Avian Brood Parasitism Manuel Soler,2018-05-02 Brood parasitism has become one of the most flourishing areas of research in evolutionary ecology and one of the best model systems for investigating coevolution. This subject has undergone remarkable advances during the last two decades, but has not been covered by any book in the 21st century. This book offers a comprehensive and up-to-date overview of the fascinating field of avian brood parasitism. The topics covered include conspecific

brood parasitism; evolution and phylogenetic history of avian brood parasites; parasitic behaviour used by brood parasites; adaptations and counter-adaptations of brood parasites and their hosts at every stage of the breeding cycle (before laying, egg, chick and fledgling stages); factors affecting the evolution of host defences and parasitic attacks; the role of phenotypic plasticity in host defences; mechanisms driving egg recognition and rejection; evolution of nest sharing or nest killing by brood parasite chicks; begging behaviour in parasitized nests and food delivery by host adults; and recognition of conspecifics by juvenile brood parasites. This volume provides a comprehensive reference resource for readers and researchers with an interest in birds, behaviour and evolution, as well as a source of hypotheses and predictions for future investigations into this dynamic subject.

India's Rise to Power in the Twentieth Century and Beyond S. Gordon, 1994-11-13 `...sober and extremely well-

researched book.' - Inder Malhotra, Business World `...very detailed and up-to-date account.' - Richard Newman, Times Higher Education Supplement This book examines the economic and technological basis for India's rise to power and the political factors that shape the nature of the power it will develop into. It shows that while India has concentrated on many of the scientific and technical capabilities that serve the needs of a rising power, it has not been able to achieve a balanced process of development. This imbalance feeds sub-national political discontent and undercuts the very power that India has sought to acquire, thus delaying her rise to power.

Twelve Years a Slave Solomon Northup, 2024-01-04
Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black

people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807- c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

The Geography of Gandhāran Art Wannaporn Rienjang, Peter Stewart, 2019-03-15 Gandhāran art is usually regarded as a single phenomenon - a unified regional artistic tradition or 'school'. Indeed it has distinctive visual characteristics, materials, and functions, and is characterized by its extensive borrowings from the Graeco-Roman world. Yet this tradition is also highly varied. Even the superficial homogeneity of Gandhāran sculpture, which constitutes the bulk of documented artistic material from this region in the early centuries AD, belies a considerable range of styles, technical approaches, iconographic choices, and levels of artistic skill. The geographical variations in Gandhāran art have received less attention than they deserve. Many surviving Gandhāran artefacts are unprovenanced and the difficulty of tracing substantial assemblages of sculpture to particular sites has obscured the fine-grained picture of its artistic geography. Well documented modern excavations at particular sites and

areas, such as the projects of the Italian Archaeological Mission in the Swat Valley, have demonstrated the value of looking at sculptures in context and considering distinctive aspects of their production, use, and reuse within a specific locality. However, insights of this kind have been harder to gain for other areas, including the Gandhāran heartland of the Peshawar basin. Even where large collections of artworks can be related to individual sites, the exercise of comparing material within and between these places is still at an early stage. The relationship between the Gandhāran artists or 'workshops', particular stone sources, and specific sites is still unclear. Addressing these and other questions, this second volume of the Gandhara Connections project at Oxford University's Classical Art Research Centre presents the proceedings of a workshop held in March 2018. Its aim is to pick apart the regional geography of Gandhāran art, presenting new discoveries at particular sites, textual evidence, and the challenges and opportunities of exploring Gandhāra's artistic geography.

Kusumabale Dēvanūra Mahādēva, 2015 Midnight- when stone and water melt- at the village entrance, the guardian-lamp spirits meet, they talk, exchange notes, share joys, share sorrows. Devanoora Mahadeva leads us to a world of spirits ruled by a strong sense of justice. As we listen in, their conversation introduces four generations of a family: Akkamahadevamma; her son Yaada; his son Somappa; and the main protagonist, Somappa's daughter, Kusuma. In this intricately woven cosmos, death casts its shadow. Following the different voices around, we come face to face with the harsh realities of Dalit life. Steered by the nuances of folk tale and oral tradition, this extraordinary account of feudal oppression presents a rare blend of poetry and prose. A modern classic, when it first appeared in 1988, *Kusumabale* marked a turning point in modern Kannada

literature.

Infrared Spectroscopy of Symmetric and Spherical Spindles for Space Observation 1 Pierre-Richard Dahoo, Azzedine Lakhli, 2021-05-25 This book is dedicated to the description and application of various different theoretical models to identify the near and mid-infrared spectra of symmetric and spherical top molecules in their gaseous form. Theoretical models based on the use of group theory are applied to rigid and non-rigid molecules, characterized by the phenomenon of tunneling and large amplitude motions. The calculation of vibration-rotation energy levels and the analysis of infrared transitions are applied to molecules of ammonia (NH₃) and methane (CH₄). The applications show how interactions at the molecular scale modify the near and mid-infrared spectra of isolated molecules, under the influence of the pressure of a nano-cage (the substitution site of a rare gas matrix, clathrate, fullerene or zeolite) or a surface, and allow us to identify the characteristics of the perturbing environment. This book provides valuable support for teachers and researchers but is also intended for engineering students, working research engineers and Masters and doctorate students.
