*Meet the German Shepherd* ,2011-10-18 The first official publication endorsed by the American Kennel Club (AKC) to celebrate this remarkably talented and multi-faceted breed, *Meet the German Shepherd* is the ideal introduction for new owners. German Shepherds have served humankind in various capacities over the years, including work as a police dog, military dog, search and rescue dog, herding dog, competition dog, guard dog and companion dog. Few breeds can boast as many devoted fans as the GSD. This colorful and useful owner's guide is divided into eleven chapters, which offer authoritative and accurate information on the breed's history as a working dog, characteristics, and special requirements for owning a dog as active and intelligent as the GSD. All titles in the American Kennel Club's *Meet the Breed* series are heavily illustrated with beautiful color images of well-bred puppies and handsome adults, a true feast for the eyes of any lover of this breed. A chapter devoted to the purchase and selection of the GSD puppy gives the reader specific guidance on how to locate a qualified breeder and to recognize a healthy, sound puppy. Individual chapters on house-training and basic obedience serve as a crash course in positive-training techniques, the AKC's only recommended way of training dogs. Chapters on exercise, grooming, feeding, and healthcare

present indispensable information for new dog owners. As an official publication of the AKC produced in conjunction with the German Shepherd Dog Club of America, Meet the German Shepherd also explains the many vital programs offered by the country's leading canine organization to all pet dog owners, including the S.T.A.R. Puppy and the Canine Good Citizen programs, as well as descriptions of various dog sports such as conformation showing, agility, herding, obedience and more. A detailed resources section offers recommendations for websites, books, periodicals, and club affiliate programs, all of great interest to responsible new dog owners.

*Journal of Elder Policy* Eva Kahana,2020-06-21  
The Journal of Elder Policy (JEP) aims to offer a forum for innovative thinking, theorizing, program planning and empirical research relevant to elder policy. We seek to publish informative articles relevant to policies that enhance quality of life and well-being of older adults including the old-old. Why a new interdisciplinary journal about old age and policy? The study of age is thriving as the scientific community works to identify and study the changing circumstances and options in later life among new cohorts of older adults. The welfare of older adults is importantly influenced by social changes, including policy arrangements, impacting both the young and old. We seek to understand factors that shape family supports available to those with needs for medical and social care in late life. We will apply diverse

disciplinary lenses to explore the social forces that shape elder policy and affect what care providers can offer and sustain. Current policies and service programs to protect the growing old-old population are often inadequate to ensure a good old age. The organization and delivery of medical care poses major challenges to older adults with co-morbid conditions and disabilities. Income inequalities put low SES individuals at greater risks in old age. Strains on policy systems and inadequate resources limit care of the old-old population. But there is also great opportunity at hand as exemplified by technological advances and breakthroughs. We aim to call attention to these issues and propose improved policies that are informed by sound research in the US and around the world.

*The Drosophila Model in Cancer* Wu-Min Deng,2019-09-13 This volume provides a series of review articles that capture the advances in using the fruit fly, *Drosophila melanogaster*, model system to address a wide range of cancer-related topics. Articles in this book provide case studies that shed light on the intricate cellular and

molecular mechanisms underlying tumor formation and progression. Readers will discover the beauty of the fly model's genetic simplicity and the vast arsenal of powerful genetic tools enabling its efficient and adaptable use. This model organism has provided a unique opportunity to address questions regarding cancer initiation and development that would be extremely challenging in other model systems. This book provides a useful resource for a researcher who wishes to learn about and apply the *Drosophila* model to tackle fundamental questions in cancer biology, and to find new ways to fight against this devastating disease.

