Cicero on the Philosophy of Religion J. P. F. Wynne, 2019-10-17 Do the gods love you? Cicero gives deep and surprising answers in two philosophical dialogues on traditional Roman religion.

Divining the Etruscan World Jean MacIntosh Turfa, 2012-07-16 The Etruscan Brontoscopic Calendar is a rare document of omens foretold by thunder. It long lay hidden, embedded in a Greek translation within a Byzantine treatise from the age of Justinian. The first complete English translation of the Brontoscopic Calendar, this book provides an understanding of Etruscan Iron Age society as revealed through the ancient text, especially the Etruscans' concerns regarding the environment, food, health and disease. Jean MacIntosh Turfa also analyzes the ancient Near Eastern sources of the Calendar and the subjects of its predictions, thereby creating a picture of the complexity of Etruscan society reaching back before the advent of writing and the recording of the calendar.

Ancient Mesopotamia A. Leo Oppenheim, 2013-01-31 This splendid work of scholarship . . . sums up with economy and power all that the written record so far deciphered has to tell about the ancient

and complementary civilizations of Babylon and Assyria.—Edward B. Garside, New York Times Book Review Ancient Mesopotamia—the area now called Iraq—has received less attention than ancient Egypt and other long-extinct and more spectacular civilizations. But numerous small clay tablets buried in the desert soil for thousands of years make it possible for us to know more about the people of ancient Mesopotamia than any other land in the early Near East. Professor Oppenheim, who studied these tablets for more than thirty years, used his intimate knowledge of long-dead languages to put together a distinctively personal picture of the Mesopotamians of some three thousand years ago. Following Oppenheim's death, Erica Reiner used the author's outline to complete the revisions he had begun. To any serious student of Mesopotamian civilization, this is one of the most valuable books ever written.—Leonard Cottrell, Book Week Leo Oppenheim has made a bold, brave, pioneering attempt to present a synthesis of the vast mass of philological and archaeological data that have accumulated over the past hundred years in the field of Assyriological research.—Samuel Noah Kramer, Archaeology A. Leo Oppenheim, one of the most distinguished Assyriologists of our time, was editor in

charge of the Assyrian Dictionary of the Oriental Institute and John A. Wilson Professor of Oriental Studies at the University of Chicago.

Maternal Megalomania Julie Langford, 2013-07-24 She employs Julia Domna as a case study to explore the creation of ideology between the emperor and its subjects.

Life and Times of Frederick Douglass Frederick Douglass, 1882 Frederick Douglass recounts early years of abuse, his dramatic escape to the North and eventual freedom, abolitionist campaigns, and his crusade for full civil rights for former slaves. It is also the only of Douglass's autobiographies to discuss his life during and after the Civil War, including his encounters with American presidents such as Lincoln, Grant, and Garfield.

Yoruba Art and Language Rowland Abiodun, 2014-11-13 The Yoruba was one of the most important civilizations of sub-Saharan Africa. While the high quality and range of its artistic and material production have long been recognized, the art of the Yoruba has been judged primarily according to the standards and principles of Western aesthetics. In this book, which merges the methods of art history, archaeology, and anthropology, Rowland Abiodun offers new insights into Yoruba art and material culture by examining them within the context of the civilization's cultural norms and values and, above all, the Yoruba language. Abiodun draws on his fluency and prodigious knowledge of Yoruba culture and language to dramatically enrich our understanding of Yoruba civilization and its arts. The book includes a companion website with audio clips of the Yoruba language, helping the reader better grasp the integral connection between art and language in Yoruba culture.

Lost Libraries J. Raven, 2004-01-31 This pioneering volume of essays explores the destruction of great libraries since ancient times and examines the intellectual, political and cultural consequences of

loss. Fourteen original contributions, introduced by a major re-evaluative history of lost libraries, offer the first ever comparative discussion of the greatest catastrophes in book history from Mesopotamia and Alexandria to the dispersal of monastic and monarchical book collections, the Nazi destruction of Jewish libraries, and the recent horrifying pillage and burning of books in Tibet, Bosnia and Iraq.

Medicine in Ancient Assur Troels Pank Arbøll, 2020-10 In *Medicine in Ancient Assur* Troels Pank Arbøll offers a microhistorical study of a single exorcist named KiĪir-Aššur who practiced medical and magical healing in the ancient city of Assur (modern northern Iraq) in the 7th century BCE. The book provides the first detailed analysis of a healer's education and practice in ancient Mesopotamia based on at least 73 texts assigned to specific stages of his career. By drawing on a microhistorical framework, the study aims at significantly improving our understanding of the functional aspects of texts in their specialist environment. Furthermore, the work situates KiĪir-Aššur as one of the earliest healers in world history for whom we have such details pertaining to his career originating from his own time--

Scale, Space, and Canon in Ancient Literary Culture Reviel Netz, 2020-02-20 A history of ancient literary culture told through the quantitative facts of canon, geography, and scale.

