OSS Reliability Measurement and Assessment
Shigeru Yamada,Yoshinobu Tamura,2016-03-22 This book analyses quantitative open source software (OSS) reliability assessment and its applications, focusing on three major topic areas: the Fundamentals of OSS Quality/Reliability Measurement and Assessment; the Practical Applications of OSS Reliability Modelling; and Recent Developments in OSS Reliability Modelling. Offering an ideal reference guide for graduate students and researchers in reliability for open source software (OSS) and modelling, the book introduces several methods of reliability assessment for OSS including component-oriented reliability analysis based on analytic hierarchy process (AHP), analytic network process (ANP), and non-homogeneous Poisson process (NHPP) models, the

stochastic differential equation models and hazard rate models. These measurement and management technologies are essential to producing and maintaining quality/reliable systems using OSS.

Demystifying the European Union Roy H.

Ginsberg, 2007 The European Union_the world's greatest experiment in interstate reconciliation through regional integration_is now fifty years old. However, it remains a mystery to many people in and outside Europe. This clear and comprehensive book is dedicated to 'demystifying' the EU for both introductory and seasoned students of European integration. Roy H. Ginsberg begins with the foundation blocks of history, law, economics, and politics to provide the context for understanding integration. He then deconstructs the EU into its individual elements to examine them in relation to one another and to the whole before reconstructing the EU as a single polity. In doing so, he evaluates the EU's scope for agency and its effects on Europeans and non-Europeans alike. Emphasizing this wider perspective, Ginsberg convincingly demonstrates that the EU is a wellspring of support for conflict prevention and resolution throughout the world.

Women in the Modern History of Libya Barbara Spadaro, Katrina Yeaw, 2020-06-29 Women in the Modern History of Libya features histories of Libyan women exploring the diversity of cultures, languages and memories of Libya from the age of

the Empires to the present. The chapters explore a series of institutional and private archives inside and outside Libya, illuminating historical trajectories marginalised by colonialism, nationalism and identity politics. They provide engaging and critical exploration of the archives of the Ottoman cities, of the colonial forces of Italy, Britain and the US, and of the Libyan resistance – the Mawsū'at riwāyāt al-jihād (Oral Narratives of the Jihād) collection at the Libyan Studies Center of Tripoli – as well as of the private records in the homes of Jewish and Amazigh Libyans across the world. Developing the tools of women's and gender studies and engaging with the multiple languages of Libya, contributors raise a series of critical questions on the writing of history and on the representation of Libyan people in the past and the present. Illuminating the sheer diversity of histories, memories and languages of Libya, *Women in the Modern History of Libya* will be of great interest to scholars of North Africa; women's and gender history; memory in history; cultural studies; and colonialism. The chapters were originally published as a special issue of the *Journal of North African Studies*.

TERI Energy & Environment Data Diary and Yearbook (TEDDY) 2019/20 TERI, 2021-07-01 TERI Energy & Environment Data Diary and Yearbook (TEDDY) is an annual publication brought out by TERI since 1986. It is the only comprehensive energy and environment yearbook in India that provides updated information on the energy supply sectors (coal and lignite, petroleum and natural gas, power, and renewable energy sources), energy

demand sectors (agriculture, industry, transport, household, buildings), and environment (local and global). Recent changes in the energy sector and environment are depicted with the help of graphs, figures, maps, and tables. The publication also reviews government policies associated with energy and environment. TEDDY 2019/20 gives an account of India's commercial energy balances, extensively covering energy flows within different sectors of the economy and how they have been changing over time. These energy balances and conversion factors are a valuable reference for researchers, scholars, and organizations engaged in energy and related sectors. Contents of the book are organized into three sections—Energy Supply, Energy Demand, and Local and Global Environment. Interlinkage of SDGs with energy and environment also forms the subject matter of TEDDY 2019/20. The thirty fifth edition continues to remain less prose intensive with inclusion of more data, represented with the help of infographics, thus making the publication an authentic and interesting read. Key Features:

- Provides a review of government policies, programmes and initiatives that have implications for the petroleum and natural gas sector and the Indian economy
- New chapters on Air Pollution, Solid Waste Management, Water Resource Management, and Land and Forest Resource Management
- Exhaustive data from energy supply, energy demand, and local and global environment sectors

Contents:

Inequality, Poverty and Development in India

Utpal Kumar De, Manoranjan Pal, Premananda Bharati, 2017-11-24 This book reviews the fulfillment of two Millennium Development Goals (MDGs), namely poverty and inequality, in the Indian subcontinent. It examines the complex interplay among development, inequality and poverty in relation to corruption, environmental resource management, agricultural adjustment to climate change and institutional arrangements, with a special focus on the Northeastern region of the country. The topics covered offer a blend of theoretical arguments and empirical data with regard to the three main themes of the book, while also providing agricultural and environmental perspectives. The book also provides guidelines for policy initiatives for harnessing the region's potential in the areas of industry, trade, sustainable use of mineral, forest and other natural resources, nature-based tourism through

proper infrastructure development, and resolving land issues to achieve inclusive development. In addition to introducing some new questions on the development-ethnic conflict interface, it uses sophisticated tools such as the Blinder–Oaxaca decomposition method in consumption expenditure to show the endowment, and return to endowment effects; and techniques like spatial correlation-regression to analyze regional variation, co-integration, vector autoregression, the panel data technique and the adaptation index to climate change, to understand socio-economic complexities and the effect of the concerned variables on entrepreneurship and human development. The book offers a timely contribution to our understanding of major MDGs and highlights their successes and failures. It also includes analytical frameworks that are key to future policy initiatives. Further, it disseminates approaches and methods that improve livelihoods and standards of living through poverty reduction and promoting inclusive development along with sustainable utilization of available natural resources. Putting forward various ideas for creating a more sustainable future, it inspires and encourages readers to pursue further studies to address the gaps that still remain.

Climate and Atmospheric Dynamics and Predictability Ioannis Pytharoulis, Petros Katsafados, 2021-01-19 Earth's weather and climate are complex nonlinear systems of dynamical/thermodynamical processes that are highly variable on all spatiotemporal scales. The analysis and prediction of those processes and

their feedbacks with the other systems of the biosphere (land and ocean), from the viewpoints of both atmospheric science and dynamics/thermodynamics, can improve our knowledge and have a great impact on society. The main aim of this Special Issue was to gather observational, theoretical and modeling studies on the dynamics of the atmosphere and the climate system, as well as on their predictability at different spatiotemporal scales.

Strategic Planning for Local Government Gerald L. Gordon, 2013-07-01 Strategic Planning for Local Government, second edition, outlines the strategic planning process in local government and helps local government leaders anticipate and shape the future of their communities. It covers practical ways of obtaining information, analyzing that information, and developing a vision for the community that can be translated into programs and line items in a budget. This e-book offers many excerpts from local government plans and working documents that serve as examples you can build upon. These models can be customized for your local government. Videos highlight the role professional local government managers play in building communities we're proud to call home.
