*Governing the dead* Finn Stepputat, 2016-05-16 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. In most of the world, the transition from life to death is a time of intense presence of states and other forms of authority. Focusing on the relationship between bodies and sovereignty, *Governing the dead* explores how, by whom and with what effects dead bodies are governed in conflict and non-conflict contexts across the world, including an analysis of the struggles over 'proper burials'; the repatriation of dead migrants; abandoned cemeteries; exhumations; 'femicide'; the protection of dead drug-lords; and the disappeared dead. Mapping theoretical and empirical terrains, this volume suggests that the management of dead bodies is related to the constitution and membership of states and non-state entities that claim autonomy and impunity. This volume is a significant contribution to studies of death, power and politics. It will be useful at both undergraduate and postgraduate levels in anthropology, sociology, law, criminology, political science, international relations, genocide studies, history, cultural studies and philosophy. The research program leading to this publication has received funding from the European Research Council under the European Union's Seventh Framework Programme (FP/2007-2013) / ERC Grant Agreement n° 283-617.

Personalisation in Mass Media Communication Daniela Landert, 2014-02-04 It seems to be a truism that today's news media present the news in a more personal and direct way than print newspapers some twenty-five years ago. However, it is far from obvious, how this can be described linguistically. This study develops a model that integrates and differentiates between the various facets of personalisation from a linguistic point of view. It includes 1) contexts that involve the audience by inviting direct interaction and through the use of visual elements; 2) the focus on private individuals who are personally affected by news events; and 3) the use of communicative immediacy, for instance in the form of direct speech and first and second person pronouns. This model is applied to data from five British online news sites, demonstrating how individual features contribute to personalisation, how different features interact, and what personalisation strategies are used by news sites of different market orientations.

*The Handbook of Comparative Communication Research* Frank Esser, Thomas Hanitzsch, 2013-06-19 The Handbook of Comparative Communication Research aims to provide a comprehensive understanding of comparative communication research. It fills an obvious gap in the literature and offers an extensive and interdisciplinary discussion of the general approach of comparative research, its prospect and problems as well as its applications in crucial sub-fields of communications. The first part of the volume charts the state of the art in the field; the second section introduces relevant areas of communication studies where the comparative approach has been successfully applied in recent years; the third part offers an analytical review of conceptual and methodological issues; and the last section proposes a roadmap for future research.

*Protests as Events* Ian R. Lamond, Karl Spracklen, 2014-11-05 *Protests as Events: Politics, Activism and Leisure* is an edited collection that explores activism as a leisure activity and protests as events.

**A Companion to the Anthropology of Death** Antonius C. G. M. Robben, 2018-05-11 A thought-provoking examination of death, dying, and the afterlife. Prominent scholars present their most recent work about mortuary rituals, grief and mourning, genocide, cyclical processes of life and death, biomedical developments, and the materiality of human corpses in this unique and illuminating book. Interrogating our most common practices surrounding death, the authors ask such questions as: How does the state wrest away control over the dead from bereaved relatives? Why do many mourners refuse to cut their emotional ties to the dead and nurture lasting bonds? Is death a final condition or can human remains acquire agency? The book is a refreshing reassessment of these issues and practices, a source of theoretical inspiration in the study of death. With contributions written by an international team of experts in their fields, *A Companion to the Anthropology of Death* is presented in six parts and covers such subjects as: *Governing the Dead in Guatemala*; *After Death Communications (ADCs) in North America*; *Cryonic Suspension in the Secular Age*; *Blood and Organ*

Donation in China; The Fragility of Biomedicine; and more. A Companion to the Anthropology of Death is a comprehensive and accessible volume and an ideal resource for senior undergraduate and graduate students in courses such as Anthropology of Death, Medical Anthropology, Anthropology of Violence, Anthropology of the Body, and Political Anthropology. Written by leading international scholars in their fields A comprehensive survey of the most recent empirical research in the anthropology of death A fundamental critique of the early 20th century founding fathers of the anthropology of death Cross-cultural texts from tribal and industrial societies The collection is of interest to anyone concerned with the consequences of the state and massive violence on life and death

**Changing the News** Wilson Lowrey,Peter J. Gade,2012-01-25 Changing the News examines the difficulties in changing news processes and practices in response to the evolving circumstances and struggles of the journalism industry. It details the forces that shape and challenge journalism and journalistic culture, and explains why journalists and their organizations respond to troubles, challenges and uncertainties in the way they do.

News, Numbers and Public Opinion in a Data-Driven World An Nguyen,2017-12-28 From the quality of the air we breathe to the national leaders we choose, data and statistics are a pervasive feature of daily life and daily news. But how do news, numbers and public opinion interact with each other – and with what impacts on society at large? Featuring an international roster of established and emerging scholars, this book is the first comprehensive collection of research into the little understood processes underpinning the uses/misuses of statistical information in journalism and their socio-psychological and political effects. Moving beyond the hype around data journalism, News, Numbers and Public Opinion delves into a range of more latent, fundamental questions such as: · Is it true that most citizens and journalists do not have the necessary skills and resources to critically process and assess numbers? · How do/should journalists make sense of the increasingly data-driven world? · What strategies, formats and frames do journalists use to gather and represent different types of statistical data in their stories? · What are the socio-psychological and political effects of such data gathering and representation routines, formats and frames on the way people acquire knowledge and form attitudes? · What skills and resources do journalists and publics need to deal effectively with the influx of numbers into in daily work and life – and how can newsrooms and journalism schools meet that need? The book is a must-read for not only journalists, journalism and media scholars, statisticians and data scientists but also anybody interested in the interplay between journalism, statistics and society.

