Ancient Astrology Tamysn Barton,2002-11 An account of astrology from its beginnings in Mesopotamia, focusing on the Greco-Roman world, Ancient Astrology examines the theoretical development and changing social and political role of astrology.

Pseudo-Manetho, Apotelesmatica J. L. Lightfoot,2023-04-27 The corpus of astrological material ascribed to the Egyptian priest Manetho consists of six books of poetry. This book serves as the companion to the one published by OUP in 2020, which was the first commentary in any language on the earliest three books of Manetho's poetry (two, three, and six as they appear in the manuscript). This volume supplies the remainder (books four, one, and five). Manetho was credited with a series of didactic poems which list outcomes for planetary set-ups in a birth chart. The books covered in this volume are not as easily dated as those in the first volume, but the most recent is probably no later than the fourth century and they are still Egyptian. As in the first volume, their descriptions of the kinds of person who are born under happy and unhappy configurations of stars speak to the lived realities, aspirations, and fears of the astrologer's clientele. Unlike in the first volume, however, the individual books treated here have different authors, and there is more emphasis on profiling individual poets in terms of style, metre, and mannerisms. As in the first volume, there is a Greek text with English translation and an apparatus with parallel material to enable comparison with related works. But this volume pays more attention to the transmission of traditional material from one author to another, and to the special approach required of an editor of material which, being in practical use, circulated in unstable and minutely-varying textual forms.

Astrology and Cosmology in Early China David W. Pankenier,2013-10-10 The ancient Chinese were profoundly influenced by the Sun, Moon and stars, making persistent efforts

to mirror astral phenomena in shaping their civilization. In this pioneering text, David W. Pankenier introduces readers to a seriously understudied field, illustrating how astronomy shaped the culture of China from the very beginning and how it influenced areas as disparate as art, architecture, calendrical science, myth, technology, and political and military decision-making. As elsewhere in the ancient world, there was no positive distinction between astronomy and astrology in ancient China, and so astrology, or more precisely, astral omenology, is a principal focus of the book. Drawing on a broad range of sources, including archaeological discoveries, classical texts, inscriptions and paleography, this thought-provoking book documents the role of astronomical phenomena in the development of the 'Celestial Empire' from the late Neolithic through the late imperial period.

*The Voynich Manuscript* M. E. D'Imperio, 1978 In spite of all the papers that others have written about the manuscript, there is no complete survey of all the approaches, ideas, background information and analytic studies that have accumulated over the nearly fifty-five years since the manuscript was discovered by Wilfrid M. Voynich in 1912. This report pulls together all the information the author could obtain from all the sources she has examined, and to present it in an orderly fashion. The resulting survey will provide a firm basis upon which other students may build their work, whether they seek to decipher the text or simply to learn more about the problem.

**Divining the Etruscan World** Jean MacIntosh Turfa,2012-07-16 The Etruscan Brontoscopic Calendar is a rare document of omens foretold by thunder. It long lay hidden, embedded in a Greek translation within a Byzantine treatise from the age of Justinian. The first complete English translation of the Brontoscopic Calendar, this book provides an understanding of Etruscan Iron Age society as revealed through the ancient text, especially the Etruscans' concerns regarding the environment, food, health and disease. Jean MacIntosh Turfa also analyzes the ancient Near Eastern sources of the Calendar and the subjects of its predictions, thereby creating a picture of the complexity of Etruscan society reaching back before the advent of writing and

Astrology and Numerology in Medieval and Early Modern Catalonia John Scott Lucas,2003-09-01 The *Tractat de prenostication de la vida natural dels hòmens*, a late fifteenth-century Catalan incunable, draws on a rich tradition of astrological magic, geomancy, Pythagorean numerology, and Hebrew gematria. This practical manual offers a method of determining the birth sign based on calculations performed on the subject's name and his or her mother's name. The critical edition includes a literary, historical, and linguistic study; an English translation; and a Catalan-English glossary. The *Tractat* reveals Catalan sources for prognostication, a unique expression of medieval syncretism, the mingling of traditions, and the development of new ideas. It is a rare find for Hispanists and others interested in astrology, magic, the history of science, and early print culture.
