**The War on Science** Chris Turner, 2013 A passionate and meticulously researched argument against the Harper government's war on science In this arresting and passionately argued indictment, award-winning journalist Chris Turner contends that Stephen Harper's attack on basic science, science communication, environmental regulations, and the environmental NGO community is the most vicious assault ever waged by a Canadian government on the fundamental principles of the Enlightenment. From the closure of Arctic research stations as oil drilling begins in the High Arctic to slashed research budgets in agriculture, dramatic changes to the nation's fisheries policy, and the muzzling of government scientists, Harper's government has effectively dismantled Canada's long-standing scientific tradition. Drawing on interviews with scientists whose work has been halted by budget cuts and their colleagues in an NGO community increasingly treated as an enemy of the state, *The War on Science* paints a vivid and damning portrait of a government that has abandoned environmental stewardship and severed a nation.

**Rogue Journal of Undergraduate Research, Issue 1** Kyle Pate,

Mass Shootings Jaclyn Schildkraut, H. Jaymi Elsass, 2016-02-22 This book provides readers and researchers with a critical examination of mass shootings as told by the media, offering research-based, factual answers to oft-asked questions and investigating common myths about these tragic events. When a mass shooting happens, the news media is flooded with headlines and breaking information about the shooters, victims, and acts themselves. What is notably absent in the news reporting are any concrete details that serve to inform news consumers how prevalent these mass shootings really are (or are not, when considering crime statistics as a whole), what legitimate causes for concern are, and how likely an individual is to be involved in such an incident. Instead, these events often are used as catalysts for conversations about larger issues such as gun control and mental health care reform. What critical points are we missing when the media focuses on only what people want to hear? This book explores the media attention to mass shootings and helps readers understand the problem of mass shootings and public gun violence from its inception to its existence in

contemporary society. It discusses how the issue is defined, its history, and its prevalence in both the United States and other countries, and provides an exploration of the responses to these events and strategies for the prevention of future violence. The book focuses on the myths purported about these unfortunate events, their victims, and their perpetrators through typical U.S. media coverage as well as evidence-based facts to contradict such narratives. The book's authors pay primary attention to contemporary shootings in the United States but also discuss early events dating back to the 1700s and those occurring internationally. The accessible writing enables readers of varying grade levels, including laypersons, to gain a more in-depth—and accurate—understanding of the context of mass shootings in the United States. As a result, readers will be better able to contribute to meaningful discussions related to mass shooting events and the resulting responses and policies.

**Communication and Language Analysis in the Public Sphere** Hart, Roderick P., 2014-01-31 Although, language is certainly individualized, most people conform to linguistic norms because of their surroundings. Over time, particular words and phrases are popularized by the media, social trends, or world events; and with emergence of internet technologies, the communication between all types of people is much easier. *Communication and Language Analysis in the Public Sphere* explores the influence of the World Wide Web on the relationships between ordinary citizens and the ability to communicate with politicians, celebrities, and the media. As some words may gain popularity worldwide, and others may begin to define a specific discipline. This book is essential for linguistics researchers, scholars, and professionals interested in determining these patterns and how they affect groups and individuals.

*The Future of Quality News Journalism* Peter Anderson, Michael Williams, George Ogola, 2013-09-23 In the face of the continuously changing challenges of the digital age, it is difficult for quality news journalism to survive on any significant scale if a means for adequately funding it is not available. This new study, a follow-up to 2007's *The Future of Journalism in the Advanced Democracies*, includes a comparative analysis of possible alternative business models that may save the future of the quality news business across the developed, intermediate, and developing worlds. Its detailed evaluation encompasses also the different ways in which wider key issues are affecting the prospects for quality news as a core ingredient of effectively working democracies. It focuses on the United States, the United Kingdom, South Africa, India, Kenya, and selected parts of the Arab World, providing a comprehensive cross-cultural survey of different approaches to addressing these various issues. To keep the study firmly rooted in the real world the contributors include distinguished practitioners as well as experienced academics.

