Astrology and Cosmology in Early China David W. Pankenier,2013-10-10 The ancient Chinese were profoundly influenced by the Sun, Moon and stars, making persistent efforts to mirror astral phenomena in shaping their civilization. In this pioneering text, David W. Pankenier introduces readers to a seriously understudied field, illustrating how astronomy shaped the culture of China from the very beginning and how it influenced areas as disparate as art, architecture, calendrical science, myth, technology, and political and military decision-making. As elsewhere in the ancient world, there was no positive distinction between astronomy and astrology in ancient China, and so astrology, or more precisely, astral omenology, is a principal focus of the book. Drawing on a broad range of sources, including archaeological discoveries, classical texts, inscriptions and paleography, this thought-provoking book documents the role of astronomical phenomena in the development of the 'Celestial Empire' from the late Neolithic through the late imperial period.

The Voynich Manuscript M. E. D'Imperio,1978 In spite of all the papers that others have written about the manuscript, there is no complete survey of all the approaches, ideas, background information and analytic studies that have accumulated over the nearly fifty-five years since the manuscript was discovered by Wilfrid M. Voynich in 1912. This report pulls together all the information the author could obtain from all the sources she has examined, and to present it in an orderly fashion. The resulting survey will provide a firm basis upon which other students may build their work, whether they seek to decipher the text or simply to learn more about the problem.

Magic and Divination in Malay Illustrated Manuscripts Farouk Yahya,2015-10-27 This book offers an integrated study of the texts and images of illustrated Malay manuscripts on magic and divination from private and public collections in Malaysia, the UK and Indonesia. Containing some of the rare examples of Malay painting, these manuscripts provide direct evidence for the intercultural connections between the Malay region, other parts of Southeast Asia and the rest of the world. In this richly illustrated volume many images and texts are gathered for the first time, making this book essential reading for all those interested in the practice of magic and divination, and the history of Malay, Southeast Asian and Islamic manuscript art.

Tibetan Astrology Philippe Cornu,2002-12-10 Astrology is one of the traditional arts and sciences of Tibet, where it is known as the science of calculation, used by monks and lamas in the study of the rhythms and cycles of time, for divination, for choosing auspicious times for rituals and life-cycle events such as marriages and funerals, and as an adjunct to the practice of traditional medicine. This comprehensive introduction to the topic includes: • Historical roots and influences from China and India as well as the Buddhist Kalachakra teachings and the ancient Bön religion of Tibet • The two main branches of Tibetan astrology: Nagtsi, or black astrology, based on the Chinese system, and Kartsi, or white astrology, derived from Indian astrology • The twelve- and sixty-year cycles and the twelve animals and five elements associated with them • The mewa, or magical squares, which are numerological factors used to calculate the auspiciousness of days or years • The parkha, or eight trigrams of the I Ching, representing the elements, directions, seasons, and fundamental universal forces • How to analyze the character of hours, days, months, and years, so as to determine auspicious times for various activities • How to cast and interpret a Tibetan horoscope Also included are numerous diagrams and charts that are indispensable to the practice of Tibetan astrology, including tables for converting Western dates to dates on the Tibetan calendar.

Astrology and Reformation Robin Bruce Barnes,2016 Winner of the 2016 Roland H. Bainton Book Prize of the Sixteenth Century Society and Conference During the sixteenth century, no part of the Christian West saw the development of a more powerful and pervasive astrological culture than the very home of the Reformation movement--the Protestant towns of the Holy Roman Empire. While most modern approaches to the religious and social reforms of that age give scant attention to cosmological preoccupations, Robin Barnes argues that astrological concepts and imagery played a key role in preparing the ground for the evangelical movement sparked by Martin Luther in the 1520s, as well as in shaping the distinctive characteristics of German evangelical culture over the following century. Spreading above all through cheap printed almanacs and prognostications, popular astrology functioned in paradoxical ways. It contributed to an enlarged and abstracted sense of the divine that led away from clericalism, sacramentalism, and the cult of the saints; at the same time, it sought to ground people more squarely in practical matters of daily life. The art gained unprecedented sanction from Luther's closest associate, Philipp Melanchthon, whose teachings influenced generations of preachers, physicians, schoolmasters, and literate layfolk. But the apocalyptic astrology that came to prevail among evangelicals involved a perpetuation, even a strengthening, of ties between faith and cosmology, which played out in beliefs about nature and natural signs that would later appear as rank superstitions. Not until the early seventeenth century did Luther's heirs experience a crisis of piety that forced preachers and stargazers to part ways. Astrology and Reformation illuminates an early modern outlook that was both practical and prophetic; a world that was neither traditionally enchanted nor rationally disenchanted, but quite different from the medieval world of perception it had displaced.

The Astrology Book James R Lewis,2003-03-01 The scientific, historic, and popular basis behind the ancient art of astrology is explored in this comprehensive reference. The guide also includes a table of astrological glyphs and abbreviations, a section on casting a chart, and a chapter that explains and interprets every planet in every house and sign.
