### The Scientific Revolution in National Context

Roy Porter, 1992-09-25 The 'scientific revolution' of the sixteenth and seventeenth century continues to command attention in historical debate. Controversy still rages about the extent to which it was essentially a 'revolution of the mind', or how far it must also be explained by wider considerations. In this volume, leading scholars of early modern science argue the importance of specifically national contexts for understanding the transformation in natural philosophy between Copernicus and Newton. Distinct political, religious, cultural and linguistic formations shaped scientific interests and concerns differently in each European state and explain different levels of scientific intensity. Questions of institutional development and of the transmission of scientific ideas are also addressed. The emphasis upon national determinants makes this volume an interesting contribution to the study of the Scientific Revolution.

**Indonesian Syariah** M. B. Hooker, 2008 Discusses the creation a national school of Islamic law in Indonesia. Presents a complex range of references for syariah including the formal structures of a 'new fiqh', philosophies of law, transmissions of syariah through tertiary curricula and the Friday sermon in mosques, a bureaucratic form for conducting the Hajj, and contemporary debates on syariah values as expressions of public morality.

**Astrology and Cosmology in Early China** David W. Pankenier, 2013-10-10 The ancient Chinese were profoundly influenced by the Sun, Moon and stars, making persistent efforts to mirror astral phenomena in shaping their civilization. In this pioneering text, David W. Pankenier introduces readers to a seriously understudied field, illustrating how astronomy shaped the culture of China from the very beginning and how it

influenced areas as disparate as art, architecture, calendrical science, myth, technology, and political and military decision-making. As elsewhere in the ancient world, there was no positive distinction between astronomy and astrology in ancient China, and so astrology, or more precisely, astral omenology, is a principal focus of the book. Drawing on a broad range of sources, including archaeological discoveries, classical texts, inscriptions and paleography, this thought-provoking book documents the role of astronomical phenomena in the development of the 'Celestial Empire' from the late Neolithic through the late imperial period.

*Islamic Law, Epistemology and Modernity* Ashk Dahlen, 2004-03-01 This study analyses the major intellectual positions in the philosophical debate on Islamic law that is occurring in contemporary Iran. As the characteristic features of traditional epistemic considerations have a direct bearing on the modern development of Islamic legal thought, the contemporary positions are initially set against the established normative repertory of Islamic tradition. It is within this broad examination of a living legacy of interpretation that the context for the concretizations of traditional as well as modern Islamic learning, are enclosed.

*Investigations into Magic, an Edition and Translation of Martín Del Río's Disquisitionum magicarum libri sex* Peter Maxwell-Stuart, José Manuel García Valverde, 2022-06-13 The most comprehensive treatise on all aspects of magic, witchcraft, and allied subjects produced in the early modern period.

*Nativity: The Christmas Story, Which You Have Never Heard Before* Richard R. Racy, 2007-11 Sometimes reading like a historical novel, or a forensics detective story, a melodrama, or a scientific adventure, *Nativity* takes the reader on

a fast, awesome ride of discovery into the real history and real people behind the birth of Christ. Nativity is the ideal reference for pastors, students, and laymen, combining scholarly depth and reliability in a popular writing style easily accessible to all with references for independent study. New elements of meaning and relevance to the Nativity Scientific evidence virgin births occur as often as identical twins but Jesus was one of a kind The life and death drama behind Joseph and Mary rarely told The real events of Bethlehem and Nazareth Herod amazing genius whose architecture excelled Rome, and kept his murdered wife in a jar of honey! Was Jesus incarnated from the time of the Fall? Is the Christmas tree a pagan idol or a biblical image of the Tree of Life? While vigorously defending the traditional faith, Richard Racy gives new insights and new theological perspectives guaranteed to inform and provoke while entertaining in a major new work on the birth of Jesus Christ.

