The Last Ticket Christopher Sharp,2017-09-13 Steve and his family move more than two thousand miles across the country to find a new beginning and remake their life together. Unfortunately, things didn't turn out exactly as they planned. After the money ran short and he still couldn't find work he went to a day labor office as a last resort. On his first day there, he meets an unusual man that takes a special interest in him. As the man tries to dissuade him from working for the company, Steve tries to figure out why, that's when things get weird.

Ancient Astrology Tamysn Barton,2002-11 An account of astrology from its beginnings in Mesopotamia, focusing on the Greco-Roman world, Ancient Astrology examines the theoretical development and changing social and political role of astrology.

Divining the Etruscan World Jean MacIntosh Turfa,2012-07-16 The Etruscan Brontoscopic Calendar is a rare document of omens foretold by thunder. It long lay hidden, embedded in a Greek translation within a Byzantine treatise from the age of Justinian. The first complete English translation of the Brontoscopic Calendar, this book provides an understanding of Etruscan Iron Age society as revealed through the ancient text, especially the Etruscans' concerns regarding the environment, food, health and disease. Jean MacIntosh Turfa also analyzes the ancient Near Eastern sources of the Calendar and the subjects of its predictions, thereby creating a picture of the complexity of Etruscan society reaching back before the advent of writing and the recording of the calendar.

Between Greece and Babylonia Kathryn Stevens,2019-05-23 Focusing on Greece and Babylonia, this book provides a new, cross-cultural approach to the intellectual history of the Hellenistic world.

The New Astrology A Unique Synthesis Of The World's Two Great Astrological Systems Suzanne White,1988-04-15 By combining the astrological systems of the traditional Chinese (terrestrial) with that of the occident (celestial), White demonstrates that every person is governed by two signs--such as a Capricorn Tiger or a Leo Dog.

The Sumerians Samuel Noah Kramer,2010-09-17 The Sumerians, the pragmatic and gifted people who preceded the Semites in the land first known as Sumer and later as Babylonia, created what was probably the first high civilization in the history of man, spanning the fifth to the second millenniums B.C. This book is an unparalleled compendium of what is known about them. Professor Kramer communicates his enthusiasm for his subject as he outlines the history of the Sumerian civilization and describes their cities, religion, literature, education, scientific achievements, social structure, and psychology. Finally, he considers the legacy of Sumer to the ancient and modern world. There are few scholars in the world qualified to write such a book, and certainly Kramer is one of them. . . . One of the most valuable features of this book is the quantity of texts and fragments which are published for the first time in a form available to the general reader. For the layman the book provides a readable and up-to-date introduction to a most fascinating culture. For the specialist it presents a synthesis with which he may not agree but from which he will nonetheless derive stimulation.—American Journal of Archaeology An uncontested authority on the civilization of Sumer, Professor Kramer writes with grace and urbanity.—Library Journal

Astrophysical Data Kenneth R. Lang,2012-12-06 This volume of Astrophysical Data deals with

Planets and Stars; a second volume, Part II, will give data for Galaxies and the Universe. They both provide basic data for use by all scientists, from the amateur astronomer to the professional astrophysicist. In this first volume, we not only provide physical parameters of planets, stars and their environment, but we also provide the celestial coordinates required to observe them. Here we use c.g.s. units, for they are the most commonly used in astronomy and astrophysics; but our volume begins with astronomical and physical constants and the conversion factors needed for other units. The next section concerns the planets and their satellites; it singles out the Earth and Moon for special treatment. Spacecraft rendezvous with the planets and satellites have led to improved values for their atmospheric compositions, orbital parameters, magnetic fields, masses, radii, rotation periods, and surface pressures and temperatures. This section also contains data for the asteroids, comets and their debris. We then discuss everyday stars, beginning with the Sun, and continuing with basic stellar data, the brightest stars and nearby stars. Special categories of stars, such as the Wolf-Rayet stars, magnetic stars, flare stars, and RS CVn binary stars, are included.

A Manual of Occultism Sepharial, 1920

Signs and Symbols Adrian Frutiger, 1998 Discusses the elements of a sign, and looks at pictograms, alphabets, calligraphy, monograms, text type, numerical signs, symbols, and trademarks.

Notable Horoscopes Bangalore Venkat Raman, 1991 A most reliable guide to practical astrology, Notable Horoscopes does not contain startling predictions and amazing forecasts. But it is the product of investigations and studies by the author presented here in an orderly and scientific form but in simple language easily understandable by the average reader.

Man, Play, and Games Roger Caillois, 2001 According to Roger Caillois, play is an occasion of pure waste. In spite of this - or because of it - play constitutes an essential element of human social and

spiritual development. In this study, the author defines play as a free and voluntary activity that occurs in a pure space, isolated and protected from the rest of life.

