pursuit of those involved will lead from New York City to Africa, Geneva, and culminate in the Caribbean Island of Curacao.

Le Masque des Mots Patrice Joseph Lhoni,2018-06-25 L'usage du proverbe dans la langue courante n'est pas particulièrement caractéristique des langues bantou. Tous les peuples possèdent chacun ses proverbes, cette espèce de sentence qui exprime en peu de mots, et en général sous une forme allégorique, une vérité d'un grand sens ; cette forme aussi vieille que le monde, et qu'on appelle la sagesse des peuples. Mais l'emploi des

proverbes abonde plus qu'ailleurs dans les parler bantu. Des raisons psycho-socio-culturelles expliquent cette abondance. Ne voir donc dans l'emploi du proverbe qu'une simple fantaisie de l'esprit serait fort préjudiciable au dialogue ou à son intelligence.

Geochemistry of Non-Traditional Stable Isotopes Clark M. Johnson,Brian L. Beard,Francis Albarède,2018-12-17 The goal for Volume 55 of Reviews in Mineralogy and Geochemistry was to bring together a summary of the isotope geochemistry of non-traditional stable isotope systems as is known through 2003 for those elements that have been studied in some detail, and which have a variety of geochemical properties. In addition, recognizing that many of these elements are of interest to workers who are outside the traditional stable isotope fields, we felt it was important to include discussions on the broad isotopic variations that occur in the solar system, theoretical approaches to calculating isotopic fractionations, and the variety of analytical methods that are in use. We hope, therefore, that this volume proves to be useful to not only the isotope specialist, but to others who are interested in the contributions that these non-traditional stable isotopes may make toward understanding geochemical and biological cycles. The review chapters in this volume were the basis for a two-day short course on nontraditional stable isotopes held prior (May 15-16, 2004) to the spring AGU/CGU Meeting in Montreal, Canada.