*The Making of Yeats's A Vision* George Mills Harper, 1987 According to Yeats, his wife surprised him on 24 October 1917, four days after their marriage, "by attempting automatic writing." Excited, he offered to spend the remainder of his life organizing and explaining the "scattered sentences." Over a period of approximately 30 months they collaborated in 450 sittings, he asking questions, she responding to fill a total of more than 3,600 pages. Quoting copiously from the Script, Harper has traced in two volumes these incredible experiments day by day as the Yeatses moved about England, Ireland, and America. He has also cited hundreds of parallel explanatory passages from many workbooks, notebooks, and the concordance arranged like a card index in which Yeats codified the System he projected in *A Vision* and numerous poems and plays. Harper also has examined the extensive personal revelations that

were excluded from A Vision and carefully concealed in many passages of "personal Script." As Professor Harper demonstrates, Yeats had these often oblique, highly allusive passages in mind when he admitted "To Vestigia" that he had "not even dealt with the whole of my subject, perhaps not even with what is most important, writing nothing about the Beatific Vision, little of sexual love."

**Anatomy and Anatomists in Early Modern Spain** Bjørn Okholm Skaarup, 2016-03-09 Taking the Vesalian anatomical revolution as its point of departure, this volume charts the apparent rise and fall of anatomy studies within universities in sixteenth-century Spain, focussing particularly on primary sources from 1550 to 1600. In doing so, it both clarifies the Spanish contribution to the field of anatomy and disentangles the distorted political and historiographical viewpoints emerging from previous research. Studies of early modern Iberian science have only been carried out coherently and collaboratively in the last few decades, even though fierce debates on the subject have dominated Spanish historiography for more than two centuries. In the field of anatomy studies, many uninformed and biased readings of archival sources have resulted in a very confused picture of the practice of dissection and the teaching of anatomy in the Iberian Peninsula, in which the highly complex conditions of anatomical research within Spain's national context are often oversimplified. The new empirical evidence that this book brings to light suggests a far more multifaceted narrative of Iberian Renaissance anatomy than has been presented to date.

**The Old Testament Pseudepigrapha** James H.

Charlesworth, 2010-02 Key second-temple texts with introductions and notes by an international team of scholars--now available in affordable softcover bindings. The writers of the Bible lived in a world filled with many writings. Some of these documents are lost forever, but many have been preserved. Part of these extant sources are the Pseudepigrapha. This collection of Jewish and Christian writings shed light on early Judaism and Christianity and their doctrines. This landmark set includes all 65 Pseudepigraphical documents from the intertestamental period that reveal the ongoing development of Judaism and the roots from which the Christian religion took its beliefs. A scholarly authority on each text contributes a translation, introduction, and critical notes for each text. Volume 2 includes expansions of the Old Testament legends, wisdom, and philosophical literature; prayers, psalms, and odes; and fragments of lost Judeo-Hellenistic Works. Contributors include E. Isaac, B.M. Metzger, J.R. Mueller, S.E. Robinson, D.J. Harrington, G.T. Zervos, and many others. Of enormous value to scholars and students, religious professionals and interested laypeople. Part of Anchor Yale Reference Library.

Physiognomy and ekphrasis are two of the most important modes of description in antiquity and represent the necessary precursors of scientific description. The primary way of divining the characteristics and fate of an individual, whether inborn or acquired, was to observe the patient's external characteristics and behaviour. This volume focuses initially on two types of descriptive literature in Mesopotamia: physiognomic omens and what we might call ekphrastic description. These modalities are traced through ancient India, Ugaritic and the Hebrew Bible, before arriving at the physiognomic features of famous historical figures such as

Themistocles, Socrates or Augustus in the Graeco-Roman world, where physiognomic discussions become intertwined with typological analyses of human characters. The Arabic compendial culture absorbed and remade these different physiognomic and ekphrastic traditions, incorporating both Mesopotamian links between physiognomy and medicine and the interest in characterological 'types' that had emerged in the Hellenistic period. This volume offer the first wide-ranging picture of these modalities of description in antiquity.

*The Voynich Manuscript* M. E. D'Imperio,1978 In spite of all the papers that others have written about the manuscript, there is no complete survey of all the approaches, ideas, background information and analytic studies that have accumulated over the nearly fifty-five years since the manuscript was discovered by Wilfrid M. Voynich in 1912. This report pulls together all the information the author could obtain from all the sources she has examined, and to present it in an orderly fashion. The resulting survey will provide a firm basis upon which other students may build their work, whether they seek to decipher the text or simply to learn more about the problem.