Good and Cheap Leanne Brown, 2015-07-14 A perfect and irresistible idea: A cookbook filled with delicious, healthful recipes created for everyone on a tight budget. While studying food policy as a master's candidate at NYU, Leanne Brown asked a simple yet critical question: How well can a person eat on the \$4 a day given by SNAP, the U.S. government's Supplemental Nutrition Assistance Program informally known as food stamps? The answer is surprisingly well: Broiled Tilapia with Lime, Spicy Pulled Pork, Green Chile and Cheddar Quesadillas, Vegetable Jambalaya, Beet and Chickpea Salad—even desserts like Coconut Chocolate Cookies and Peach Coffee Cake. In addition to creating nutritious recipes that maximize every ingredient and use economical cooking methods, Ms. Brown gives tips on shopping; on creating pantry basics; on mastering certain staples—pizza dough, flour tortillas—and saucy extras that make everything taste better, like spice oil and tzatziki; and how to make fundamentally smart, healthful food choices. The idea for Good and Cheap is already proving itself. The author launched a Kickstarter campaign to self-publish and fund the buy one/give one model. Hundreds of thousands of viewers watched her video and donated \$145,000, and national media are paying attention. Even high-profile chefs and food writers have taken note—like Mark Bittman, who retweeted the link to the campaign; Francis Lam, who called it “Terrific!”; and Michael Pollan, who cited it as a “cool kickstarter.” In the same way that TOMS turned inexpensive, stylish shoes into a larger do-good movement, Good and Cheap is poised to become a cookbook that every food lover with a conscience will embrace.

Customer Fraud and Business Responses Kelly T. Tian,Bill Keep,2001-12-30 From remarkably frank and credible responses to their comprehensive research questionnaire, Tian and Keep provide a unique, wide ranging catalogue of frauds that customers perpetrate on businesses--and what marketers can do to combat it. They were able to receive and analyze more than 250 written descriptions--a 71% response rate!--of the acts that customers committed and the methods they used. Instead of merely a checklist, Tian and Keep obtained their data in the customers' own words, resulting in highly detailed and reliable insights into why customers did what they did. They find that customer fraud has emerged as a form of guerilla warfare against companies, that it is adapted to specific situations, and that underlying customers' motivation is a need to get even. Ethics has little do with it. In fact, some respondents even asserted that they had an obligation to commit fraud: they did it to retaliate against what they perceived as unethical acts that businesses committed against them. The result is a rare documentation of the specifics of fraud, how it threatens not only business but entire economies, and the actions--bold and subtle--that marketers can take in self-protective response. Not only will corporate management, particularly in marketing, get detailed descriptions of their customers' fraud strategies and tactics, but they will also receive insights into where they are vulnerable and why. Tian and Keep show that fraud has become so socially acceptable among middle class customers that they are willing to share their tactics, strategies, and secrets with their friends.

With this as their foundation, the authors give practitioners an arsenal of detection and deterrence methods. Equally important, they provide ways to implement them without alienating their other, blameless customers. They also show marketers what they can do to reestablish trust in their marketing exchanges with customers, and improve relationships in ways that will diminish (if not fully eliminate) the incidence of fraud. For management generally as well as marketers in companies of all sizes and type, Tian's and Keep's book is essential, engrossing, and useful reading.

The Magic & Science of Jewels and Stones Isidore Kozminsky, 2023-07-21 The Magic and Science of Jewels and Stones reveals the secrets, science and ancient lore of gemstones and ordinary stones, including their relations to the zodiac and magic.

Tibetan Astrology Philippe Cornu, 2002-12-10 Astrology is one of the traditional arts and sciences of Tibet, where it is known as the science of calculation, used by monks and lamas in the study of the rhythms and cycles of time, for divination, for choosing auspicious times for rituals and life-cycle events such as marriages and funerals, and as an adjunct to the practice of traditional medicine. This comprehensive introduction to the topic includes: • Historical roots and influences from China and India as well as the Buddhist Kalachakra teachings and the ancient Bön religion of Tibet • The two main branches of Tibetan astrology: Nagtsi, or black astrology, based on the Chinese system, and Kartsi, or white astrology, derived from Indian astrology • The twelve- and sixty-year cycles and the twelve animals and five elements associated with them • The mewa, or magical squares, which are numerological factors used to calculate the auspiciousness of days or years • The parkha, or eight trigrams of the I Ching, representing the elements, directions, seasons, and fundamental universal forces • How to analyze the character of hours, days, months, and years, so as to determine auspicious times for various activities • How to cast and interpret a Tibetan horoscope

Also included are numerous diagrams and charts that are indispensable to the practice of Tibetan astrology, including tables for converting Western dates to dates on the Tibetan calendar.