Tungaru Traditions Arthur Francis Grimble, 2019-03-31 Grimble's ethnographic studies of the Gilbertese, prepared between 1916 and 1926, provide an excellent baseline account of a fundamentally pre-contact culture. This collection, edited and introduced by H.E. Maude, comprises essays on mythology, history, and dancing; four chapters on the Maneaba; and organized field notes.

The Poetry of Du Fu Stephen Owen, 2015-11-13 The Complete Poetry of Du Fu presents a complete scholarly translation of Chinese literature alongside the original text in a critical edition. The English translation is more scholarly than vernacular Chinese translations, and it is compelled to address problems that even the best traditional commentaries overlook. The main body of the text is a facing page translation and critical edition of the earliest Song editions and other sources. For convenience the translations are arranged following the sequence in Qiu Zhao'an's *Du shi xiangzhu* (although Qiu's text is not followed). Basic footnotes are included when the translation needs

clarification or supplement. Endnotes provide sources, textual notes, and a limited discussion of problem passages. A supplement references commonly used allusions, their sources, and where they can be found in the translation. Scholars know that there is scarcely a Du Fu poem whose interpretation is uncontested. The scholar may use this as a baseline to agree or disagree. Other readers can feel confident that this is a credible reading of the text within the tradition. A reader with a basic understanding of the language of Chinese poetry can use this to facilitate reading Du Fu, which can present problems for even the most learned reader.

History of Humanity UNESCO, 1996-12-31 The second volume covers the first two and a half thousand years of recorded history, from the start of the Bronze Age 5,000 years ago to the beginnings of the Iron Age. Written by a team of over sixty specialists, this volume includes a comprehensive bibliography and a detailed index.

Man, Play, and Games Roger Caillois, 2001 According to Roger Caillois, play is an occasion of pure waste. In spite of this - or because of it - play constitutes an essential element of human social

and spiritual development. In this study, the author defines play as a free and voluntary activity that occurs in a pure space, isolated and protected from the rest of life.

Introductory Grammar of Amharic Wolf Leslau, 2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in

Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

Agha, Shaikh and State Martin van Bruinessen, 1992 Exacerbated by the Gulf War, the plight of the Kurds is one of the most urgent problems facing the international community. This authoritative study of the Kurdish people provides a deep and varied insight into one of the largest primarily tribal communities in the world. It covers the collapse of the Ottoman Empire, the great Kurdish revolt against republican Turkey, the birth of Kurdish nationalism and the situation of the Kurdish people in Iraq, Turkey and Iran today. Van Bruinessen's work is already recognized as a key contribution to this subject. Tribe by tribe, he accounts for the evolution of power within Kurdish religious and other lineages, and shows how relations with the state have played a key constitutive role in the development of tribal structures. This is illustrated from contemporary Kurdish life, highlighting the complex interplay between traditional clan loyalties and their modern national equivalents. This book is

essential to any Middle East collection. It has serious implications for the study of tribal life elsewhere, and it documents the history of what has until recently been a forgotten people.

The Making of Empire in Bronze Age Anatolia Claudia Glatz, 2020-11-12 This book reconsiders the concept of empire and examines the processes of imperial making and undoing in Hittite Anatolia (c. 1600-1180 BCE).

The Technology of Teaching B. F. Skinner, 2016-04-26 On Parent's Day, in 1952, B. F. Skinner visited his daughter's fourth grade math class. As he watched the lesson, he became increasingly uncomfortable. Almost every principle of effective teaching that he had studied for more than 20 years was being violated in that classroom. Yet it was a typical class. The teacher showed how to solve the day's problems, then gave the students a worksheet to do. Some children began to work readily while others shifted uncomfortably in their chairs, or raised their hands for help. The teacher went from desk to desk, giving help and feedback. Skinner knew what was needed. Each student should be given a

problem tailored precisely to his or her skill level, not to the class average, and every answer needed to be assessed immediately to determine the next step. The task was clearly impossible for one teacher. That afternoon, Skinner set to work on a teaching machine. Today's computers have made the mechanical machine obsolete, but the principles of how to design instruction in steps that lead from a basic level to competent performance are as valid today as they were in the 20th century. This book brings together Skinner's writings on education during the years he was most involved in improving education.
