A Compendium of Armaments and Military Hardware (Routledge Revivals) Christopher Chant,2014-06-03 First published in 1987, The Compendium of Armaments and Military Hardware provides, within a single volume, the salient technical and operational details of the most important weapons. The complete range of hardware used in land, sea and air forces throughout the world at the time of publication is covered, from tanks to rocket systems, helicopters to cruise missiles, alongside full details of size, weight and operational range. The book's main strength lies in the detail it gives of armament and associated ammunition capabilities, and of the sensors and other electronics required for the weapons to be used effectively. A key title amongst Routledge reference reissues, Christopher Chant's important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide, as well as to weapons 'buffs'.

Doc Todd Zolecki,2021-05-25 Nobody's baseball story is like Roy Halladay's.He was born and raised to be a superstar. He was a first-round draft pick in 1995. He nearly threw a no-hitter in his second big-league start in 1998. But two years later, Halladay suffered arguably the worst season by any pitcher in baseball history. He was months away from being out of the game.Hall of Fame pitchers do not struggle like that. But Halladay vowed to change. He altered his pitching mechanics and rewired his brain to become one of the greatest pitchers of all time. How did Doc do it? *Doc: The Life of Roy Halladay* tells the remarkable story; based on more than 100 interviews with Halladay's family, friends, managers, coaches, teammates, and competitors, including extensive interviews with his wife, Brandy; comprehensive archival research; and previously unpublished commentary from Halladay himself. *Doc* not only tells the story of Halladay's illustrious baseball career in Toronto and Philadelphia, but his hard-driven adolescence, his lifelong personal struggles, and his motivation to pay forward the knowledge and philosophies that helped him achieve baseball greatness before his tragic death in 2017.This essential biography is a testimonial for baseball players and pitchers from high school to the big leagues still searching for their path to excellence, like Halladay. It's also a celebration and a profound exploration of a generational pitcher and a beloved teammate, friend, and family man.

Parrots of Africa, Madagascar and the Mascarene Islands Laubscher,Mike Perrin,2012-12-01 Parrots? colour and charisma, coupled with the fact that they mimic human speech, make them fascinating to many people. They are ancient birds with unique bill and foot structures that enable them to forage on fruits in the canopy of forest trees as well as on seeds in grasslands. Because they depend on fruits and seeds all year round, most species are confined to the tropics or sub-tropics, where the world's biodiversity is at its greatest. There are over three hundred species of parrots, of which more than one hundred are recognised as rare, endangered, vulnerable or threatened with extinction. Parrots are largely distributed in tropical areas of developing countries where economies are weak and uncertain, and where there is great dependence on the exploitation of natural resources, particularly hard wood evergreen forests, which are preferred parrot habitats. Unfortunately, high levels of corruption are common to these regions, with much illegal trade in animals and little or no law enforcement. Collectors of parrots in the first world pay huge sums for rare parrots. However, research, education and conservation actions are greatly reducing illegal trade in African parrots. This book provides complete coverage of all aspects of the biology of extant African, Malagasy and Mascarene parrots, and reviews our knowledge of extinct and fossil parrots from the region. Particular themes include the behavioural and ecological characteristics of parrots, their species characteristics and conservation biology. Current concepts in avian and conservation biology are also discussed. *Parrots of Africa, Madagascar and the Mascarene Islands* is aimed at ornithologists, conservation biologists, avian ecologists, academics, bird watchers and parrot fans alike. It is well illustrated, with high quality original photographs, and includes distribution maps, figures and tables.

The Letters of Gertrude Stein and Carl Van Vechten, 1913-1946 Gertrude Stein,Carl Van Vechten,2013 This monumental collection of correspondence between Gertrude Stein and critic, novelist, and photographer Carl Van Vechten provides crucial insight into Stein's life, art, and artistic milieu as well as Van Vechten's support of major cultural projects, such as the Harlem Renaissance. From their first meeting in 1913, Stein and Van Vechten formed a unique and powerful relationship, and Van Vechten worked vigorously to publish and promote Stein's work. Existing biographies of Stein--including her own autobiographical writings--omit a great deal about her experiences and thought. They lack the ordinary detail of what Stein called daily everyday living: the immediate concerns, objects, people, and places that were the grist for her writing. These letters not only vividly represent those details but also showcase Stein and Van Vechten's private selves as writers. Edward Burns's extensive annotations include detailed cross-referencing of source materials.

Care of the Critically Ill Patient J. Tinker,M. Rapin,2013-04-17 During the past decade there has been a considerable expansion in the understanding, assessment and treatment of critically ill patients. An attempt to portray our present knowledge of this diverse field in a comprehensive textbook is therefore a formidable and daunting undertaking. However, many colleagues in different disciplines and from different countries convinced us of the need for such a work and, greatly encouraged by their interest, we embarked upon the project. Any single text, even a very long one, cannot cover every aspect of critical illness. Our first task was, therefore, to define those areas of the subject that had to be included. This we did on a systematic basis, and although the final emphasis of the book is very largely directed to clinical matters, we felt it pertinent to include in some detail accounts of relevant physiology and technology. *Care of the Critically Ill Patient* is divided into twelve sections, each concerned with major facets of critical illness; each of the sixty-eight chapters includes a topical and often extensive bibliography. The many chosen contributors form an international group of specialists whose combined expertise embraces the topics that we have selected.

Geochemistry of Non-Traditional Stable Isotopes Clark M. Johnson,Brian L. Beard,Francis Albarède,2018-12-17 The goal for Volume 55 of Reviews in Mineralogy and Geochemistry was to bring together a summary of the isotope geochemistry of non-traditional stable isotope systems as is known through 2003 for those elements that have been studied in some detail, and which have a variety of geochemical properties. In addition, recognizing that many of these elements are of interest to workers who are outside the traditional stable isotope fields, we felt it was important to include discussions on the broad isotopic variations that occur in the solar system, theoretical approaches to calculating isotopic fractionations, and the variety of analytical methods that are in use. We hope, therefore, that this volume proves to be useful to not only the isotope specialist, but to others who are interested in the contributions that these non-traditional stable isotopes may make toward understanding geochemical and biological cycles. The review chapters in this volume were the basis for a two-day short course on nontraditional stable isotopes held prior (May 15-16, 2004) to the spring AGU/CGU Meeting in Montreal, Canada.
