The Unending Mystery David W. McCullough,2007-12-18 According to legend, anyone who wandered into the labyrinth in Ancient Crete never came out again. Some labyrinths may have offered patterns for an erotic spring dance. Those on the floors of Medieval cathedrals represent mathematical perfection—and walking their paths was a symbolic approach to the divine. From ancient Mediterranean coin patterns to the great French cathedral labyrinths to contemporary cornfield mazes, labyrinths and mazes have appeared all over the world, but never have so many been created as in today's revival, on farms, and in parks, churches, hospitals, and spas across the country. In his charmingly quirky investigation of an image that has inspired countless beautiful patterns and mysterious practices, David Willis McCullough offers an irresistible way to enjoy their enduring appeal.

Mazebook Jeff Lemire,2022-07-05 From New York Times bestselling and Eisner award-winning Black Hammer creator Jeff Lemire comes this ambitious and haunting graphic novel about family, mourning, and reality. A lonely building inspector still grieving the loss of his puzzle-loving daughter receives a mysterious phone call one night from a girl claiming it's her and that she's trapped in the middle of a

labyrinth. Convinced that this child is contacting him from beyond this world, he uses an unfinished maze from one of her journals and a map of the city to trace an intricate path through a different plane of reality on an intense and melancholy adventure to bring his daughter back home. Collects issues #1-5 of The Mazebook and featuring a sketchbook section and pinups by Andrea Sorrentino, Dustin Nguyen, Dean Ormston, Matt Kindt, and Gabriel Hernández Walta!

Navigating the Maze Michael S. Lubell, 2019-04-06 Navigating the Maze: How Science and Technology Policies Shape America and the World offers a captivating deep dive into the inner workings of the world of public policy. Written by prominent science advocate and renowned physics researcher and educator, Michael S. Lubell, this valuable book provides insights and real-world examples for anyone looking to

understand how policy works in reality: for students, scientists, and the public. Well-organized and featuring a compelling historical narrative, this unique resource will enable researchers, educators, elected officials, industrialists, financial managers, science lobbyists, and readers in general to easily navigate the complex world of science and technology (S&T) policy. As science communication and STEM policy occupy rapidly growing areas of interest and provide important career paths, this book provides invaluable insights into the public policy arena, as well as lessons for effective science advocacy. Presents compelling narratives about Climate Change, the Internet, the Human Genome, the BRAIN Initiative, the Manhattan Project, the Science Stimulus, the origin of the National Institutes of Health and the National Science Foundation, and more. Provides insights into the future of S&T through a 225-year American policy retrospective, highlighting impacts on health and medicine, STEM education, economic growth, energy, defense, innovation, and industrial competitiveness. Illuminates the role of S&T on the global stage, from diplomatic engagement to military intervention and from scientific collaboration to technological competition.

Myth and the Creative Process Jacob E. Nyenhuis, 2003 An original inquiry into how the artistic psyche interacts with myth; includes a catalogue of the works of British artist Michael Ayrton.

The Maze of Fantasy in Tamil Folktales Gabriella Eichinger Ferro-Luzzi, 2002 The book pursues an ethnographic and a theoretical purpose. The ethnographic first part examines how Tamil folktales, mostly gathered and published by Tamil authors, reflect Tamil culture. However, since the narrators want to amuse their listeners and arouse their interest they tend to exaggerate or invert the normal situation.

Therefore, their tales reflect more reliably Tamil values, beliefs and interest than social behaviour. The second theoretical part stresses the importance of the actually occurring motifs and casts doubt on typology. Rather than artificially distinguishing tale types, often thought to exist independent of the narrators, it points out a network of thematic connections among Tamil folktales.

Written in Stone Rosanne Parry, 2014-06-10 Rosanne Parry, acclaimed author of *A Wolf Called Wander* and *Heart of a Shepherd*, shines a light on Native American tribes of the Pacific Northwest in the 1920s, a time of critical cultural upheaval. Pearl has always dreamed of hunting whales, just like her father. Of taking to the sea in their eight-man canoe, standing at the prow with a harpoon, and waiting for a whale to lift its barnacle-speckled head as it offers its life for the life of the tribe. But now that can never be. Pearl's father was lost on the last hunt, and the whales hide from the great steam-powered ships carrying harpoon cannons, which harvest not one but dozens of whales from the ocean. With the whales gone, Pearl's people, the Makah, struggle to survive as Pearl searches for ways to preserve their stories and skills.

The Maze of Banking Gary B. Gorton, 2015-03-03 After the financial crisis of 2007-2008, analysts continue to question the security of banking sectors in nations in Europe, Latin America, Asia, and Africa. Why do such crises recur? What is it about the accumulation of bank debt that potentially jeopardizes national and global banking systems? There is no one better-equipped to answer such questions than Gary Gorton, who has been studying financial crises since his PhD thesis in 1983. *The Maze of Banking* contains a collection of his academic papers on the subjects of banks, banking, and financial crises. The papers in this volume span almost 175 years of U.S. banking history, from pre-U.S. Civil War private bank notes issued

during the U.S. Free Banking Era (1837-1863), followed by the U.S. National Banking Era (1863-1914) before there was a central bank, through loan sales, securitization, and the financial crisis of 2007-2008. Banking changed profoundly during these 175 years, yet it did not change in fundamental ways. The forms of money changed, resulting in associated changes in the information structure of the economy. Bank debt evolved as an instrument for storing value, smoothing consumption, and transactions, but its fundamental nature did not change. In all its forms, it is vulnerable to bank runs without government intervention. Comprehensive and informative, the collection is the definitive volume on the history of the U.S. banking system. These papers provide the framework for understanding how the financial crisis of 2007-2008 developed and steps to promote a stable banking industry, thereby preventing future economic crises. The Maze of Banking is essential reading material for students and academics with an interest in economics, finance, and the history of banking.

