Divination and Prediction in Early China and Ancient Greece Lisa Raphals, 2013-10-17 This book compares the intellectual and social history and past and present contexts of mantic practices (divination) in Chinese and Greek antiquity.

Magic and Divination in Early Islam Emilie Savage-Smith, 2021-01-20 Magic and divination in early Islam encompassed a wide range of practices, including belief in jinn, warding off the evil eye, the production of amulets and other magical equipment, conjuring, wonder-working, dream interpretation, predicting the weather, casting lots, astrology, and physiognomy. The ten studies here are concerned with the pre-Islamic antecedents of such practices, and with the theory of magic in healing, the nature and use of amulets and their decipherment, the arts of astrometeorology and geomancy, the refutation of astrology, and the role of the astrologer in society. Some of the studies are highly illustrated, some long out of print, some revised or composed for this volume, and one translated into English for the first time. These fundamental investigations, together with the introductory bibliographic essay, are intended as a guide to the concepts, terminology, and basic scholarly literature of an important, but often overlooked, aspect of classical Islamic culture.

Assyrian Dictionary: B University of Chicago. Oriental Institute, 1956

Assyrian Dictionary University of Chicago. Oriental Institute, 1956 The CAD project was initiated in the early 1920s, not long after James Henry Breasted founded the Oriental Institute in 1919, and barely one hundred years after the decipherment of the cuneiform script. This initial decipherment, and the soon-to-follow achievements in understanding the languages in which the hundreds of thousands of clay tablets were inscribed, opened an unsuspected treasure-house for the study and appreciation of one of the world's oldest civilizations. The Chicago Assyrian Dictionary was conceived to provide more than lexical information alone, more than a one-to-one equivalent between Akkadian and English words. By presenting each word in a meaningful context, usually with a full and idiomatic translation, it recreates the cultural milieu and thus in many ways assumes the function of an encyclopedia. Its source material ranges in time from the third millennium b.c. to the first century a.d., and in geographic area from the Mediterranean Sea in the west to the Zagros Mountains in the east. With sixteen of the projected twenty-one volumes published and the remaining volumes in various stages of preparation, with close to two million file cards - a database which is continually updated and which is accessible to scholars and students who wish to consult it - the Chicago Assyrian Dictionary has become an invaluable source for the study of the civilizations of the ancient Near East, their political and cultural history, their achievements in the sciences of medicine, astronomy, mathematics, and linguistics, and not least the timeless beauty of their poetry. - Publisher.

Studies on the Derveni Papyrus, volume II Glenn W. Most, 2022-09-15 Studies on the Derveni Papyrus, volume II brings together two new editions of the first fragmentarily extant columns of the Derveni Papyrus and seven scholarly articles devoted to their interpretation. The Derveni Papyrus is by far the most important textual discovery of the 20th century regarding early Greek philosophy, religion, exegetical theory and practice, linguistic ideas, and a host of other areas and issues. But the editorial and interpretative history of this extraordinary document has been very checkered. While the interpretation of the better preserved later columns is still highly controversial in many regards, at least the text of those columns has by and large found a scholarly consensus; but the editorial and interpretative situation with the worse preserved first columns is quite different. This volume offers not one but two editions of the first columns, by Richard Janko and by Valeria Piano, given that it is not currently possible to agree upon a single edition; and it explains clearly and in detail the papyrological problems and doubts that lead to these two editions, making it possible for readers (even non-papyrologists) to form their own informed judgment about the most likely readings to be adopted. Furthermore, it contains a number of articles by leading scholars on the Derveni Papyrus, above all offering original solutions to the question of the relation between the earlier and the later columns, but also providing analysis and interpretation of other, related problems.

Ezekiel (Understanding the Bible Commentary Series) Steven Tuell, 2012-07-01 Ezekiel is a transitional character writing in times of dramatic change. A priest without a temple, called to the prophetic office; an exile without a country, writing to his fellow exiles; a public figure for a while without a voice, Ezekiel composes a magnum opus that touched the hearts and minds of his generation and a work that continues to speak of the power and love of God more than two thousand years later. Steven Tuell has captured the breadth and depth of the man and his profound recognition of the power and grace of God for a disenfranchised community. He has provided clear understanding of a complex book of the Bible that many in the past have found confusing and murky. He clarifies the theological underpinnings of the text and brings the brilliance of this book into the light. His explanation of the visionary closing chapters of the book that center on a new nation and a new center of worship is cogent and clear. The New International Biblical Commentary offers the best of contemporary scholarship in a format that both general readers and serious students can use with profit. Based on the widely used New International Version translation, the NIBC presents careful section-by-section exposition with key terms and phrases highlighted and all Hebrew transliterated. A separate section of notes at the close of each chapter provides additional textual and technical comments. Each commentary also includes a selected bibliography as well as Scripture and subject indexes.

