Application of Geographic Information Systems Bhuiyan Monwar Alam,2012-10-31 The importance of Geographic Information Systems (GIS) can hardly be overemphasized in today's academic and professional arena. More professionals and academics have been using GIS than ever – urban

Magic and Divination in Early Islam Emilie Savage-Smith,2021-01-20 Magic and divination in early Islam encompassed a wide range of practices, including belief in jinn, warding off the evil eye, the production of amulets and other magical equipment, conjuring, wonder-working, dream interpretation, predicting the weather, casting lots, astrology, and physiognomy. The ten studies here are concerned with the pre-Islamic antecedents of such practices, and with the theory of magic in healing, the nature and use of amulets and their decipherment, the arts of astrometeorology and geomancy, the refutation of astrology, and the role of the astrologer in society. Some of the studies are highly illustrated, some long out of print, some revised or composed for this volume, and one translated into English for the first time. These fundamental investigations, together with the introductory bibliographic essay, are intended as a guide to the concepts, terminology, and basic scholarly literature of an important, but often overlooked, aspect of classical Islamic culture.

Humanism, Culture, and Language in the Near East Asma Afsaruddin,A. H. Mathias Zahniser,1997-06-23 Essays by 33 colleagues, friends, and students of the Johns Hopkins University Arabist and linguist. Topics include (1) humanism, culture, and literature; (2) Arabic; (3) Aramaic; and (4) Afroasiatic.

Light ,1913

Islamic Astronomy and Geography David A. King,2022-02-13 This volume of 12 studies, mainly published during the past 15 years, begins with an overview of the Islamic astronomy covering not only sophisticated mathematical astronomy and instrumentation but also simple folk astronomy, and the ways in which astronomy was used in the service of religion. It continues with discussions of the importance of Islamic instruments and scientific manuscript illustrations. Three studies deal with the regional schools that developed in Islamic astronomy, in this case, Egypt and the Maghrib. Another focuses on a curious astrological table for calculating the length of life of any individual. The notion of the world centred on the sacred Kaaba in Mecca inspired both astronomers and proponents of folk astronomy to propose methods for finding the qibla, or sacred direction towards the Kaaba; their activities are surveyed here. The interaction between the mathematical and folk traditions in astronomy is then illustrated by an 11th-century text on the qibla in Transoxania. The last three studies deal with an account of the geodetic measurements sponsored by the Caliph al-Ma'mûn in the 9th century; a world-map in the tradition of the 11th-century polymath al-Bîrûnî, alas corrupted by careless copying; and a table of geographical coordinates from 15th-century Egypt.

Exploring Ancient Skies David H. Kelley,Eugene F. Milone,2005-12-06 Exploring Ancient Skies brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope. The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean, the Far East, and the New World (particularly Mesoamerica), putting the ancient astronomical materials into their archaeological and cultural contexts. The authors begin with an overview of the field and proceed to essential aspects of naked-eye astronomy, followed by an examination of specific cultures. The book concludes by taking into account the purposes of ancient astronomy: astrology, navigation, calendar regulation, and (not least) the understanding of our place and role in the universe. Skies are recreated to display critical events as they would have appeared to ancient observers - events such as the supernova of 1054, the 'lion horoscope' or the 'Star of Bethlehem.' Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation. It will be useful as a reference for scholars and students in both astronomy and archaeology, and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history.

Islamic Astronomical Instruments David A. King,1987

Exotic Commodities Frank Dikötter,2007-03-27 Exotic Commodities is the first book to chart the consumption and spread of foreign goods in China from the mid-nineteenth century to the advent of communism in 1949. Richly illustrated and revealing, this volume recounts how exotic commodities were acquired and adapted in a country commonly believed to have remained hostile toward alien things during the industrial era. China was not immune to global trends that prized the modern goods of civilized nations. Foreign imports were enthusiastically embraced by both the upper and lower classes and rapidly woven into the fabric of everyday life, often in inventive ways. Scarves, skirts, blouses, and corsets were combined with traditional garments to create strikingly original fashions. Industrially produced rice, sugar, wheat, and canned food revolutionized local cuisine, and mass produced mirrors were hung on doorframes to ward off malignant spirits. Frank Dikötter argues that ordinary people were the least inhibited in acquiring these products and therefore the most instrumental in changing the material culture of China. Landscape paintings, door leaves, and calligraphy scrolls were happily mixed with kitschy oil paintings and modern advertisements. Old and new interacted in ways that might have seemed incongruous to outsiders but were perfectly harmonious to local people. This pragmatic attitude would eventually lead to China's own mass production and export of cheap, modern goods, which today can be found all over the world. The nature of this history raises the question, which Dikötter pursues in his conclusion: If the key to surviving in a fast-changing world is the ability to innovate, could China be more in tune with modernity than Europe?

Essentials of Paleomagnetism Lisa Tauxe,2010-03-19 This book by Lisa Tauxe and others is a marvelous tool for education and research in Paleomagnetism. Many students in the U.S. and around the world will welcome this publication, which was previously only available via the Internet. Professor Tauxe has performed a service for teaching and research that is utterly unique.—Neil D. Opdyke, University of Florida

The Complete Guide to Crystal Astrology Marina Costelloe,2012-08-01 You almost certainly know your personal zodiac sign which is based upon the position of the sun at your birth. But did you know that each of these signs is composed of 30 different degrees each representing a different energy or character shape? The Complete Guide to Crystal Astrology assigns a crystal element to each of the 360 degrees of the zodiac. This is the base for a very individual association between the stars of your birth and crystals. Look up which of the 360 crystal elements can be associated to the position of the sun at your birthday. Translate your whole birth chart into crystals by looking up which ones are associated to the different planets at your birth. Find out how your personal crystal elements are connected to numerology, Marc Edmund Jones key words, Sabian symbols and Jane Ridder-Patrick healing body points. Discover the message of crystals about your life path, your hidden and aware abilities.

