Electromagnetic Compatibility Donald G. Baker, 2015-12-16 Explains and resolves the electromagnetic compatibility challenges faced by engineers in transportation and communications This book is a mathematically-rich extension of courses required to maintain the Federal Communications Commission (FCC), the Canadian Standards Association (CSA), and the European Union certifications. The text provides an in-depth study of the electromagnetic compatibility (EMC) issues related to specific topics in transportation and communications, including Light Rail Transit, shadow effects, and radio dead spots, through the analysis of real-world case studies in the United States and Europe. The author provides Cartesian, cylindrical, and spherical solutions that can be applied to Maxwell's and Wave Equations. The book covers topics such as SCADA Systems, shielding, and

complexities of radio frequencies and their effect on communication houses. The author also provides information for alternative industries to apply the solutions from the case studies and background content to their own professions. Presents a series of over twenty real-world case studies related to EMC in transportation and communications Covers power line radiation, shadow effects on subway cars, train control systems, and edge distortions Includes the OATS testing method and Department of Transportation (DOT) test Provides access to a companion website housing power point slides and additional appendices Electromagnetic Compatibility: Analysis and Case Studies in Transportation is a reference for practicing engineers involved in transportation and communications, as well as post-graduate engineering students studying transportation and communications in engineering.

Black Intimacies Shirley Ann Hill, 2005 In *Black Intimacies: A Gender Perspective on Families and Relationships*, Shirley A. Hill applies a gender lens to the multiple systems of oppression that have shaped the lives of African American women and men. She challenges the image of a monolithic black population, a legacy of the civil rights movement that she argues is impossible to sustain in the postmodern era. Through a critique of intersectionality theory, Hill examines the ways in which gender has affected experiences of intimacy, family relationships, child rearing and motherhood for contemporary African Americans. Drawing on ethnographic material, interviews, and scholarly research, Hill's work rethinks the cultural and

historical definitions of black identity, and reconceptualizes the various forms of oppression faced by black women. This book will be useful to students and instructors of African American Studies, Gender Studies, Sociology, Anthropology, Marriage and Family, and Social Work.

**A Family Matter** Megan Gaucher, 2018-05-15 What is family? Citing national security and societal welfare, the Harper government adopted a strict definition of family to limit access to citizenship for certain immigrants. Megan Gaucher analyzes the government's assessment of sexual-minority refugee claimants' relationship history, common-law and married spousal sponsorship applications, and marriage fraud, concluding that this narrative of citizenship reinforces racialized, gendered, and sexualized assumptions about the "Canadian family." As many Western governments ponder more restrictive immigration policies, *A Family Matter* offers a timely examination of the Canadian approach and proposes a course for re-evaluating how family is defined and for implementing fairer assessments of immigrants and refugees.

Should I Stay Or Go? Lee Raffel, 1999 Until now, couples facing the dilemma of deciding whether or not to stay in an unhappy marriage had three options:

individual or couples therapy, separation, or divorce. Should I Stay or Go? provides these couples with a fourth option--the Controlled Separation (CS). CS is a compassionate process that is designed to build respect and foster advocacy between spouses. The book explains the CS guidelines, including the 12 fundamental issues that must be resolved for a workable, orderly separation. It also contains sample contracts, along with helpful checklists and self-assessment tools.

**Making Marriage Work** Rob Pascale, Louis H. Primavera, 2016-02-23 Staying happily married has become a difficult proposition in recent times. Although the institution is still firmly embedded in our culture, divorce rates have steadily climbed since the 1960s. While some marriages are truly divorce-worthy, many other broken marriages can be saved. Recent emphasis on personal needs and greater social acceptance of divorce and alternative lifestyles may have weakened the resolve of partners to work through their problems. Furthermore, many couples may not realize that problems in their current marriages are likely to surface in other relationships. Consequently, while they may consider divorce a solution, it may in fact only be a stepping stone to the next relationship where patterns may repeat. Solving marital differences can be difficult. They tend to be linked to or caused by other problems, and that can make it hard to identify the real reasons for conflicts. Without knowing the true nature of their problems, couples cannot arrive at solutions that actually work. To understand the underlying issues that plague many marriages, the authors look to the research conducted on the subject over the past fifty years and to real life stories of success and failure to outline the major issues that detract from marital stability. Drawing on Louis Primavera's twenty-five years in private practice as a marriage counselor, each chapter is peppered with anecdotes that every married person can relate to, and that help bring issues to life. The authors also propose frank and honest solutions that can help couples have more

satisfying relationships. Anyone looking to improve their marriage will find suggestions for sussing out the underlying problems they may be experiencing and guidance for addressing those problems.

*Focality and Extension in Kinship* Warren Shapiro, 2018-04-20 When we think of kinship, we usually think of ties between people based upon blood or marriage. But we also have other ways—nowadays called ‘performative’—of establishing kinship, or hinting at kinship: many Christians have, in addition to parents, godparents; members of a trade union may refer to each other as ‘brother’ or ‘sister’. Similar performative ties are even more common among the so-called ‘tribal’ peoples that anthropologists have studied and, especially in recent years, they have received considerable attention from scholars in this field. However, these scholars tend to argue that performative kinship in the Tribal World is semantically on a par with kinship established through procreation and marriage. Harold Scheffler, long-time Professor of Anthropology at Yale University, has argued, by contrast, that procreative ties are everywhere semantically central, i.e. focal, that they provide bases from which other kinship ties are extended. Most of the essays in this volume illustrate the validity of Scheffler’s position, though

two contest it, and one exemplifies the soundness of a similarly universalistic stance in gender behaviour. This book will be of interest to everyone concerned with current controversy in kinship and gender studies, as well as those who would know what anthropologists have to say about human nature. "The study of kinship once ruled the discipline of anthropology, and Hal Scheffler was one of its magisterial figures. This volume reminds us why. Scheffler's powerful analyses of kinship systems often conflicted with the views of his more relativist contemporaries. He cut through the fog of theory to emphasise the human essentials, namely the importance of the social bonds rooted in motherhood and fatherhood. Anthropology in its decades-long retreat from the serious study of kinship has lost a great deal. This volume points the way to a restoration." – Peter Wood, National Association of Scholars