Analyzing Media Messages Daniel Riffe,Stephen Lacy,Frederick Fico,2014-02-05 Analyzing Media Messages is a primer for learning the technique of systematic, quantitative analysis of communication content. Rich with examples of recent and classic applications, it provides solutions to problems encountered in conducting content analysis, and it is written so that students can readily understand and apply the techniques. This thoroughly revised third edition includes current and engaging examples for today's students, in addition to a number of historically important cases. It emphasizes communication of visual imagery and studies of advertising content. Resources on the book's companion website provide additional materials for students and instructors, including existing protocols, web links, and a bibliography of content analysis methods articles. This volume is intended for use as a primary text for content analysis coursework, or as a supplemental text in research methods courses. It is also an indispensable reference for researchers in mass media fields, political science, and other social and behavioral sciences.

**Communication and Media Ethics** Patrick Lee Plaisance,2018-09-10 Ethics in communication and media has arguably reached a pivotal stage of maturity in the last decade, moving from disparate lines of inquiry to a theory-driven, interdisciplinary field presenting normative frameworks and philosophical explications for communicative practices. The intent of this volume is to present this maturation, to reflect the vibrant state of ethics

theorizing and to illuminate promising pathways for future research.

**International Challenges in Investment Arbitration** Mesut Akbaba, Giancarlo Capurro, 2018-10-03 As the proverbial workhorse of international economic law, investment arbitration is heavily relied upon around the globe. It has to cope with the demands of increasingly complex proceedings. At the same time, investment arbitration has come under close public scrutiny in the midst of heated political debate. Both of these factors have led to the field of investment protection being subject to continuous changes. Therefore, it presents an abundance of challenges in its interpretation and application. While these challenges are often deeply rooted in the doctrinal foundations of international law, they similarly surface during live arbitral proceedings. *International Challenges in Investment Arbitration* serves not only as a collection of recently debated issues in investment law; it also deals with the underlying fundamental questions at the intersection of investment arbitration and international law. The book is the product of the 1st Bucerius Law Journal Conference on International Investment Law & Arbitration. It combines the current state of knowledge, new perspectives on the topic as well as practical issues and will be of interest to researchers, academics and practitioners in the fields of international investment law, international economic law, regulation and comparative law.

**Media and Social Inequality** John C. Pollock, 2014-06-11 This book is among the first to systematically explore the impact of community inequality on reporting political and social change. Although most journalism scholars are still fascinated by the impact of media on society, *Media and Social Inequality* explores the reverse perspective: the impact of society on media. Using a 'community structure' approach, and rejecting the perspective that studies of media and audiences can be reduced to the individual level of psychological phenomena, all contributions examine connections between community-level 'macro' characteristics and variations in the coverage of critical issues. This innovative book differs from previous community structure volumes in two ways. First, contributions explore a far wider range of community characteristics by employing creative methodologies, modern archives, and databases that facilitate larger, more diverse samples; multilevel and longitudinal analyses; composite measures of both 'content' and editorial judgment; new technologies; and social network analysis. Second, a traditional emphasis on media as instruments of political and social 'control' is replaced by media as potential mirrors of social 'change,' exploring 'bottom-up' measures of 'vulnerability', 'concentrated disadvantage', and 'ethnic diversity/pluralism'. The volume contains two original chapters: one on nationwide US coverage of the Occupy movement in the expanded introduction, and another on nationwide US coverage of universal health care. This book was originally published as a special issue of *Mass Communication and Society*.

**Newspaper Journalism** Peter Cole, Tony Harcup, 2009-11-13 Are newspapers faced with an existential threat or are they changing to meet the challenges of a digital world? With the newspaper's role in a state of fundamental redefinition, *Newspaper Journalism* offers a timely and up to the minute analysis of newspapers today, in the context of their historical importance to society. Drawing on their extensive experience in academia and also across local, national, mainstream and alternative newspapers, Cole and Harcup write clearly and engagingly from both industry and scholarly perspectives, and contend that, far from dying, newspapers are doing what they have always done: adapting to a changing environment. This text is essential reading for all students of the press, with comprehensive and critical coverage of the most important debates in the study of newspaper journalism - from ethics and investigative journalism to political economy and the future of the industry. Given the shifting boundaries and central importance of newspapers, it will be of interest to all students of journalism and the media. Praise for the Journalism Studies: Key Texts series: 'It is easy to describe a good textbook for a specific journalistic format... The ideal book has to satisfy a list of requirements that are also bullet-pointed in journalism assignment outlines. A text has to: synthesize the existing body of knowledge; explain concepts clearly; have a logical order of topics; and provide enough information and directions to pursue further study. One may also hope it would include real life examples and be lucid, vivid and a

