**Exotic Commodities** Frank Dikötter, 2007-03-27 *Exotic Commodities* is the first book to chart the consumption and spread of foreign goods in China from the mid-nineteenth century to the advent of communism in 1949. Richly illustrated and revealing, this volume recounts how exotic commodities were acquired and adapted in a country commonly believed to have remained hostile toward alien things during the industrial era. China was not immune to global trends that prized the modern goods of civilized nations. Foreign imports were enthusiastically embraced by both the upper and lower classes and rapidly woven into the fabric of everyday life, often in inventive ways. Scarves, skirts, blouses, and corsets were combined with traditional garments to create strikingly original fashions. Industrially produced rice, sugar, wheat, and canned food revolutionized local cuisine, and mass produced mirrors were hung on doorframes to ward off malignant spirits. Frank Dikötter argues that ordinary people were the least inhibited in acquiring these products and therefore the most instrumental in changing the material culture of China. Landscape paintings, door leaves, and calligraphy scrolls were happily mixed with kitschy oil paintings and modern advertisements. Old and new interacted in ways that might have seemed incongruous to outsiders but were perfectly harmonious to local people. This pragmatic attitude would eventually lead to China's own mass production and export of cheap, modern goods, which today can be found all over the world. The nature of this history raises the question, which Dikötter pursues in his conclusion: If the key to surviving in a fast-changing world is the ability to innovate, could China be more in tune with modernity than Europe?

**History and Material Culture** Karen Harvey, 2017-09-18 Sources are the raw material of History, but whereas the written word has traditionally been seen as the principal source, historians now recognize the value of sources beyond text. In this new edition of *History and Material*

Culture, contributors consider a range of objects – from an eighteenth-century bed curtain to a twenty-first-century shopping trolley – which can help historians develop new interpretations and new knowledge about the past. Containing two new chapters on healing objects in East Africa and the shopping trolley in the social world, this book examines a variety of material sources from around the globe and across centuries to assess how such sources can be used to study the distant and the recent past. In a revised introduction, Karen Harvey discusses some of the principal issues raised when historians use material culture, particularly in the context of 'the material turn', and suggests some initial steps for those unfamiliar with these kinds of sources. While the sources are discussed from interdisciplinary perspectives, the emphasis of the book is on what historians stand to gain from using material culture, as well as what historians have to offer the broader study of material culture. Clearly written and accessible, this book is the ideal introduction to the opportunities and challenges of researching material culture, and is essential reading for all students of historical theory and method.

Bluesman Andre Dubus III, 2001-02-13 With House of Sand and Fog, his National Book Award-nominated novel, Andre Dubus III demonstrated his mastery of the complexities of character and desire. In this earlier novel he captures a roiling time in American history and the coming-of-age of a boy who must decide between desire, ambition, and duty. In the summer of 1967, Leo Suther has one more year of high school to finish and a lot more to learn. He's in love with the beautiful Allie Donovan who introduces him to her father, Chick — a construction foreman and avowed Communist. Soon Leo finds himself in the midst of a consuming love affair and an intense testing of his political values. Chick's passionate views challenge Leo's perspective on the escalating Vietnam conflict and on just where he stands in relation to the new people in his life. Throughout his — and the nation's — unforgettable summer of love, Leo is learning the language of the blues, which seem to speak to the mourning he feels for his dead mother, his occasionally distant father, and the youth which is fast giving way to manhood.

The Eminent Monk John Kieschnick,1997-07-01 In an attempt to reconstruct an elusive aspect of the medieval Chinese imagination, *The Eminent Monk* examines biographies of Chinese Buddhist monks, from the uncompromising ascetic to the unfathomable wonder-worker. While analyzing images of the monk in medieval China, the author addresses some questions encountered along the way: What are we to make of accounts in “eminent monk” collections of deviant monks who violate monastic precepts? Who wrote biographies of monks and who read them? How did different segments of Chinese society contend for the image of the monk and which image prevailed? By placing biographies of monks in the context of Chinese political and religious rhetoric, *The Eminent Monk* explores both the role of Buddhist literature in Chinese history and the monastic imagination that inspired this literature.

It is Tokyo in 1939. On the Street of a Thousand Blossoms, two orphaned brothers dream of a future firmly rooted in tradition. Meanwhile, the two young daughters of a renowned sumo master find their lives increasingly intertwined with the fortunes of their father's star pupil, Hiroshi.

Now, in bestselling novelist Gail Tsukiyama's *The Language of Threads*, we finally learn what happened to Pei, as she leaves the silk house for Hong Kong in the 1930s, arriving with a young orphan, Ji Shen, in her care. Her first job, in the home of a wealthy family, ends in disgrace, but soon Pei and Ji Shen find a new life in the home of Mrs. Finch, a British ex-patriate who welcomes them as the daughters she never had. Their idyllic life is interrupted, however, by war, and the Japanese occupation. Pei is once again forced to make her own way, struggling to survive and to keep her extended family alive as well. In this story of hardship and survival, Tsukiyama paints a portrait of women fighting the forces of war and time to make a life for themselves.

*Parenting Matters* National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children, 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.
