Management Fashions Krzysztof Klincewicz,2017-07-28 Using the theory of management fashions proposed in the 1990s by Eric Abrahamson, Krzysztof Klincewicz analyzes the changing popularity of management concepts accompanied by solutions. Among these are management bestsellers, consulting services, software systems, methodologies, and approaches to organizational change, training courses, professional certifications and even new corporate positions.The book presents the phenomena of management fashions as being the key driver for the development of the management knowledge industry, consisting of consulting companies, computer firms, publishing houses, professional institutes, and other organizations involved in the launching and the promotion of new management techniques. The author supplements the existing body of knowledge by focusing on the supply-side of management fashions, particularly the strategies and marketing techniques of solution vendors, and proposes a model of relations between management ideas and tangible solutions,

explaining how bestselling ideas are turned into objects and institutions.The empirical research described in this volume involves multiple methods, including discourse volume analysis and qualitative historical techniques. Included also is a comprehensive overview of the recent relevant developments in sociology, marketing, and organization sciences, in which the author draws on the heritage of praxiology by taking a meta-level perspective on the propositions of management science.

  Practical Aspects of Knowledge Management Dimitris Karagiannis,Ulrich Reimer,2007-11-08 This book contains the papers presented at the 4th International Conference on Practical Aspects of Knowledge Management organized by the Department of Knowledge Management, Institute of Informatics and Business Informatics, University of Vienna. The event took place on 2002, December 2–3 in Vienna, Austria. The PAKM conference series is a forum for people to share their views, to exchange ideas, to develop new insights, and to envision completely new kinds of solutions to knowledge management problems, because to succeed in the

accelerating pace of the "Internet age,"
organizations will be obliged to efficiently
leverage their most valuable and underleveraged
resource: the intellectual capital of their highly
educated, skilled, and experienced employees. Thus
next-generation business solutions must be
focussed on supporting the creation of value by
adding knowledge-rich components as integral parts
in the work process. The authors, who work at the
leading edge of knowledge management, have pursued
integrated approaches which consider both the
technological side, and the business side, and the
organizational and cultural issues. We hope the
papers, covering a broad range of knowledge
management topics, will be valuable, at the same
extent, for researchers and practitioners
developing knowledge management approaches and
applications. It was a real joy seeing the
visibility of the conference increase and noting
that knowledge management researchers and
practitioners from all over the world submitted
papers. This year, 90 papers and case studies were
submitted, from which 55 were accepted.
