The Chemical Warfare Service Leo P. Brophy,Wyndham D. Miles,Rexmond Canning

Cochrane,2010 This volume, the second in a series of three devoted to the Chemical Warfare Service (CWS) in World War II, now the Chemical Corps, covers research, development, procurement, and distribution of chemical warfare materiel. It traces the history of these activities from the World War I period, when the CWS was activated to supervise the offensive and defensive aspects of gas warfare throughout the Army, until the end of World War II. The first volume in the series, *Organizing for War*, discusses the development of the CWS organization and mission as well as personnel management and military training. The third volume, entitled *Chemicals in Combat*, will deal with the chemical warfare activities in the theaters of operations. In treating research and development, the present volume concentrates on CWS projects that proved of greatest significance to the armed forces during World War II. It attempts to point up the problems that arose in course of research and development and to indicate the solutions which the scientists hit upon. Since research and development in the zone of the interior was closely related to research and development in the theaters of operations, the volume covers activities in both areas. In contrast to research and development, procurement and distribution differed considerably as between the zone of the interior and the theaters of operations; in

the theaters these activities were closely associated with the commanders' combat responsibilities. The volume, therefore, confines itself to a review of procurement and distribution in the zone of the interior, leaving narration of theater activities to the volume Chemicals in combat.

Gregory of Nyssa and the Concept of Divine Persons Lucian Turcescu,2005-02-17 The concept of personhood is central to a wide range of contemporary issues, ranging from reproductive rights to the death penalty and euthanasia. We may think that the concept of person is a modern development. In fact, however, this idea does not originate with our discovery of human rights, consciousness, and individuality. In this study Lucian Turcescu shows that the fourth-century theologian Gregory of Nyssa developed a very sophisticated concept of the person in the context of his attempts to clarify the paradox of the Trinity-a single God comprising three distinct persons. Turcescu offers the first in-depth analysis of Gregory's writings about the divine persons. He shows that Gregory understood personhood as characterized by uniqueness, relationality, and freedom. He reasoned that the three persons of the Trinity have distinctive properties that make them individuals, that is, capable of being enumerated and circumscribed. But this idea of individuation, inherited from the neo-Platonists, falls short of expressing a clear notion of personal uniqueness. By itself it would suggest that a person is merely a collection of properties. Gregory's great contribution was to perceive the importance of relationality to personhood. The three divine persons know and love each other, are in communion with each other, and freely act together in their common will. This understanding, argues Turcescu, adds up to a concept of personal uniqueness much like our modern one. Turcescu's work not only contributes to our knowledge of the history of Trinitarian theology but can be helpful to theologians who are dealing with issues in contemporary ethics.

The Black Lizard Big Book of Black Mask Stories Otto Penzler,2012-05-09 An unstoppable

anthology of crime stories culled from Black Mask magazine the legendary publication that turned a pulp phenomenon into literary mainstream. Black Mask was the apotheosis of noir. It was the magazine where the first hardboiled detective story, which was written by Carroll John Daly appeared. It was the slum in which such American literary titans like Dashiell Hammett and Raymond Chandler got their start, and it was the home of stories with titles like “Murder Is Bad Luck,” “Ten Carets of Lead,” and “Drop Dead Twice.” Collected here is best of the best, the hardest of the hardboiled, and the darkest of the dark of America’s finest crime fiction. This masterpiece collection represents a high watermark of America’s underbelly. Crime writing gets no better than this. Featuring • Deadly Diamonds • Dancing Rats • A Prize Fighter Fighting for His Life • A Parrot that Wouldn’t Talk Including • Dashiell Hammett’s The Maltese Falcon as it was originally published • Lester Dent’s Luck in print for the first time

The Face Mask In COVID Times Deborah Lupton,Clare Southerton,Marianne Clark,Ash Watson,2021-04-19 The simple fabric face mask is a key agent in the fight against the global spread of COVID-19. However, beyond its role as a protective covering against coronavirus infection, the face mask is the bearer of powerful symbolic and political power and arouses intense emotions. Adopting an international perspective informed by social theory, *The Face Mask in COVID Times: A Sociomaterial Analysis* offers an intriguing and original investigation of the social, cultural and historical dimensions of face-masking as a practice in the age of COVID. Rather than Beck’s ‘risk society’, we are now living in a ‘COVID society’, the long-term effects of which have yet to be experienced or imagined. Everything has changed. The COVID crisis has generated novel forms of sociality and new ways of living and moving through space and time. In this new world, the face mask has become a significant object, positioned as one of the key ways people can protect themselves and others from infection with the coronavirus. The face mask is rich with symbolic meaning as well as practical value.

In the words of theorist Jane Bennett, the face mask has acquired a new ‘thing-power’ as it is coming together with human bodies in these times of uncertainty, illness and death. The role of the face mask in COVID times has been the subject of debate and dissension, arousing strong feelings. The historical and cultural contexts in which face masks against COVID contagion are worn (or not worn) are important to consider. In some countries, such as Japan and other East Asian nations, face mask wearing has a long tradition. Full or partial facial coverings, such as veiling, is common practice in regions such as the Middle East. In many other countries, including most countries in the Global North, most people, beyond health care workers, have little or no experience of face masks. They have had to learn how to make sense of face masking as a protective practice and how to incorporate face masks into their everyday practices and routines. Face masking practices have become highly political. The USA has witnessed protests against face mask wearing that rest on ‘sovereign individualism’, a notion which is highly specific to the contemporary political climate in that country. Face masks have also been worn to make political statements: bearing anti-racist statements, for example, but also Trump campaign support. Meanwhile, celebrities and influencers have sought to advocate for face mask wearing as part of their branding, while art makers, museums, designers and novelty fashion manufacturers have identified the opportunity to profit from this sudden new market. Face masks have become a fashion item as well as a medical device: both a way of signifying the wearer’s individuality and beliefs and their ethical stance in relation to the need to protect their own and others’ health. The Face Mask in COVID Times: A Sociomaterial Analysis provides a short and accessible analysis of the sociomaterial dimensions of the face mask in the age of COVID-19. The book presents seven short chapters and an epilogue. We bring together sociomaterial theoretical perspectives with compelling examples from public health advice and campaigns, anti-mask activism as well as popular culture (news reports, blog posts, videos, online shopping sites, art works) to illustrate our theoretical points, and use Images to support our analysis.
