Archaeology of the Ionian Sea Christina Souyoudzoglou-Haywood,Christina Papoulia,2022-01-31 Presents a thematic collection of papers dealing with the Stone Age and Bronze Age archaeology of the Ionian Sea, situated off the south western Balkan peninsula. It is based on an international conference held in Athens, Greece in January 2020. The eastern Ionian occupies a geographically complex area, which since the Pleistocene has undergone significant alterations due to tectonic activity and sea-level fluctuations. This dynamic environment, where islands, mainland, and sea intertwined to present different landscapes and seascapes to the human communities exploring the region at different times in the past, provides an ideal setting for their study from a diachronic perspective. This book deals thematically with the processes of circulation of people, materials, artefacts and ideas by examining patterns of settlement, burial and multi-layered interconnections between the different communities via land and sea. It investigates aspects of regional and interregional communication, isolation, collective memory and the creation of distinct identities within and between different cultural and social groups. It focuses on the islands of the Central Ionian Sea, offering new data from excavations and surveys on Zakynthos, Kefalonia, Ithaki and the smaller islands of the Inner Ionian Archipelago between Lefkada and Akarnania. The cultural interchange between the islands and the continental coasts is reflected in the volume with the addition of chapters dealing with contemporary sites in west Greece and southeast Italy. The Ionian, often regarded as 'at the fringes' of the Aegean, the Balkan and the central Mediterranean archaeological discourse, has lately offered new and exciting data that not only enrich but also alter our perceptions of mobility, settlement and interaction. The collection of papers in this book enhances theoretical discussions by offering a geographically and culturally comparative approach, ranging from the earliest Palaeolithic evidence of human presence in the region to the end of the Bronze Age.

Kinship in Ancient Athens S. C. Humphreys,Sarah C. Humphreys,2018 The concept of kinship is at the heart of understanding the structure of ancient Athenian society and the lives of its citizens. Drawing on epigraphic, literary, and archaeological sources, 'Kinship in Ancient Athens' explores interactions between kin across a range of social contexts, from family life to legal matters, politics, and more.

A Satellite Analysis of Twin Tropical Cyclones in the Western Pacific James L. Cox,Gilbert Jager,1969 During November 1967, an unusual set of twin tropical cyclones, ANNIE and GILDA, formed about the same time on opposite sides of the equator in the Western Pacific. They illustrate the unique role of satellite cloud photographs play in providing meteorologists with an important tool for studying tropical disturbances in various stages of their life cycles and their related environments. Satellite derived data, particularly cirrus-level wind estimates from cloud photographs, are used to recount the story of ANNIE and GILDA. It is the change which takes place in the cirrus-level wind field that enables the meteorologist to discern the

step by step development of the respective cyclones as well as the interaction between the high-level winds of the two hemispheres and the twins themselves.

The Freshwater Fishes of British Columbia J. D. McPhail, 2007-09-28 The threat of deteriorating habitats and a loss of biodiversity make this reference work on the freshwater fishes of British Columbia more necessary than ever before. Eighty-one comprehensive species accounts aid accurate identification and consist of an illustration, the scientific and common names of the fish, its distinguishing characteristics, taxonomic comments, geographic distribution, a life-history summary, a habitat-use summary, and conservation comments. The book is a critical resource for biologists, naturalists, management and conservation officers, anglers, and members of the public who are concerned about our natural heritage.

Coupled Ocean-Atmosphere Models J.C.J. Nihoul, 1985-07-01 The exchange of momentum, heat, moisture, gases (such as CO₂ and O₂) and salt between the atmosphere and the ocean is a phenomenon of paramount importance for the dynamics of the atmosphere and the ocean. With the pressing need for reliable climate forecast (e.g. to deal with severe food and energy problems) interactive ocean-atmosphere models have become one of the main objectives of geophysical fluid dynamics. This volume provides the first state-of-the-art review of interactive ocean-atmosphere modelling and its application to climates. The papers are by active and eminent scientists from different countries and different disciplines. They provide a up-to-date survey of major recent discoveries and valuable recommendations for future research.

