**The Boat of a Million Years** Poul Anderson, 2018-09-18 A New York Times Notable Book and Hugo and Nebula Award Finalist: This epic chronicle of ten immortals over the course of history “succeeds admirably” (The New York Times). The immortals are ten individuals born in antiquity from various cultures. Immune to disease, able to heal themselves from injuries, they will never die of old age—although they can fall victim to catastrophic wounds. They have walked among mortals for millennia, traveling across the world, trying to understand their special gifts while searching for one another in the hope of finding some meaning in a life that may go on forever. Following their individual stories over the course of human history and beyond into a richly imagined future, “one of science fiction’s most revered writers” (USA Today) weaves a broad tapestry that is “ambitious in scope, meticulous in detail, polished in style” (Library Journal).

Taiwan Film Directors Emilie Yueh-yu Yeh, Darrell William Davis, 2005 The year 2003 marked the fiftieth anniversary of James Watson's and Francis Crick's discovery of the structure of DNA, which began a revolution in the biological sciences and radically altered the way humans view life and themselves. In this poetic account Erwin Fleissner, an eminent cancer researcher and teacher, offers a personal and professional reflection on the most significant developments in molecular genetics and cell biology over the past fifty years. Vital Harmonies is a sweeping look at these crucial scientific advances and an insider's perspective on what scientists have actually learned from them. Contrasting the humanistic side of scientific research with more deterministic or mechanical explanations of life processes, Fleissner discusses everything from natural selection to the tradition of rational inquiry stemming from the Enlightenment.

He goes on to describe the structures of macromolecules and their organizing principles as well as cancer genes, stem cells, and the Human Genome Project. He also explores neuronal cells and the emergence of consciousness and how biological evolution is the foundation of our personal reality as well as our global responsibility. Fleissner asserts that scientific investigations cannot negate our essential humanness nor should the public fear them. Taking an optimistic perspective, he argues that a deeper knowledge of ourselves as biological entities will provide us, ultimately, with greater health, serenity, and self-knowledge. *Vital Harmonies* gives readers, whatever their background, an engaging analysis of some of the most important questions facing humanity today.

*Gendered Encounters between Germany and Asia* Joanne Miyang Cho, Douglas T.

McGetchin, 2016-12-14 This volume provides new insights into gendered interactions over the past two centuries between Germany and Asia, including India, China, Japan, and previously overlooked Asian countries including Vietnam, the Philippines, Thailand, and Korea. This volume presents scholarship from academics working in the field of German-Asian Studies as it relates to gender across transnational encounters in the nineteenth and twentieth centuries. Gender has been a lens of analysis in isolated published chapters in previous edited volumes on German-Asian connections, but nowhere has there been a volume specifically dedicated to the analysis of gender in this field. Rejecting traditional notions of West and East as seeming polar opposites, their contributions to this volume attempt to reconstruct the ways in which German and Asian men and women have cooperated and negotiated the challenge of modernity in various fields.