The Creation Everett Jenkins, 2003 The major monotheistic religions of the world--Judaism, Christianity and Islam--have certain elements in common, particularly in their scriptures concerning the beginnings of life and the early history of human beings. This shared beginning is compellingly worth further study. Common ground and common threads can only help a dialogue between people of different faiths. This reference work could be a tool toward greater understanding of other faiths and focuses on the story of the creation of the universe and of humans. Part One traces the development of the earth and its inhabitants from a scientific viewpoint so that the humanistic perspective may be contrasted with the scriptural accounts to follow. Part Two features an introduction to the Tanakh, information on the Torah,

and what is known about its authors, and other influences on the Jewish religion, followed by actual scriptures from the Torah from the creation through the destruction of the Tower of Babel. Then a section each is devoted to an explanation of the Catholic, Protestant and Fundamentalist Christian interpretations of these stories, citing scripture as appropriate. Part Three affords a Muslim perspective with excerpts from the Sirah that refer to events and characters from the early chapters of Genesis. The appendices are rich-- various chronologies of similar events based on the different scriptures, tables of contents for the various holy books, tables presenting summaries of a particular perspective on a subject or comparisons between two perspectives and much more.

Mobile Processing in Distributed and Open Environments Peter Sapaty,1999-02-22 This book provides a comprehensive introduction to WAVE, a revolutionary technology that combines the power and flexibility of conventional sequential programming with the open, fully distributed architectures found in the most sophisticated CORBA-based systems. Developed by Peter Sapaty--a noted pioneer in the use of intelligent agents in open and distributed computing--more than a decade before Java, WAVE was designed specifically for use in large-scale distributed information systems. In *Mobile Processing in Distributed and Open Environments*, Sapaty provides a complete, hands-on tutorial in the WAVE programming language and its applications. Rather than simply describe the language and its features, he supplies a vast collection of WAVE algorithms, fully explained with working examples and application suggestions. He also supplies expert advice and guidance on designing, developing, and managing agent systems. Crucial topics covered include: * Managing information networks * Designing and managing communication networks * Performing distributed simulation and virtual reality with WAVE * Building and managing intelligent infrastructures for distributed systems * Using WAVE in conventional programming

Stigmas of the Tamil Stage Susan Seizer,2005-04-11 A study of the lives of popular theater artists, *Stigmas of the Tamil Stage* is the first in-depth analysis of Special Drama, a genre of performance unique to

the southernmost Indian state of Tamilnadu. Held in towns and villages throughout the region, Special Drama performances last from 10 p.m. until dawn. There are no theatrical troupes in Special Drama; individual artists are contracted “specially” for each event. The first two hours of each performance are filled with the kind of bawdy, improvisational comedy that is the primary focus of this study; the remaining hours present more markedly staid dramatic treatments of myth and history. Special Drama artists themselves are of all ages, castes, and ethnic and religious affiliations; the one common denominator in their lives is their lower-class status. Artists regularly speak of how poverty compelled their entrance into the field. Special Drama is looked down upon by the middle- and upper-classes as too popular, too vulgar, and too “mixed.” The artists are stigmatized: people insult them in public and landlords refuse to rent to them. Stigma falls most heavily, however, on actresses, who are marked as “public women” by their participation in Special Drama. As Susan Seizer’s sensitive study shows, one of the primary ways the performers deal with such stigma is through humor and linguistic play. Their comedic performances in particular directly address questions of class, culture, and gender deviations—the very issues that so stigmatize them. Seizer draws on extensive interviews with performers, sponsors, audience members, and drama agents as well as on careful readings of live Special Drama performances in considering the complexities of performers’ lives both on stage and off.

Materializing Space at an Early Modern Prodigy House James M. Sutton, 2004 A single significant Jacobean country house, Theobalds, provides the focus for this study. James Sutton here delves into the cultural and political aspirations of the two men most closely associated with Theobalds: William Cecil, Lord

Burghley (1520-1598), who constructed the building, and his second-born son and political scion, Robert, 1st Earl of Salisbury (1563-1612). Attending to the opulent materials and hegemonic spatial codes that enabled Theobalds' fabrication, this book also demonstrates the enormous costs - economic, political, social, but especially familial and personal - of building to envious show in the period. Neither celebrating nor castigating the Cecils' conspicuous consumption at their Hertfordshire estate, the author offers a balanced appraisal of the aesthetic strategies through which they promulgated a family narrative. The forms of display he emphasizes are those in which Theobalds was particularly strong: architecture, gardening, the decorative arts, and above all, the occasional drama. Through its detailed rhetorical analysis of one house and one family, this book provides a fresh view of the complex passage from Elizabethan to Jacobean style. poetics, *Materializing Space at an Early Modern Prodigy House* deepens our understanding of how early modern English men and women chose to be represented, both to themselves and to others.

Mazes and Labyrinths William Henry Matthews, 1922 *Mazes and Labyrinths* is a look into the origin and mystery of mazes. From ancient stone carvings, Minoan palaces to today's hedge-maze, Matthews chronicles the history of the maze. With over 140 illustrations.

Hamburger Heaven Jeffrey Tennyson, 1995-03-01 The humble hamburger gets its just due in the colorful anecdotes and artwork, warm words of praise and wild, whimsical works of pop art and photography loaded into this sumptuous tribute. I cannot think of a single fact that would have improved the book.--Richard McDonald, founder of McDonald's.