**Higher Education Outcomes Assessment for the Twenty-First Century** Peter Hernon, Robert E. Dugan, Candy Schwartz, 2013-05-09 This book discusses recent trends in outcomes assessment, examines how state governments are reshaping the national discussion with higher education, and explains how libraries must respond to these changes. *Higher Education Outcomes Assessment for the Twenty-first Century* focuses on recent developments in outcomes assessment, especially from the perspectives of the federal government and state governments, as well as foundations

concerned about the state of higher education. The authors identify the significant changes that these stakeholders call for—information that academic librarians and anyone following outcomes assessment need to be aware of—and interpret the discussions to identify implications for libraries. Building upon the foundation of knowledge presented in the previous two Libraries Unlimited Outcomes Assessment in Higher Education titles, this book provides readers with up-to-date coverage of topics such as the emerging metrics used to define student and institutional success; the increased importance of accountability and the need to compare and assess the performance of programs and institutions rather than individual courses; and the shift in prioritizing student outcomes over student learning outcomes. The authors also spotlight the critical need for libraries to fit their role within the national discussion and suggest ways in which library managers and directors can play a role in redirecting the discussion to their benefit.

**Governig by fake news** Jacques Baud, 2023-03-07 What are Islamic State is seeking to create a civil war in France; that Syrian President Bashar al-Assad used chemical weapons; that Vladimir Putin is trying to destabilise our democracies; that terrorism has struck France, not for what it does, but for what it is; that the genocide in Darfur has claimed 400,000 victims?... Literally none, but these assertions are enough to establish the foreign policy of Western countries. The author, a former agent of the Swiss strategic intelligence service, reviews the main contemporary conflicts that Western countries have managed with fake news over the last thirty years. Jacques Baud, a colonel, chemical and nuclear weapons expert, trained in counter-terrorism and counter-guerrilla warfare, designed the Geneva International Centre for Humanitarian Demining (GICHD) and its Information Management System for Mine Action (IMSMA). In the service of the United Nations, he served as Chief of Doctrine for Peacekeeping Operations in New York, and was engaged in Africa. In NATO, he led the fight against the proliferation of small arms. He is the author of several books on intelligence, asymmetric warfare and terrorism.

**Social Media at BBC News** Valerie Belair-Gagnon, 2015-02-11 Since the emergence of social media in the journalistic landscape, the BBC has sought to produce reporting more connected to its audience while retaining its authority as a public broadcaster in crisis reporting. Using empirical analysis of crisis news production at the BBC, this book shows that the emergence of social media at the BBC and the need to manage this kind of material led to a new media logic in which tech-savvy journalists take on a new centrality in the newsroom. In this changed context, the politico-economic and socio-cultural logic have led to a more connected newsroom involving this new breed of journalists and BBC audience. This examination of news production events shows that in the midst of transformations in journalistic practices and norms, including newsgathering, sourcing, distribution and impartiality, the BBC has reasserted its authority as a public broadcaster. **Reviving Rural News** Teri Finneman, Nick Mathews, Patrick Ferrucci, 2024-02-02 Based on extensive research into weekly rural publishers and rural readers, *Reviving Rural News* demonstrates that a new financial approach to community journalism is urgently needed and viable. This book provides historical context for the state of local news, examines the influence of journalistic identity and boundaries that have prevented change, and offers

practical guidance on how to adapt the financial strategies of weekly newspapers to the habits of modern readers. Findings are grounded in robust data collection, including surveys, focus groups, and a year-long oral history study of a small weekly newspaper group in the United States. A new model known as Press Club is presented as a template via which memberships, events, and newsletters can better engage community journalism with its audiences and create a more sustainable path for the future. Reviving Rural News will be of interest to advanced students and researchers of local, community, and rural journalism as well as practitioners looking to bring about real-world change in journalism organizations.

**Free to Judge** Michael Kang, Joanna Shepherd, 2023-08-22 The idea that wealthy people use their money to influence things, including politics, law, and media will surprise very few people. However, as Michael S. Kang and Joanna Shepherd argue in this readable and rich study of the state judiciary, the effect of money on judicial outcomes should disturb and anger everyone. In the current system that elects state judges, the rich and powerful can spend money to elect and re-elect judges who decide cases the way they want. Free to Judge is about how and why money increasingly affects the dispensation of justice in our legal system, and what can be done to stop it. One of the barriers to action in the past has been an inability to prove that campaign donations influence state judicial decision-making. In this book, Kang and Shepherd answer that challenge for the first time, with a rigorous empirical study of campaign finance and judicial decision-making data. Pairing this with interviews of past and present judges, they create a compelling and persuasive account of people like Marsha Ternus, the first Iowa state supreme court justice to be voted out of office after her decision in a same-sex marriage case. The threat of such an outcome, and the desire to win reelection, results in judges demonstrably leaning towards the interests and preferences of their campaign donors across all cases. Free to Judge is thus able to identify the pieces of our current system that invite bias, such as judicial reelection, and what reforms should focus on. This thoughtful and compellingly written book will be required reading for anybody who cares about creating a more just legal system.
