The Fixed Stars and Constellations in Astrology Vivian Erwood Robson,1923

Little Book of Fixed Stars Elizabeth Marie Hazel,2020-05-15 This updated edition has 247 fixed stars and 20 celestial points calculated for January 2020. Additional comments from Michael Munkasey supplement traditional star meanings. Part II offers tips on interpreting star-planet contacts. Part III features articles about non-zodiacal constellations and celestial zone of special import. Part IV offers four in-depth chart delineations that demonstrate the author's methods. The text is richly illustrated with birth charts, portraits, and detailed constellational star-maps.

Fixed Stars Astrology John hebert,2018-12-19 favorable birthdates and their stars listed are described astrologically.

Star and Planet Combinations Bernadette Brady,2008 Brady offers detailed interpretations of an individual's natal heliacal rising and setting stars--stars that yield insight into the nature of one's soul and spiritual path. Additionally she provides a comprehensive listing of the meaning of every star when combined with all the planets and nodal axis, for natal as well as predictive use.

Brady's Book of Fixed Stars Bernadette Brady,2024-08-05 A richly detailed in-depth look at fixed stars and their role in affecting astrological predictions. Here, celebrated astrologer Bernadette Brady melds modern techniques with Egyptian and early Greek procedures and mythology so astrologers can apply these techniques to modern chart interpretation. Her methods open a window on the fixed stars, revealing how a major star in a person's chart indicates the stage of life in which it is active, and how it reveals the person's life journey through the mythology that the star represents. The book includes: Paran Maps and Star Phases for over sixty stars New insights into the natal use of fixed stars, as well as their use in mundane astrology Extensive appendices of Heliacal Rising and Acronychal Setting graphs and tables to help astrologers find rising or setting dates for any given location A listing of 176 stars with their 21st-century Ptolemaic processed positions versus their commonly-considered positions. Originally published by Weiser Books in 1999, this new Weiser Classics edition is newly typeset and redesigned. It includes a new foreword by Chloe Margherita, a practicing astrologer with an in-depth appreciation of the fixed stars.

Pseudo-Manetho, Apotelesmatica ,2023-04-27 The corpus of astrological material ascribed to the Egyptian priest Manetho consists of six books of poetry. This book serves as the companion to the one published by OUP in 2020, which was the first commentary in any

language on the earliest three books of Manetho's poetry (two, three, and six as they appear in the manuscript). This volume supplies the remainder (books four, one, and five). Manetho was credited with a series of didactic poems which list outcomes for planetary set-ups in a birth chart. The books covered in this volume are not as easily dated as those in the first volume, but the most recent is probably no later than the fourth century and they are still Egyptian. As in the first volume, their descriptions of the kinds of person who are born under happy and unhappy configurations of stars speak to the lived realities, aspirations, and fears of the astrologer's clientele. Unlike in the first volume, however, the individual books treated here have different authors, and there is more emphasis on profiling individual poets in terms of style, metre, and mannerisms. As in the first volume, there is a Greek text with English translation and an apparatus with parallel material to enable comparison with related works. But this volume pays more attention to the transmission of traditional material from one author to another, and to the special approach required of an editor of material which, being in practical use, circulated in unstable and minutely-varying textual forms.
