David W. Pankenier

Astrology and Cosmology in Early China David W.

Pankenier,2013-10-10 The ancient Chinese were profoundly influenced by the Sun, Moon and stars, making persistent efforts to mirror astral phenomena in shaping their civilization. In this pioneering text, David W. Pankenier introduces readers to a seriously understudied field, illustrating how astronomy shaped the culture of China from the very beginning and how it influenced areas as disparate as art, architecture, calendrical science, myth, technology, and political and military decision-making. As elsewhere in the ancient world, there was no positive distinction between astronomy and astrology in ancient China, and so astrology, or more precisely, astral omenology, is a principal focus of the book. Drawing on a broad range of sources, including archaeological discoveries, classical texts, inscriptions and paleography, this thought-provoking book documents the role of astronomical phenomena in the development of the 'Celestial Empire' from the late Neolithic through the late imperial period.

Calendars of India Dr Vinod K. Mishra,2020-01-01 Calendars are created by civilisations to give meaning to the continuous flow of time according to their world-views. Over the past millennia, India has developed it's own unique collection of many calendars for regulating it's religious and cultural life. The current book presents a comprehensive account of their structure and relative importance at the present time and places them in the context of other calendars prevalent outside India. Suggestions have also been made for making some changes to bring them in line with our current astronomical knowledge. This book will be very useful to students and anyone who is curious about calendars.

Principles and Practices of Rice Production Surajit K. De Datta,1981

and value to literature. This forms a part of the knowledge base for future generations. Archaeology, Anthropology, and Interstellar Communication National Aeronautics Administration, Douglas Vakoch, 2014-09-06 Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.

The Magic and Science of Jewels and Stones Isidore Kozminsky, 1922

Gurudev on the Plateau of the Peak Bhanumathi Narasimhan, 2018

Man and His Symbols Carl G. Jung, 2012-02-01 The landmark text about the inner workings of the unconscious mind—from the symbolism that unlocks the meaning of our dreams to their effect on our waking lives and artistic impulses—featuring more than a hundred images that break down Carl Jung’s revolutionary ideas “What emerges with great clarity from the book is that Jung has done immense service both to psychology as a science and to our general understanding of man in society.”—The Guardian “Our psyche is part of nature, and its enigma is limitless.” Since our inception, humanity has looked to dreams for guidance. But what are they? How can we understand them? And how can we use them to shape our lives? There is perhaps no one more equipped

to answer these questions than the legendary psychologist Carl G. Jung. It is in his life's work that the unconscious mind comes to be understood as an expansive, rich world just as vital and true a part of the mind as the conscious, and it is in our dreams—those personal, integral expressions of our deepest selves—that it communicates itself to us. A seminal text written explicitly for the general reader, *Man and His Symbols* is a guide to understanding the symbols in our dreams and using that knowledge to build fuller, more receptive lives. Full of fascinating case studies and examples pulled from philosophy, history, myth, fairy tales, and more, this groundbreaking work—profusely illustrated with hundreds of visual examples—offers invaluable insight into the symbols we dream that demand understanding, why we seek meaning at all, and how these very symbols affect our lives. By illuminating the means to examine our prejudices, interpret psychological meanings, break free of our influences, and recenter our individuality, *Man and His Symbols* proves to be—decades after its conception—a revelatory, absorbing, and relevant experience.

Caste, Society and Politics in India from the Eighteenth Century to the Modern Age Susan Bayly, 2001-02-22 One of the most powerful statements ever written on the subject of caste in India.

Buddhist Dynamics in Premodern and Early Modern Southeast Asia D Christian Lammerts, 2015-07-13 The study of historical Buddhism in premodern and early modern Southeast Asia stands at an exciting and transformative juncture. Interdisciplinary scholarship is marked by a commitment to the careful examination of local and vernacular expressions of Buddhist culture as well as to reconsiderations of long-standing questions concerning the diffusion of and relationships among varied texts, forms of representation, and religious identities, ideas, and practices. The twelve essays in this collection, written by leading scholars in Buddhist Studies and Southeast Asian

history, epigraphy, and archaeology, comprise the latest research in the field to deal with the dynamics of mainland and (pen)insular Buddhism between the sixth and nineteenth centuries C.E. Drawing on new manuscript sources, inscriptions, and archaeological data, they investigate the intellectual, ritual, institutional, sociopolitical, aesthetic, and literary diversity of local Buddhisms, and explore their connected histories and contributions to the production of intraregional and transregional Buddhist geographies.

His later life was marked by his political activities; he became involved in campaigning and negotiations for India's independence, publishing journals, advocating political rights and social freedom for Dalits, and contributing significantly to the establishment of the state of India. In 1956 he converted to Buddhism, initiating mass conversions of Dalits.

Modernizing Composition Garrett Field, 2017-03-22 A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program. Visit www.luminoso.org to learn more. The study of South Asian music falls under the purview of ethnomusicology, whereas that of South Asian literature falls under South Asian studies. As a consequence of this academic separation, scholars rarely take notice of connections between South Asian song and poetry. *Modernizing Composition* overcomes this disciplinary fragmentation by examining the history of Sinhala-language song and poetry in twentieth-century Sri Lanka. Garrett Field describes how songwriters and poets modernized song and poetry

in response to colonial and postcolonial formations. The story of this modernization is significant in that it shifts focus from India's relationship to the West to little-studied connections between Sri Lanka and North India.

Kinship in Bengali culture Ronald B. Inden, Ralph W. Nicholas, 2005 The Book Analyzes The Kinship System Of A Major Human Society That Possesses An Ancient, Literate Civilization And A Tradition Of Analytical Thought.

The New York Post said that *Scruples* was born to be a smash bestseller. . . It has more inside information about the worlds of high fashion and Hollywood than you'd find in a dozen manuals. With *Scruples*, Judith Krantz earned her reputation as a blazingly talented and original storyteller. she takes her readers behind the scenes of wealthy and fame to show them the real people and the real emotions that exist at the core of even the most high-powered lives. *Scruples* is the leader of her #1 best-selling novels.

Seeing Like a State James C. Scott, 2020-03-17 “One of the most profound and illuminating studies of this century to have been published in recent decades.”—John Gray, New York Times Book Review Hailed as “a magisterial critique of top-down social planning” by the New York Times, this essential work analyzes disasters from Russia to Tanzania to uncover why states so often fail—sometimes catastrophically—in grand efforts to engineer their society or their environment, and uncovers the conditions common to all such planning disasters. “Beautifully written, this book calls into sharp relief the nature of the world we now inhabit.”—New Yorker “A tour de force.”— Charles Tilly, Columbia University