pleasure to read. Hard to find? Not anymore. The new SAGE series Journalism Studies: Key Texts satisfies the main requirements on the list. Carefully planned and meticulously edited by Martin Conboy, David Finkelstein and Bob Franklin, the textbook series is a welcome contribution to the literature of journalism studies... All three books follow the same structural template: an overview of historical development; explication of the political and economic frameworks within particular types of journalism; a review of contemporary practices; social demographics; a comparative analysis of practices around the world; a summary of main conceptual approaches; an indication of future directions; recommendations for further reading. This strong organization resembles a template for a course outline. This is intentional because the series is aimed both at students and their practice-based lecturers, who often come straight from industry and need time to adjust to the academic environment... [The series] achieves its aim to bridge the sometimes too evident dissonance between journalism theory and practice... They successfully situate discussions about journalism in social and historical contexts. We see the faces of individual journalists, the circumstances of news production, the relationship with owners, the battle between the public service and the profit nature of news, the relevance of journalism work. The detailed account of the conditions under which newspaper, radio and alternative journalism is produced and performed make the Journalism Studies: Key Texts series mandatory reading for both journalism students and their lecturers' - Verica Rupar, Journalism Studies

**The Routledge Handbook of Magazine Research** David Abrahamson, Marcia R. Prior-Miller, 2015-06-05 Scholarly engagement with the magazine form has, in the last two decades, produced a substantial amount of valuable research. Authored by leading academic authorities in the study of magazines, the chapters in The Routledge Handbook of Magazine Research not only create an architecture to organize and archive the developing field of magazine research, but also suggest new avenues of future investigation. Each of 33 chapters surveys the last 20 years of scholarship in its subject area, identifying the major research themes, theoretical developments and interpretive breakthroughs. Exploration of the digital challenges and opportunities which currently face the magazine world are woven throughout, offering readers a deeper understanding of the magazine form, as well as of the sociocultural realities it both mirrors and influences. The book includes six sections: -Methodologies and structures presents theories and models for magazine research in an evolving, global context. -Magazine publishing: the people and the work introduces the roles and practices of those involved in the editorial and business sides of magazine publishing. -Magazines as textual communication surveys the field of contemporary magazines across a range of theoretical perspectives, subjects, genre and format questions. -Magazines as visual communication explores cover design, photography, illustrations and interactivity. -Pedagogical and curricular perspectives offers insights on undergraduate and graduate teaching topics in magazine research. -The future of the magazine form speculates on the changing nature of magazine research via its environmental effects, audience, and transforming platforms.

**Encyclopedia of Journalism** Christopher H. Sterling, 2009-09-23 Written in a clear and accessible style that would suit the needs of journalists and scholars alike, this encyclopedia is highly recommended for large news organizations and all schools of journalism. —Starred Review, Library Journal Journalism permeates our lives and shapes our thoughts in ways we've long taken for granted. Whether we listen to National Public Radio in the morning, view the lead story on the Today show, read the morning newspaper headlines, stay up-to-the-minute with Internet news, browse grocery store tabloids, receive Time magazine in our mailbox, or watch the nightly news on television, journalism pervades our daily activities. The six-volume Encyclopedia of Journalism covers all significant dimensions of journalism, including print, broadcast, and Internet journalism; U.S. and international perspectives; history; technology; legal issues and court cases; ownership; and economics. The set contains more than 350 signed entries under the direction of leading journalism scholar Christopher H. Sterling of The George Washington University. In the A-to-Z volumes 1 through 4, both scholars and journalists contribute articles that span the field's wide spectrum of topics, from design, editing, advertising, and marketing to libel, censorship,

First Amendment rights, and bias to digital manipulation, media hoaxes, political cartoonists, and secrecy and leaks. Also covered are recently emerging media such as podcasting, blogs, and chat rooms. The last two volumes contain a thorough listing of journalism awards and prizes, a lengthy section on journalism freedom around the world, an annotated bibliography, and key documents. The latter, edited by Glenn Lewis of CUNY Graduate School of Journalism and York College/CUNY, comprises dozens of primary documents involving codes of ethics, media and the law, and future changes in store for journalism education. *Education Is Upside-Down* Eric Kalenze, 2014-10-08 *Education Is Upside Down* cuts through adjustments being made at technical levels of educational practice and accountability, challenging ideals and philosophies that have powered American Education for most of the last century. This book explains how and why long-standing approaches generate flawed instructional practices, flawed systemic reform efforts, and a fundamental misalignment between the educational institution and the society it is missioned to serve. *Education Is Upside Down* urges readers wishing to improve American Education to more carefully consider the institution's central mission, challenge long-accepted truths of practice, and question current reform efforts and actions. In full, *Education Is Upside Down* resists the practitioner-vs.-reformer blame game, seeking ultimately to carefully untangle—not tighten by yanking on any single strand—the long-complicated knot of American Education.