The Lair of the White Worm Bram Stoker,1911 This book centers around Adam Salton who is contacted by his granduncle in England, for the purpose of establishing a relationship between these last two members of the family. Adam travels to Richard Salton's house in Mercia, and quickly finds himself in the center of some inexplicable occurrences. The new heir to the Caswall estate, Edgar Caswall appears to be making some sort of a mesmeric assault on a local girl. And, a local lady, Arabella March, seems to be running a game of her own, perhaps angling to become Mrs. Caswall. There is something strange about Lady March, something inexplicable and evil.--Online-literature.com.

Islamic Medical and Scientific Tradition Peter E. Pormann,2011 Presents a selection of articles that illustrate the intellectual curiosity and theoretical vigour with which Arabs and non-Arabs living in the medieval Muslim world pursued scientific endeavours. The focus is firmly on articles published during the last 20 years, during which the discipline has enjoyed a new bloom.

Orality and Literacy Kristina Rose Fagan,Natalia Khanenko-Friesen,2011-01-01 Orality and Literacy investigates the interactions of the oral and the literate through close studies of particular cultures at specific historical moments. Rejecting the 'great-divide' theory of orality and literacy as separate and opposite to one another, the contributors posit that whatever meanings the two concepts have are products of their ever-changing relationships to one another. Through topics as diverse as Aboriginal Canadian societies, Ukrainian-Canadian narratives, and communities in ancient Greece, Medieval Europe, and twentieth-century Asia, these cross-disciplinary essays reveal the powerful ways in which cultural assumptions, such as those about truth, disclosure, performance, privacy, and ethics, can affect a society's uses of and approaches to both the written and the oral. The

fresh perspectives in Orality and Literacy reinvigorate the subject, illuminating complex interrelationships rather than relying on universal generalizations about how literacy and orality function.

History and Material Culture Karen Harvey,2013-02-01 Sources are the raw material of history, but where the written word has traditionally been seen as the principal source, today historians are increasingly recognizing the value of sources beyond text. In History and Material Culture, Karen Harvey embarks upon a discussion about material culture – considering objects, often those found surrounding us in day to day life, as sources, which can help historians develop new interpretations and new knowledge about the past. Across ten chapters, different historians look at a variety of material sources from around the globe and across centuries to assess how such sources can be used to study history. While the sources are discussed from ‘interdisciplinary’ perspectives, each contributor examines how material culture can be approached from an historical viewpoint, and each chapter addresses its theme or approach in a way accessible to readers without expertise in the area. In her introduction, Karen Harvey discusses some of the key issues raised when historians use material culture, and suggests some basic steps for those new to these kinds of sources. Opening up the discipline of history to new approaches, and introducing those working in other disciplines to historical approaches, this book is the ideal introduction to the opportunities and challenges of researching material culture.

Islamic Geomancy and a Thirteenth-century Divinatory Device Emilie Savage-Smith,Marion Bush Smith,1980

The Encyclopaedia of Islam ,1954

Man and His Symbols Carl G. Jung,2012-02-01 The landmark text about the inner workings of the unconscious mind—from the symbolism that unlocks the meaning of our dreams to their effect on our waking lives and artistic impulses—featuring more than a hundred images that break down Carl Jung’s revolutionary ideas “What emerges with great clarity from the book is that Jung has done immense service both to psychology as a science and to our general understanding of man in society.”—The Guardian “Our psyche is part of nature, and its enigma is limitless.” Since our inception, humanity has looked to dreams for guidance. But what are they? How can we understand them? And how can we use them to shape our lives? There is perhaps no one more equipped to answer these questions than the legendary psychologist Carl G. Jung. It is in his life’s work that the unconscious mind comes to be understood as an expansive, rich world just as vital and true a part of the mind as the conscious, and it is in our dreams—those personal, integral expressions of our deepest selves—that it communicates itself to us. A seminal text written explicitly for the general reader, Man and His Symbols is a guide to understanding the symbols in our dreams and using that knowledge to build fuller, more receptive lives. Full of fascinating case studies and examples pulled from philosophy, history, myth, fairy tales, and more, this groundbreaking work—profusely illustrated with hundreds of visual examples—offers invaluable insight into the symbols we dream that demand understanding, why we seek meaning at all, and how these very symbols affect our lives. By illuminating the means to examine our prejudices, interpret psychological meanings, break free of our influences, and recenter our individuality, Man and His Symbols proves to be—decades after its conception—a revelatory, absorbing, and relevant experience.

Whispering the Strategies of Language: An Psychological Quest through **Mb Geomancy 10**

In a digitally-driven earth where screens reign great and instant interaction drowns out the subtleties of language, the profound strategies and mental nuances concealed within phrases often move unheard. However, nestled within the pages of **Mb Geomancy 10** a captivating literary treasure sporting with fresh emotions, lies an exceptional quest waiting to be undertaken.
