The Flying Tigers Sam Kleiner, 2022-03-01 The thrilling story behind the American pilots who were secretly recruited to defend the nation's desperate Chinese allies before Pearl Harbor and ended up on the front lines of the war against the Japanese in the Pacific. Sam Kleiner's *The Flying Tigers* uncovers the hidden story of the group of young American men and women who crossed the Pacific before Pearl Harbor to risk their lives defending China. Led by legendary army pilot Claire Chennault, these men left behind an America still at peace in the summer of 1941 using false identities to travel across the Pacific to a run-down airbase in the jungles of Burma. In the wake of the disaster at Pearl Harbor this motley crew was the first group of Americans to take on the Japanese in combat, shooting down hundreds of Japanese aircraft in the skies over Burma, Thailand, and China. At a time when the Allies were being defeated across the globe, the Flying Tigers' exploits gave hope to Americans and Chinese alike. Kleiner takes readers into the cockpits of their iconic shark-nosed P-40 planes—one of the most familiar images of the war—as the Tigers perform nail-biting missions against the Japanese. He profiles the outsize personalities involved in the operation, including Chennault, whose aggressive tactics went against the prevailing wisdom of military strategy; Greg "Pappy" Boyington, the man who

would become the nation's most beloved pilot until he was shot down and became a POW; Emma Foster, one of the nurses in the unit who had a passionate romance with a pilot named John Petach; and Madame Chiang Kai-shek herself, who first brought Chennault to China and who would come to visit these young Americans. A dramatic story of a covert operation whose very existence would have scandalized an isolationist United States, *The Flying Tigers* is the unforgettable account of a group of Americans whose heroism changed the world, and who cemented an alliance between the United States and China as both nations fought against seemingly insurmountable odds.

Seeing Islam as Others Saw It: A Survey and Evaluation of Christian, Jewish and Zoroastrian Writings on Early Islam Robert G. Hoyland, 2014-01-10 This book offers a new approach to the vexing question of how to write the early history of Islam. The first part discusses the nature of the Muslim and non-Muslim source material for the seventh- and eighth-century Middle East and argues that by lessening the divide between these two traditions, which has largely been erected by modern scholarship, we can come to a better appreciation of this crucial period. The second part gives a detailed survey of sources and an analysis of some 120 non-Muslim texts, all of which provide information about the first century and a half of Islam (roughly A.D. 620-780). The third part furnishes examples, according to the approach suggested in the first part and with the material presented in the second part, how one might write the history of this time. The fourth part takes the form of excursions on various topics, such as the process of Islamization, the phenomenon of conversion to Islam, the development of techniques for determining the direction of prayer, and the conquest of Egypt. Because this work views Islamic history with the aid of non-Muslim texts and assesses the latter in the light of Muslim writings, it will be essential reading for historians of Islam, Christianity, Judaism, or Zoroastrianism--indeed, for all those with an interest in cultures of the eastern

Mediterranean in its traditional phase from Late Antiquity to medieval times.

Animal Cell Culture Mohamed Al-Rubeai, 2014-11-28 Animal cells are the preferred “cell factories” for the production of complex molecules and antibodies for use as prophylactics, therapeutics or diagnostics. Animal cells are required for the correct post-translational processing (including glycosylation) of biopharmaceutical protein products. They are used for the production of viral vectors for gene therapy. Major targets for this therapy include cancer, HIV, arthritis, cardiovascular and CNS diseases and cystic fibrosis. Animal cells are used as in vitro substrates in pharmacological and toxicological studies. This book is designed to serve as a comprehensive review of animal cell culture, covering the current status of both research and applications. For the student or R&D scientist or new researcher the protocols are central to the performance of cell culture work, yet a broad understanding is essential for translation of laboratory findings into the industrial production. Within the broad scope of the book, each topic is reviewed authoritatively by experts in the field to produce state-of-the-art collection of current research. A major reference volume on cell culture research and how it impacts on production of biopharmaceutical proteins worldwide, the book is essential reading for everyone working in cell culture and is a recommended volume for all biotechnology libraries.

Fumbling the Future Douglas K. Smith, 1999-06-01 Ask consumers and users what names they associate with the multibillion dollar personal computer market, and they will answer IBM, Apple, Tandy, or Lotus. The more knowledgeable of them will add the likes of Microsoft, Ashton-Tate, Compaq, and Borland. But no one will say Xerox. Fifteen years after it invented personal computing, Xerox still means copy. *Fumbling the Future* tells how one of America's leading corporations invented the technology for one of the fastest-growing products of recent times, then miscalculated and

mishandled the opportunity to fully exploit it. It is a classic story of how innovation can fare within large corporate structures, the real-life odyssey of what can happen to an idea as it travels from inspiration to implementation. More than anything, *Fumbling the Future* is a tale of human beings whose talents, hopes, fears, habits, and prejudices determine the fate of our largest organizations and of our best ideas. In an era in which technological creativity and economic change are so critical to the competitiveness of the American economy, *Fumbling the Future* is a parable for our times.

Arabs and Empires Before Islam Greg Fisher, 2015 *Arabs and Empires before Islam* illuminates the history of the Arabs before the emergence of Islam, collating nearly 250 translated extracts from an extensive array of ancient sources. Drawn from a broad period between the eighth century BC and the Middle Ages, the sources include texts originally written in Greek, Latin, Syriac, Persian, and Arabic, inscriptions in a variety of languages and alphabets, and discussions of archaeological sites from across the Near East. More than twenty international experts from the fields of archaeology, classics and ancient history, linguistics and philology, epigraphy, and art history provide detailed commentary on and analysis of this diverse selection of material. Richly illustrated with sixteen colour plates, fifteen maps, and over seventy in-text images, the volume provides a comprehensive, wide-ranging, and up-to-date examination of what ancient sources had to say about the politics, culture, and religion of the Arabs in the pre-Islamic period. It offers a full consideration of the traces which the Arabs have left in the epigraphic, literary, and archaeological records, and sheds light on their relationship with their often more-powerful neighbours: the states and empires of the ancient Near East. *Arabs and Empires before Islam* gathers together a host of material never before collected into a single volume--some of which appears in English translation for the very first time--and provides a single point of reference for a vibrant and dynamic area of research.
