Covid-19, Society and Crime in Europe Dina Siegel,Aleksandras

Dobryninas,Stefano Becucci,2022-10-29 This volume analyzes the development of the reactions to Covid-19 by governments, the public and the crime patterns in 16 European countries. All countries are members of the European Union and share common European norms and values, but the Covid-19 pandemic can serve as an example of how these norms and values are interpreted differently with regard to people's trust in public institutions, governmental control strategies, dealing with fear, anxiety and other emotional responses to the new virus, crime patterns and law enforcement priorities to prevent and combat them. The volume provides empirical data based on available statistics, media analysis and qualitative data from interviews and observations, and examines the similarities and differences in crime patterns and the consequences for local communities and law enforcement priorities.

Processing Strategies of the Auditory System for Improving the Detection of Masked Signals Bastian Epp,2010 The auditory system of mammals is a highly developed sensory system that facilitates the analysis and the communication in complex acoustical scenes. For the analysis of incoming sounds, the auditory systems makes use of a large variety of physical signal properties that are processed within various mechanical and neural processing stages along the auditory pathway. The scope of this thesis was to investigate processing strategies that contribute to the outstanding performance of the auditory system to detect signals in complex acoustical scenes. Using methods from psychoacoustics and signal processing techniques, it has been shown that a combination of coherent intensity fluctuations in different frequency regions and interaural disparities are processed in a highly efficient way. With the application of a physical nonlinear and active model of the cochlea, the basis was provided for separating contributions of mechanical and neural processing stages to the analysis of complex acoustical scenes.

Emerging Technology and Architecture for Big-data Analytics Anupam

Chattopadhyay,Chip Hong Chang,Hao Yu,2017-04-19 This book describes the current state of the art in big-data analytics, from a technology and hardware architecture perspective. Coverage includes emerging technology and devices for data-analytics, circuit design for data-analytics, and architecture and algorithms to support data-analytics. Readers will benefit from the realistic context used by the authors, which demonstrates what works, what doesn't work, and what are the fundamental problems, solutions, upcoming challenges and opportunities. Provides a single-source reference to hardware architectures for big-data analytics; Covers various levels of big-data analytics hardware design abstraction and flow, from device, to circuits and systems; Demonstrates how non-volatile memory (NVM) based hardware platforms can be a viable solution to existing challenges in hardware architecture for big-data analytics.

Staging Conventions in Medieval English Theatre Philip Butterworth,2014-06-26

How was medieval English theatre performed? Many of the modern theatrical concepts and terms used today to discuss the nature of medieval English theatre were never used in medieval times. Concepts and terms such as character, characterisation, truth and belief, costume, acting style, amateur, professional, stage directions, effects and special effects are all examples of post-medieval terms that have been applied to the English theatre. Little has been written about staging conventions in the performance of medieval English theatre and the identity and value of these conventions has often been overlooked. In this book, Philip Butterworth analyses dormant evidence of theatrical processes such as casting, doubling of parts, rehearsing, memorising, cueing, entering, exiting, playing, expounding, prompting, delivering effects, timing, hearing, seeing and responding. All

these concerns point to a very different kind of theatre to the naturalistic theatre produced today.

Psychoacoustic Music Sound Field Synthesis Tim Ziemer, 2019-08-06 This book provides a broad overview of spaciousness in music theory, from mixing and performance practice, to room acoustics, psychoacoustics and audio engineering, and presents the derivation, implementation and experimental validation of a novel type of spatial audio system. Discussing the physics of musical instruments and the nature of auditory perception, the book enables readers to precisely localize synthesized musical instruments while experiencing their timbral variance and spatial breadth. Offering interdisciplinary insights for novice music enthusiasts and experts in the field of spatial audio, this book is suitable for anyone interested in the study of music and musicology and the application of spatial audio mixing, or those seeking an overview of the state of the art in applied psychoacoustics for spatial audio.

Anti-Consumption Hélène Cherrier, Michael S W Lee, 2022-09-01 In this edited volume, the leading scholars in the field engage with consumers, marketers, corporations and policymakers as well as space dynamics and network formation to provide an in-depth examination of anti-consumption: a voluntary behavioural inclination to minimise rather than grow, to decelerate and simplify and to reduce the unnecessary exploitation of resources fuelled by consumer culture. This book does not place anti-consumption on the high moral ground but rather demonstrates its complexity to spur innovative and critical thinking on how people, organisations, businesses and governments can treat consumption more as a necessity for survival than as a tool for self-expression, pleasure and economic growth. The first part of this book looks at anti-consumption from a diversity of perspectives. It analyses voluntary simplicity, a self-motivated engagement in consumption reduction, and boycotting, a politically-motivated reaction against unacceptable corporate practices, as distinct manifestations of anti-consumption that nonetheless remain rooted in the logic of the market. Paving the way to critical perspectives on the interface between anti-consumption, people and the environment, the second part of the book projects anti-consumption to issues of waste production and provides possible answers to global challenges of resources depletion, social inequalities and global warming. In this section, anti-consumption is critically assessed as an actor of change, both in terms of social change and paradigm change. To move the field forward, the third part of this book presents several theoretical frameworks that help set a roadmap for future research. Anti-Consumption will be of direct interest to scholars and researchers within the fields of marketing, consumer research, business studies, environmental studies and sustainability. It will also be of value to those researching the economics and/or sociology of markets.
