Internalizing and Externalizing Expressions of Dysfunction Dante Cicchetti, Sheree L. Toth, 2014-02-04 The contributors to this volume apply a developmental focus to their examination of one of the most widely agreed upon classifications of behavior disorders in child psychopathology -- internalizing and externalizing expressions of dysfunction. The research reported spans a wide range from infancy through young adulthood and from normalcy through severe psychopathology. These current investigations demonstrate that the implications of utilizing the developmental approach for the evolution of theory, research, and intervention are vast.

A single resource that integrates disparate areas of biology and disease ion channel biology, this publication includes cross-referencing for disease, channels, and tissues. Offers a broad view of research of interest to early and experienced researchers across biological and biomedical research. Provides an overview of fundamental concepts in ion channels research to link defects in human disease Written in an accessible manner, without jargon Provides a helpful, easy cross-reference for diseases, channels, and tissues

Excitotoxicity in Neurological Diseases Carlo Ferrarese, M. Flint Beal, 2012-12-06 It can be reasonably anticipated that, over the next generations, the proportion of elderly people will remarkably increase and, with this, the number of persons suffering from acute (e.g. cerebral ischemia) or chronic

neurodegenerative disorders. To date, approved drugs only alleviate the symptoms of these diseases (for instance, acetylcholinesterase inhibitors in Alzheimer disease and L-dopa and dopamine-agonists in Parkinson disease), while none seems to stop the progression of the degenerative processes underlying them. The development of effective preventive or protective therapies has been impeded by the limitations of our knowledge of the causes and the mechanisms by which neurons die in neurodegenerative disorders. Evidence accumulated in the past 20 years indicated that the major excitatory neurotransmitter glutamate may play a role as neurotoxin in several conditions. In particular, the glutamatergic system dysfunction seems to be an early event working as a common pathway in the pathogenesis of a large number of acute and chronic neurological disorders, in strict conjunction with other important mechanisms, such as oxidative stress and energetic failure, and probably triggered by different mechanisms in various diseases. In consideration of that, drug discovery efforts over the last decade have been focused on the search for drugs that either reduce glutamate synaptic levels or block its postsynaptic effects. Despite numerous reviews on basic mechanisms and clinical aspects of the excitotoxic phenomenon, so far no comprehensive book has covered the topic in all its complexity, starting from basic pharmacological mechanisms, to animal models of diseases and finally to clinical pathogenic and therapeutic implications.

Adrenal Cortex: From Physiology to Disease Pierre Val, Antoine Martinez, 2016-07-18 The adrenal gland plays essential roles in the control of body homeostasis, stress and immune responses. The adrenal cortex represents up to 90% of the gland and is specialised in the production of mineralocorticoids, glucocorticoids and adrenal androgens. This production is tightly coordinated and results from a unique zonal organisation. Although our knowledge of the molecular mechanisms controlling adrenal steroidogenesis is quite extensive, for decades, the mechanisms of adrenal cortex

development, cellular homeostasis and renewal have remained elusive. The advent of new high-throughput technologies and sophisticated genetic approaches has brought tremendous progress in our understanding of how the adrenal cortex achieves and maintains its particular organisation. The aim of this Frontiers in Endocrinology Topic is to provide readers with a snapshot of our current knowledge on adrenal physiology and how deregulations of these processes result in adrenal diseases. This includes but is not limited to, basic research on adrenal development, cell lineage identification, progenitor cells, tissue renewal, control of differentiation and zonation and clinical research on the identification of disease-related genes.

Clinical Applications of Noncoding RNAs in Cancer Subash Gupta, Kishore Challagundla, 2022-01-19 *Clinical Applications of Noncoding RNAs in Cancer* summarizes the existing strategies, advances, and future opportunities on the role of noncoding RNAs in cancer patients. Established clinicians and researchers from all around the world share their views and expertise and provide readers with invaluable knowledge on the subject. This book provides a comprehensive collection of information on the utility of noncoding RNAs in the diagnosis, prognosis, and therapy of cancer. It also discusses the evolutionary significance of noncoding RNAs and how the molecular tools such as RNA-seq, RNA-FISH, ic-SHAPE, and quantitative real-time PCR help in the detection and elucidation of the functions of noncoding RNAs. Additionally, the challenges associated with noncoding RNA approaches and future developments are discussed. It is a valuable resource for cancer researchers, oncologists, clinicians, and other biomedical field members who want to learn more about noninvasive ways to diagnose and efficiently treat diverse cancer types. Presents a beginning chapter summary to help readers understand the content thoroughly Encompasses detailed description of information from clinical studies on noncoding RNAs in cancer therapy Discusses one cancer type per chapter

