Scotland Chris Townsend, 2011-03-30 This comprehensive book is an excellent planning resource for those who wish to venture into the Scottish mountains. Whether you are planning a walk, scramble, climb or ski tour this larger format guide has all the information the independent mountain lover needs. The guide covers all the mountainous areas of Scotland from south to north, divided into seven regions. Each regional chapter covers individual glens important for mountain-goers, groups of hills that form coherent massifs and individual hills of significance. However, this is not a route guide and detailed descriptions are not provided. The aim of the book is to inspire and entertain as well as inform; to show first-time visitors

just what the Scottish mountains have to offer and provide a new perspective for those who have been before. In the descriptions author Chris Townsend has given his opinions as to the relative qualities of the walks, glens, lochs, mountains and the landscape in general and highlighted those he thinks are the best the area has to offer. Includes: Descriptions of all the Scottish mountains, area-by-area from south to north, to help you identify the best locations for hill walking, mountaineering, climbing and ski touring Classic ascents and walks described, from scrambles up Ben Nevis to ski tours in the Cairngorms A planning tool for long-distance treks

War of the Maps Paul McAuley,2020-03-19 'The underrated McAuley is in top form in this hard science fiction novel with heart.' Washington Post Book World On a giant artificial world surrounding an artificial sun, one man - a lucidor, a keeper of the peace, a policeman - is on the hunt. His target was responsible for an atrocity, but is too valuable to the government to be truly punished. Instead he has been

sent to the frontlines of the war, to use his unique talents on the enemy. So the lucidor has ignored orders, deserted from his job, left his home and thrown his life away, in order to finally claim justice. Separated by massive seas, the various maps dotted on the surface of this world rarely contact each other. But something has begun to infiltrate the edges of the lucidor's map, something that genetically alters animals and plants and turns them into killers. Only the lucidor knows the depths to which his quarry will sink in order to survive, only the lucidor can capture him. The way is long and dangerous. The lucidor's government has set hunters after him. He has no friends, no resources, no plan. But he does have a mission.

USA Has Issues with Maps of 18th Century Gleb Nosovskiy, Anatoly Fomenko, 2017-09-21 NASA research of earth-moon mechanics by astrophysicist Robert Newton leads mathematicians of MSU to a breakthrough in the chronology of civilization and geography of North America. ""USA has Issues with Maps of 18th-century" analyses in detail the maps of 1771 edition of Encyclopedia Britannica and concludes that North western part of United States of America was built on remains of Moscovite Tartary, which according to Britannica of 1771 was the biggest state in the world with capital in Tobolsk! The war of new Russian Empire of 1773-1775 with Moscovite Tartary covered up by Catherine II as a raid against peasant rebellion headed by aka Pougatchev (scare in Russian) was actually the final blow in the destruction of Great Tartary. After the war of 1773-1775 the new Russian Empire has taken over the Urals, Western and Eastern Siberia, Alaska, Northwestern America down to San Francisco. These "Russian" American

territories were too far to control efficiently by the Russian Empire and were therefore taken over step by step by the USA and British Empire. Who and Why invented Antiquity and Dark Ages? The consensual world history was manufactured in Europe in XVI-XIX centuries with political agenda of powers of that period on the basis of erroneous clerical chronology elaborated by Jesuits Joseph Justus Scaliger and Dionysius Petavius. •By middle of XVI th century the prime political agenda of Europe that reached superiority in Sciences and Technologies, but was still inferior militarily to the Evil Empire of Eurasia, was to free Europe. •The concerted effort of European aristocracy, black and white Catholic clergy, protestants, humanists and scientists in XV-XVII th centuries in creation and dissemination of fictional Ancient World served this agenda. •The fictional Ancient World was created by representing events of XI-XVI centuries as ones that happened thousands of years before according to the ancient sources they wrote by authorities they invented. •The European aristocracy, a considerable part of which were fugitives from Byzantine and/or the inheritors of Eurasian warlords, supported the myth of Ancient World to justify its claims to countries they ruled. •The black and white Catholic clergy, protestants developed and supported the myth of Ancient World to justify their claims of being more ancient and to separate themselves from Eurasian orthodoxy in the countries ruled by European aristocracy. •The scientists supported the myth of Ancient World as safe cover for their heretic research that produced results contrarian to the tenets of Christianity. They justified their discoveries by authorities of ancient scientists they themselves invented and used as pseudonyms. •The humanists developed and supported the myth of Ancient World as a convenient safe haven for their ideas that conflicted with Christianity and aristocracy. They disguised and justified their

ideas on authorities of ancient authors of their own making and wrote under their glorious aliases. Who controls the past controls the future. Who controls the present controls the past. -- George Orwell, 1984
