Computer-Based Horse Race Handicapping and Wagering Systems Bill Benter, William Benter, 2020-02-14 The Gambler Who Cracked the Horse-Racing Code Bill Benter did the impossible: He wrote an algorithm that couldn't lose at the track. Close to a billion dollars later, he tells his system. This book examines the elements necessary for a practical and successful computerized horse race handicapping and wagering system. Data requirements, handicapping model development, wagering strategy, and feasibility are addressed. A logit-based technique and a corresponding heuristic measure of improvement are described for combining a fundamental handicapping model with the public's implied probability estimates. The author reports significant positive results in five years of actual implementation of such a system. This result can be interpreted as evidence of inefficiency in pari-mutuel racetrack wagering. This paper aims to emphasize those aspects of computer handicapping which the author has found most important in practical application of such a system. Also included the Bill Benter What Are My Odds? Presentation at ICCM in 2004.

The Alternative Investment Fund Managers Directive Dirk A. Zetsche, 2015-09-14 Apart from MiFID, the Alternative Investment Fund Managers Directive (AIFMD) may be the most important European asset management regulation of the early twenty-first century. In this in-depth analytical and critical discussion of the content and system of the directive, thirty-eight contributing authors – academics, lawyers, consultants, fund supervisors, and fund industry experts – examine the AIFMD from every angle. They cover structure, regulatory history, scope, appointment and authorization of the manager, the requirements for depositaries and prime brokers, rules on delegation, reporting requirements, transitional provisions, and the objectives stipulated in the recitals and other official documents. The challenging implications and contexts they examine include the following: – connection with systemic risk and the financial crisis; - nexus with insurance for negligent conduct; - connection with corporate governance doctrine; - risk management; - transparency; - the cross-border dimension; - liability for lost assets; - impact on alternative investment strategies, and - the nexus with the European Regulation on Long-Term Investment Funds (ELTIFR). Nine country reports, representing most of Europe's financial centres and fund markets add a national perspective to the discussion of the European regulation. These chapters deal with the potential interactions among the AIFMD and the relevant laws and regulations of Austria, France, Germany, Italy, Luxembourg, Liechtenstein, The Netherlands, Malta and the United Kingdom. The second edition of the book continues to deliver not only the much-needed discussion of the inconsistencies and difficulties when applying the directive, but also provides guidance and potential solutions to the problems it raises. The second edition considers all new developments in the field of alternative investment funds, their managers, depositaries, and prime brokers, including, but not limited to, statements by the European Securities and Markets Authority (ESMA) and national competent authorities on the interpretation of the AIFMD, as well as new European regulation, in particular the PRIIPS Regulation, the ELTIF Regulation, the Regulation on European Venture Capital Funds

(EuVeCaR), the Regulation on European Social Entrepreneurship Funds (EUSEFR), MiFID II, and UCITS V. The book will be warmly welcomed by investors and their counsel, fund managers, depositaries, asset managers, administrators, as well as regulators and academics in the field.

Critical Animal Geographies Kathryn Gillespie,Rosemary-Claire Collard,2015-01-30 *Critical Animal Geographies* provides new geographical perspectives on critical animal studies, exploring the spatial, political, and ethical dimensions of animals' lived experience and human-animal encounter. It works toward a more radical politics and theory directed at the shifting boundary between human and animal. Chapters draw together feminist, political-economic, post-humanist, anarchist, post-colonial, and critical race literatures with original case studies in order to see how efforts by some humans to control and order life – human and not – violate, constrain, and impinge upon others. Central to all chapters is a commitment to grappling with the stakes – violence, death, life, autonomy – of human-animal encounters. Equally, the work in the collection addresses head-on the dominant forces shaping and dependent on these encounters: capitalism, racism, colonialism, and so on. In doing so, the book pushes readers to confront how human-animal relations are mixed up with overlapping axes of power and exploitation, including gender, race, class, and species.

Cable Communications Technology Eugene R. Bartlett,2005-11-15 Cable is now as much in the broadband business as it is television. This book explains the fundamentals of coaxial cable technology and the DSP that controls it, along with the cable modem and voice over IP technology now drastically changing the cable operators' business. Aimed at working engineers and technicians, it can also be used a textbook for the a basic cable communications course in a 2 year tech program.
