New Evidence on the Markup of Prices Over Marginal Costs and the Role of Mega-Firms in the US Economy Robert E. Hall, 2018 The markup of price over marginal cost reveals market power. The distinction between marginal and average cost is key. Average cost is easy to measure, but the price/average cost ratio understates the price/marginal cost ratio when fixed costs are present. In particular, in free-entry equilibrium, where revenue equals cost, the price/average cost ratio is always one, while the price/marginal cost ratio may be above one. The idea here is to calculate marginal cost as the ratio of the adjusted expenditure on inputs to the adjusted change in output. The first adjustment is to remove the change in expenditure that arises from the changes in input costs. The second adjustment is to remove the change in output attributed to productivity growth. Application to KLEMS productivity data finds a typical markup ratio of 1.3. Markup ratios grew between 1988 and 2015. For mega-firms, the paper uses employment at firms with 10,000+ workers. Substantial heterogeneity occurs across sectors and in growth rates. There is no evidence that mega-firm-intensive sectors have higher price/marginal cost markups, but some evidence that markups grew in sectors with rising mega-firm intensity.

Economic Principles for the Hospitality Industry Ricardo C.S. Siu, 2019-06-27 Economic Principles for the Hospitality Industry is the ideal introduction to the fundamentals of economics in this dynamic and highly competitive sector. Applying economic theory to a range of diverse and global hospitality industry settings, this book gives the theory real-world context. Looking at critical issues around sustainable economic development in the hospitality industry such as diversification, technology, determinants of demand, and pricing, it enables students to effectively conduct business analyses, evaluate business performance and conduct effective improvements over time. Written in an engaging style, this book assumes no prior knowledge of economics and contains a range of features, including international case studies and discussion questions, to aid beginners in the subject. This will be an essential introductory yet comprehensive resource on economics for all hospitality students.

Mega-Urban Development and Transformation Processes in Vietnam Frauke Kraas, Javier Revilla Diez, Matthias Garschagen, Le Thu Hoa, Since the beginning of the Doi Moi reforms, Vietnam's economy and society have been profoundly transformed. While in 1986 less than 13 million of Vietnam's inhabitants lived in areas classified as urban (20%), the number has risen to more than 30 million inhabitants today (35% of the total population). This massive urbanisation was made possible by the rapid transformation of the former agricultural state into an industrial and service state and extensive migration processes from rural areas to the fast growing cities and megacities. Fifteen articles analyse the current situation.

Marginal Cost in the New Economy: A Proposal for a Uniform Approach to Policy Evaluations Roger L. Conkling, 2015-04-29 This volume presents an approach for resolving a variety of public policy debates. It proposes that a single standard - marginal cost methodology - be adopted to replace the haphazard arrays of methods and techniques currently employed to measure the costs and benefits of disputed policy issues.

Mega-city Growth and the Future Roland J. Fuchs, 1994 This book examines a range of issues related to the mega-city phenomenon. Part one deals with the growth of mega-cities and explores demographic issues, labour force change in the big cities of Asia, the effect of macroeconomic forces on the world city system, and the relations between technology and the city. In part two, the discussion focuses on the economic and social consequences of mega-city growth. Part three looks at the crucial issue of the management of mega-cities, taking up such issues as infrastructure financing, land and shelter needs, transportation, and environmental management. The final chapter examines priority urban management issues in developing countries and derives a research agenda for the 1990s. (Adapté du résumé de l'éditeur).

Managing Sport Mega-Events Stephen Frawley, 2016-06-17 Managing Sport Mega-Events explores global developments in the management of sport mega-events. Sport mega-events such as the Olympic Games and the Football World Cup have been examined from a number of academic perspectives including history, sociology, politics, urban planning and economics. What is lacking, however, is a book which identifies and evaluates the current issues and complexities faced by those charged with the responsibility of managing these sport mega-events. This book fills the gap. The book addresses three broad but interconnected themes. First, strategic matters are explored focusing on the rise of sport mega-events, the management of stakeholders and governance issues. Second, how organisers can best ensure the sustainable management of sport mega-events is considered. Third, operational matters and related issues are examined including media management, broadcast management, venue management, risk management, marketing and sponsorship management. The book draws on leading international sport management scholars, each of whom has expertise in the organisation of sport mega-events. It makes a valuable contribution to the existing literature.

Foundations of Real-World Economics John Komlos, 2023-03-20 • Presents many of the microeconomic and macroeconomic theories and schools of thought not generally covered in mainstream principles of economics textbooks • Each chapter starts with a short refresher of standard neoclassical economic modelling before demonstrating how that model is distorted by people, problems and events in the real world to provide students with a more realistic picture of how the economy works • Updates throughout and new material on populism, racism, inequality, climate change and the covid-19 pandemic • Now has online supplements: quiz questions for students and PowerPoint slides for instructors

Handbook of Research for Fluid and Solid Mechanics Kaveh Hariri Asli, Soltan Ali Ogli Aliyev, Sabu Thomas, Deepu A. Gopakumar, 2017-11-23 This valuable volume provides a broad understanding of the main computational techniques used for processing reclamation of fluid and solid mechanics. The aim of these computational techniques is to reduce and eliminate the risks of mechanical systems failure in hydraulic machines. Using many computational methods for mechanical engineering problems, the book presents not only a platform for solving problems but also provides a wealth of information to address various technical aspects of troubleshooting of mechanical system failure. The focus of the book is on practical and realistic fluids engineering experiences. Many photographs and figures are included, especially to illustrate new design applications and new instruments.

Advertising, the Media and Globalisation John Sinclair,2012-05-31 This book offers a critical, empirically-grounded and contemporary account of how advertisers and agencies are dealing with a volatile mediascape throughout the world, taking a region-by-region approach. It provides a clear, systematic, and synoptic analysis of the dynamic relationship between media, advertisers, and agencies in the age of globalization, and in an era of transition from ‘mass’ to ‘social’ media. Advertising attracts much public criticism for the commercialization of culture and its apparent impact on social and personal life. This book outlines and assesses the issues involved, with regard to how they are manifested in different national, regional and global contexts. Topics covered include: advertising as an object of study global trends in the advertising industry advertising and the media in motion current issues in advertising, media and society advertising, globalization and world regions. While maintaining a contemporary focus, the book explains developments over recent decades as background to the globalisation of what it calls the manufacturing-marketing-media complex.

Managerial Economics William F. Samuelson,Stephen G. Marks,Jay L. Zagorsky,2021-01-13 Managerial Economics, 9th Edition, introduces undergraduates, MBAs, and executives to the complex decision problems today’s managers face, providing the knowledge and analytical skills required to make informed decisions and prosper in the modern business environment. Going beyond the traditional academic approach to teaching economic analysis, this comprehensive textbook describes how practicing managers use various economic methods in the real world. Each in-depth chapter opens with a central managerial problem—challenging readers to consider and evaluate possible choices—and concludes by reviewing and analyzing the decision through the lens of the concepts introduced in the chapter. Extensively updated throughout, the text makes use of numerous extended decision-making examples to discuss the foundational principles of managerial economics, illustrate key concepts, and strengthen students' critical thinking skills. A range of problems, building upon material covered in previous chapters, are applied to increasingly challenging applications as students advance through the text. Favoring practical skills development over complicated theoretical discussion, the book includes numerous mini-problems that reinforce students' quantitative understanding without overwhelming them with an excessive amount of mathematics.