Karduniaš. Babylonia under the Kassites 2 Alexa Bartelmus, Katja Sternitzke, 2017-06-26 Karduniaš, as the kingdom of the Kassites in Babylonia was called in ancient times, was the neighbor and rival of great powers such as Egypt, the Hittites, and Assyria. But while our knowledge of the latter kingdoms has made huge progress in the last decades, the Kassites have until recently been largely ignored by modern scholarship. Recently a number of scholars have embarked on research into different aspects of Late Bronze Age Babylonia. The desire to share the results of these new investigations resulted in an international conference, which was held at Munich University in July 2011. The presentations given at this meeting have been revised for publication in the current volume. This book gives an overview of current research on the Kassites and is the first larger survey of their culture ever. An invaluable introduction by Kassite expert Professor John A. Brinkman is followed by seventeen specialist

contributions investigating different aspects of the Kassites. These include detailed historical, social, cultural, archaeological, and art historical studies concerning the Kassites from their first arrival in Mesopotamia, during the period when a Kassite Dynasty ruled Babylonia (c. 1500-1550 BC), and in the subsequent aftermath. Concentrating on southern Mesopotamia the contributions also discuss Kassite relations and presence in neighboring regions. The book is completed by a substantial bibliography and a detailed index.

Exploring the Longue Durée J. David Schloen, 2009 Fifty scholars who represent a wide range of nationalities and specialties--archaeologists, biblical scholars, philologists, and historians--have contributed essays in honor of Lawrence E. Stager, the Dorot Professor of the Archaeology of Israel and Director of the Semitic Museum at Harvard University, on the occasion of his 65th birthday. Various academic generations are represented: among the contributors to this volume are Professor Stager's former students and some of his own teachers, as well as a diverse group of his many friends and colleagues of all ages. Moreover, the studies collected herein span the gamut from detailed analyses of sites, artifacts, and texts to broad theoretical syntheses. Several authors draw directly upon Stager's theoretical work, invoking his model of port power and his ideas about kinship and patrimonialism in ancient Israel, thereby demonstrating his influence as one of the leading Near Eastern archaeologists of his generation. Others discuss archaeological phenomena that have figured prominently in Stager's research over the years, such as ancient horticulture, Iron Age houses and villages, and finds related to the site of Ashkelon in Israel, where he has directed excavations since 1985. The remaining chapters are a fascinating sample of research in biblical studies (often with a sociological emphasis, as in Stager's own work), in nonbiblical philology, and in the archaeology of Israel and the eastern Mediterranean region in the Bronze and Iron Ages.

Joshua, Judges, Ruth, 1 and 2 Samuel Daniel I. Block, Richard Hess, Dale W. Manor, V. Philips Long, 2009 This series brings to life the world of the Old Testament through informative entries and full-color photos and graphics. Here readers find the premier commentary set for connecting with the historical and cultural context of the Old Testament.

Divining the Etruscan World Jean MacIntosh Turfa, 2012-07-16 The Etruscan Brontoscopic Calendar is a rare document of omens foretold by thunder. It long lay hidden, embedded in a Greek translation within a Byzantine treatise from the age of Justinian. The first complete English translation of the Brontoscopic Calendar, this book provides an understanding of Etruscan Iron Age society as revealed through the ancient text, especially the Etruscans' concerns regarding the environment, food, health and disease. Jean MacIntosh Turfa also analyzes the ancient Near Eastern sources of the Calendar and the subjects of its predictions, thereby creating a picture of the complexity of Etruscan society reaching back before the advent of writing and the recording of the calendar.

The Plan of God in Luke-Acts John T. Squires, 1993 This study examines one significant theological theme in Luke-Acts, that of 'The plan of God'. It traces the way this theme is developed throughout Luke-Acts, both through direct statements by the writer and through various associated means such as divine appearances, signs and wonders, the fulfilment of prophecy, and indications of fate as of necessity. Dr Squires locates Luke's use of this theme in the context of the history-writing of the Hellenistic period, noting numerous passages in those works which illumine Luke's theological purposes. His book shows how the notion of the plan of God is used by Luke as he writes to confirm his readers' faith, encouraging them to bear witness to this faith, and equipping them for the task of defending it.

Magic and Divination in Malay Illustrated Manuscripts Farouk Yahya, 2015-10-27 This book offers an integrated study of the texts and images of illustrated Malay manuscripts on magic and divination from private and public collections in Malaysia, the UK and Indonesia. Containing some of the rare examples of Malay painting, these manuscripts provide direct evidence for the intercultural connections between the Malay region, other parts of Southeast Asia and the rest of the world. In this richly illustrated volume many images and texts are gathered for the first time, making this book essential reading for all those interested in the practice of magic and divination, and the history of Malay, Southeast Asian and Islamic manuscript art.

Neo-Assyrian and Greek Divination in War Krzysztof Ulanowski, 2020-10-20 Neo-Assyrian and Greek Divination in War is about practices which enabled humans contact the divine. These relations, especially in difficult times of military conflict, could be crucial in deciding the fate of individuals, cities, dynasties or even empires.