**Polyoxometalate Chemistry** Francis Secheresse, 2013 The book highlights recent prominent results in the domain of the synthesis of new polyoxometalates with a specific attention

to polyoxothioanions, and provides some novelties and perspectives in selected domains such as magnetism, luminescence and nanochemistry, and macroions self-assembly in solutions. The case of OC one-pot OC syntheses often used and reported in POMs synthesis is studied in terms of more complex solution speciation processes related to highly dynamical situation connected to factors such as pH, ionic strength, reaction time, temperature, counterion nature, concentration of starting materials, presence of electron donors and redox potentials. The behavior of macroions (2nm-6nm size range) in solution is shown to be quite different from the simple ionic solution or colloidal systems (Debye-Hückel model). Their self-assembling into a single-layered, spherical, hollow vesicle structure, namely the OC blackberry structure, is clearly described. Examples of spin clusters with tunable interactions are given and single molecule magnets based on POMs are specifically tackled. Besides paramagnetic transition metal centres and lanthanoid ions encapsulated in archetypal lacunary polyoxoanions, magnetically functionalized Klenzmannates are described, their discovery tracing back nearly 15 years.

**Manufactured Fibre Technology** V.B. Gupta, V.K. Kothari, 2012-12-06 Manufactured Fibre Technology provides an accessible and comprehensive treatment of the chemical, physical and mechanical processes involved in the production of all important commodity manufactured fibres and most of the industrial fibres. The emphasis is on the fundamental principles and industrial aspects of

production. Latest developments in manufactured fibres in terms of manufacturing processes, characteristics and their applications are also covered. Manufactured Fibre Technology is designed around twenty chapters with a balance of basic principles and production of specific fibre types. Newer and industrially relevant areas such as high speed spinning, production of speciality fibres (including microfibres), computer simulation of spinning, high performance fibres, spun-bonding and melt-blowing, and re-use of fibre waste are included. The structure, property and application areas of each fibre type are also discussed, thus providing a broad understanding of the subject. In addition, various aspects related to the testing and characterisation of fibres and polymers are reviewed. This book is an invaluable resource to students, lecturers, industrial technologists and researchers in this subject area.

**Heteropoly and Isopoly Oxometalates** Michael Pope, 2013-01-14 Combined oxygen, in the form of water, metal oxides, silicates and other oxyions, accounts for about 50% by weight of the earth's crust. The chemistry of this most abundant element has two major aspects: that of water and aqueous solutions of electrolytes, and that of the solid state. The methodology and techniques appropriate for the study of these fields are sufficiently different that there have been very few points of contact between solution- and solid state chemists. One such contact, of great potential value, is provided by the extensive class of polyoxoanions formed by the transition metals of groups 5 and 6. As 'heteropoly and isopoly acids'

these polyanions have been known and investigated for more than a century. The present book is an attempt to survey the chemistry, structures, and applications of these species. Although the book forms part of a series in inorganic chemistry, the field of polyoxometalates deserves wider attention, for example, from organic chemists, especially those concerned with homogeneous and heterogeneous catalysis, and from biochemists, solid state- and materials scientists.

**Free Liquid Jets and Films** Alexander L.

Yarin, 1993 An examination of the hydrodynamics of free liquid jets and the films of viscous and rheologically complex (in particular, polymeric) liquids. Offering a unique and comprehensive coverage of an important topic, this volume will be invaluable for all those involved in applied mathematics, computational fluid mechanics, hydrodynamics, rheology, applied physics, as well as chemical and mechanical engineering.

*Public Guardianship* Pamela B. Teaster, Winsor C. Schmidt Jr., Susan A. Lawrence Ph.D., Marta S. Mendiondo, Erica F. Wood, 2010-02-09 This book offers the first full examination of the legal role of public guardianship in 25 years, comparing current conditions to those when the last study was published in 1981. *Public Guardianship: In the Best Interests of Incapacitated People?* is written to advance public understanding of what happens to disabled and elderly adults when no family member or friend is available to be a caregiver or guardian should it become necessary. It is the first major study on this critically important issue since 1981. Conducted by experts in

gerontology, social work, public policy, and public health, it finds that, although progress has been made, guardianship programs around the country still are hampered by limited staff and resources. Public Guardianship analyzes the full range of state statutes governing guardianship, including guardian eligibility, investigation, due process, rights, powers, costs, and monitoring. The authors report their case studies of public guardianship programs, marshaling and comparing field data from their surveys of stakeholders in ten states. The book concludes with a variety of recommendations for improving guardianship programs, including the authors' Model Public Guardian Act.
