How to Use IBM Cloud Object Storage When Building and Operating Cloud Native Applications Giri Badanahatti, Aaron Thomas Binford, Charlie Crawford, Daniel Fitzgerald, Vasfi Gucer, Wesley Leggette, Mrudula Madiraju, Daniel Pittner, Joeri Van Speybroek, IBM Redbooks, 2018-11-15 This IBM® Redpaper™ publication presents a series of tutorials for cloud native developers just getting started with IBM Cloud™ and IBM Cloud Object Storage. Within the context of a car insurance application, this paper presents an introductory series of linked modules that allow developers unfamiliar with either IBM Cloud or cloud native development to get started with application

development using IBM starter kits. This allows you to become familiar with the types of services available on IBM Cloud, and to develop a sense of which patterns and choices are appropriate for different use cases. Some of the technologies and products covered in this book are Cloudant®, Watson™ Analytics, machine learning, elastic search, Kubernetes, containers, pre-signed URLs, Aspera®, and SQL Query. In addition to the technical integration steps, it also presents a business case for integrating these technologies and products with IBM Cloud Object Storage. The target audience for this paper is cloud native developers and cloud object storage specialists.

Geopolitical Risk, Sustainability and “Cross-Border Spillovers” in Emerging Markets, Volume II Michael I. C. Nwogugu, 2022-01-01 Many emerging market countries are bank-based economies and are increasingly affected by geopolitical risks, U.S. dollar dynamics, regulations, preferential trade agreements (PTAs), MNCs (that often function like international organizations), social networks, labor dynamics, cross-border spillovers and the inefficient expansion of formal/informal microfinance. Country risks, informal economies (that account for 20-50 percent of the national economy of many emerging market countries), investor protection, enforcement commitment, compliance costs, sustainability (environmental, social, economic and political sustainability), economic growth, political stability, financial stability, geopolitical risk, social networks, household economics, inequality and international trade outcomes can vary dramatically across many DEC and LDECs due to these phenomena. The COVID-19 pandemic has illustrated the many problems inherent in political systems, economic policy and governments' emergency powers during pandemics/epidemics and economic/financial crisis. This second volume focuses on geopolitical risks that are intertwined with constitutional political economy and labor issues, alongside addressing some of the financial and constitutional crises that occurred in Europe, Asia and the U.S. during 2007-2020. This book provides analysis of complex systems and the preferences and reasoning of state/government and corporate actors in order to develop better artificial intelligence and decision-system models of geopolitical risk, public policy and international capital flows, all of which are increasingly important decision factors for investment managers, boards-of-directors and government officials.

Intelligent Tools for Building a Scientific Information Platform Robert Bembenik, Lukasz Skonieczny, Henryk Rybinski, Marzena Kryszkiewicz, Marek Niezgodka, 2013-01-12 This book is a selection of results obtained within two years of research performed under SYNAT - a nation-wide scientific project aiming at creating an infrastructure for scientific content storage and sharing for academia, education and open knowledge society in Poland. The selection refers to the research in artificial intelligence, knowledge discovery and data mining, information retrieval and natural language processing, addressing the problems of implementing intelligent tools for building a scientific information platform. This book is a continuation and extension of the ideas presented in “Intelligent Tools for Building a Scientific Information Platform” published as volume 390 in the same series in 2012. It is based on the SYNAT 2012 Workshop held in Warsaw. The papers included in this volume present an overview and insight into information retrieval, repository systems, text processing, ontology-based systems, text mining, multimedia data processing and advanced software engineering.

Drug Repurposing Mithun Rudrapal, 2023-06-07 Drug repurposing (or drug repositioning) is defined as the process of identifying new pharmacological indications of old, existing, investigational, or FDA-approved drugs for use in the treatment of diseases other than the drugs' original intended therapeutic use. *Drug Repurposing - Advances, Scopes and Opportunities in Drug Discovery* delivers up-to-date information on the identification of newer uses, molecular mechanisms, and novel targets of existing drug candidates through the application of various experimental, biophysical, and computational approaches and techniques. Chapters discuss recent advances in drug repurposing strategies that are currently being used in the discovery and development of drugs against difficult-to-treat, rare, and life-threatening diseases, including microbial infections, COVID-19, parasitic diseases, cardiovascular diseases, neurological disorders, and cancer. The book also discusses the modern experimental assays (HTS) and computational techniques including informatics and databases, molecular docking and dynamics, artificial intelligence and machine learning, virtual screening and pharmacophore modeling, proteomics and metabolomics, and network pharmacology and systems biology approaches. Some of the key features of the book are:

- Presents the strategies available for the development of drugs by drug repurposing approaches through various experimental and computational techniques for the treatment of difficult-to-treat, rare, and deadly diseases
- Summarizes the latest advances in the application of drug repurposing strategies, techniques, and approaches in the discovery and development of drugs
- Depicts drug development approaches from existing drug candidates and/or lead molecules through modern experimental assays, biophysical tools, and computational techniques

Written by a global team of experts, this book is useful for drug discovery scientists, drug developers, medicinal chemists, phytochemists, pharmacologists, clinicians, biochemists, biomedical scientists, healthcare professionals, researchers, teaching faculty, and students.

Alternative and Activist New Media Leah A. Lievrouw, 2023-04-20 Over the last four decades, new modes of communication have redefined people's engagement with media: media audiences are now also makers, influencers, followers, gamers, trolls, and data subjects. This turbulent social and technological context has created new opportunities for expression and activism around the world. In this fully revised second edition, Leah Lievrouw considers the shift toward algorithmic media for political and cultural activism online – where data capture and big data analytics are not just tools for managing and moving people or information, but are themselves sites of creativity, connection, and contention. The book examines a range of events and developments: anti-facial recognition projects; open-source intelligence in citizen journalism; and new apps based on encryption and DIY local networks that support movements such as Occupy and Black Lives Matter. *Alternative and Activist New Media*

charts the theoretical roots of contemporary internet-driven movements and provides a framework for understanding the changing face of protest in the age of algorithmic media. □This timely new edition will be a useful addition to any course on digital activism and new media and society.□