Advances in Design and Specification Languages for SoCs Pierre Boulet, 2006-06-30 The seventh book in the CHDL Series is composed of a selection of the best articles from the Forum on Specification and Design Languages (FDL'04). FDL is the European Forum to learn and exchange on new trends on the application of languages and models for the design of electronic and heterogeneous systems. The forum was structured around four workshops that are all represented in the book by outstanding articles: Analog and Mixed-Signal Systems, UML-based System Specification and Design, C/C++-Based System Design and Languages for Formal Specification and Verification. The Analog and Mixed-Signal Systems contributions bring some answers to the difficult problem of co-simulating discrete and continuous models of computation. The UML-based System Specification and Design chapters bring insight into how to use the Model Driven Engineering to design Systems-on-Chip. The C/C++-Based System Design articles mainly explore system level design with SystemC. The Languages for Formal Specification and Verification is represented by an invited contribution on the use of temporal assertions for symbolic model checking and simulation. And finally chapter in this book contributed by preeminent members of the automotive design industry presents the recent industry standard AutoSAR. Overall Advances in Design and Specification Languages for SoCs is an excellent opportunity to catch up with

the latest research developments in the field of languages for electronic and heterogeneous system design.

Behavioral Finance: The Second Generation Meir Statman,2019-12-02

Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

Molecular Biology and Biotechnology Robert Allen Meyers,1995-06-29 This is one volume 'library' of information on molecular biology, molecular medicine, and the theory and techniques for understanding, modifying, manipulating, expressing, and synthesizing biological molecules, conformations, and aggregates. The purpose is to assist the expanding number of scientists entering molecular biology research and biotechnology applications from diverse backgrounds, including biology and medicine, as well as physics, chemistry, mathematics, and engineering.

ImmunoPhysics and ImmunoEngineering Jorge Bernardino De La Serna,Mario Mellado,Maria Garcia-Parajo,Michael Loran Dustin,Dimitrios Morikis,2020-03-30 ImmunoPhysics (ImmPhys) and ImmunoEngineering (ImmPhysEng), are two cross-disciplinary fields. ImmPhysEng aims to unravel quantitatively the immune-system function and regulation in health and disease. Whereas ImmPhys study and assess the physical basis of the immune response, ImmEng pursues its control and prediction. Ultimately, the overarching goal of these disciplines is to facilitate the development of therapeutic interventions to more precisely modulate and control the compromised immune response during diseases. Lately, these disciplines are becoming more popular and as such, the number of publications applying physical or engineering tools to understand the immune response is increasing. Nevertheless, there is still no scientific forum compiling the ImmPhysEng research breakthroughs. Possibly the biggest burden is to stimulate a fluent communication and syntony between a physicist or engineer and an immunologist.

SOFSEM'99: Theory and Practice of Informatics Jan Pavelka, Gerard Tel,Miroslav Bartosek,2003-07-31 This year the SOFSEM conference is coming

back to Milovy in Moravia to th be held for the 26 time. Although born as a local Czechoslovak event 25 years ago SOFSEM did not miss the opportunity oered in 1989 by the newly found freedom in our part of Europe and has evolved into a full-?edged international conference. For all the changes, however, it has kept its generalist and mul-disciplinary character. The tracksof invited talks, ranging from Trends in Theory to Software and Information Engineering, attest to this. Apart from the topics mentioned above, SOFSEM'99 oer s invited talks exploring core technologies, talks tracing the path from data to knowledge, and those describing a wide variety of applications. The rich collection of invited talks presents onetraditional facet of SOFSEM: that of a winter school, in which IT researchers and professionals get an opp- tunity to see more of the large pasture of today's computing than just their favourite grazing corner. To facilitate this purpose the prominent researchers delivering invited talks usually start with a broad overview of the state of the art in a wider area and then gradually focus on their particular subject.