Neuroinflammation Paul L. Wood, 1997-10-24 An unprecedented review of our current knowledge of the neuroinflammatory mediators and cells involved in neurodegenerative diseases. Beginning with a detailed review of our current concepts of which biochemical mediators are involved in neuronal loss and the mechanisms of cell death, the distinguished contributors critically examine those areas of current research involved in the design of specific pharmacological agents to inhibit at defined points in the neuroinflammatory cascade. They also address the molecular, cellular, and disease model actions of first-generation agents, as well as the potential clinical relevance to AIDS-related dementia, Alzheimer's disease, amyotrophic lateral sclerosis (ALS), Down's syndrome, Huntington's disease, multiple sclerosis, Parkinson's disease, and stroke.

Contemporary Funeral Rituals of Sa'dan Toraja Michaela Budiman, 2013-01-01 Kniha s názvem Contemporary Funeral Rituals of Sa'dan Toraja; From Aluk Todolo to New Religions pojednává o etniku Toradžů, jež obývá provincie Tana Toraja a Toraja Utara v jižní části indonéského ostrova Sulawesi. Práce se zabývá jejich kulturou a soustředí se na nejvýznamnější soudobý toradžský rituál – pohřeb. Její jádro je rozděleno do dvou kapitol – první z nich představuje etnikum Toradžů a důležité aspekty jejich

kultury, druhá kapitola je založena především na výsledcích terénního výzkumu autorky. Zabývá se tím, co se stane s duší zesnulého člověka podle náboženství Aluk Todolo, jak musí pozůstalí naložit s jeho tělem a do jaké míry společenský původ ovlivňuje ještě i v současnosti typ a délku funerálního rituálu. Cílem této knihy je nastínit podobu funerálního rituálu v jeho původní formě a zachytit zásadní sociální a náboženské změny, ke kterým dochází v toradžské společnosti od počátku 20. století, kdy na jejich území vstoupili první nizozemští misionáři. Autorka knihy se snažila zjistit, do jaké míry jsou soudobé toradžské rituály synkretickým útvarem – snoubí se v nich totiž autochtonní víra Aluk Todolo a zvykové právo adat s nově přijatými náboženstvími. Práce tedy poukazuje na to, jak nově přijatá náboženství ovlivnila podobu rituálů, soustředí se zejména na jejich formální a principiální významové posuny

Understanding and Coping with Failure: Psychoanalytic perspectives Brent Willock,Rebecca Coleman Curtis,Lori C. Bohm,2014-05-16 Failure is a theme of great importance in most clinical conditions, and in everyday life, from birth until death. Its impact can be destabilizing, even disastrous. In spite of these facts, there has been no comprehensive psychoanalytic exploration of this topic. Understanding and Coping with Failure:

Psychoanalytic Perspectives fills this gap by examining failure from many perspectives. It goes a long way toward increasing understanding of the numerous issues involved, and provides many valuable insights into ways of coping with these challenging experiences and several chapters discuss positive aspects of failure - what can be learned from what would otherwise simply be regrettable experiences. Brent Willock, Rebecca Coleman Curtis and Lori C. Bohm bring together a rich diversity of topics explored in thoughtful ways by an international group of authors from the United Kingdom, Canada, and the United States of America. Failed therapies (which have been examined in the literature) are but one element freshly explored in this comprehensive exploration of the topic. The book is divided into sections covering the following topics: Failing and Forgiving; Society-Wide Failure; Failure in the Family; Therapeutic Failure; Professional Failure in the Consulting Room and on the Career Path; Integrity versus Despair: Facing Failure in the Final Phase of the Life Cycle; Metaphoric Bridges and Creativity; The Long Shadow of Childhood Relational Trauma. Understanding and Coping with Failure will be eagerly welcomed by all those trying to increase their awareness, understanding, and capacity to work with the many ramifications of this important issue. Because of the uniqueness of this broad, detailed exploration of the complexities of the failure experience, it will be essential reading for psychoanalysts, psychotherapists, psychologists, psychiatrists, social workers, counselors, and students in these disciplines. It will also appeal to a wider audience interested in the psychoanalytic perspective.
