Math Magician Prof N L Shraman,2020-05-04 Is math really that important in our day to day life? After all we do have calculators to do math for us, right? Having calculators, small enough to carry in our shirt pocket, is not a good reason to discount the advantage of knowing how to do math in our head on a daily basis. We have become lazy in our daily routine as new inventions have been developed. By using the strategies in this course you will begin to have an overwhelming feeling of how easy and fun math can be. If you are a student, whether it be elementary, middle school, high school or college, you will be able to apply the strategies taught in this course to your life each and every day. After a couple hours of practice with these strategies you will have a whole new way of looking at math and it will no doubt change the way you look at figures for the rest of your life. Your confidence to study and excel in all subjects after applying our strategies will be dramatically increased. If you are a parent, you will see a more confident child which is something every concerned parent wishes for. If you are not a parent read through this next example on your own, it will prove a strong point, that even the toughest of math problems can be made easy if it is approached differently.
