*Gardens of the Moon* Steven Erikson, 2004-06-01 Vast legions of gods, mages, humans, dragons and all manner of creatures play out the fate of the Malazan Empire in this first book in a major epic fantasy series from Steven Erikson. The Malazan Empire simmers with discontent, bled dry by interminable warfare, bitter infighting and bloody confrontations with the formidable Anomander Rake and his Tiste Andii, ancient and implacable sorcerers. Even the imperial legions, long inured to the bloodshed, yearn for some respite. Yet Empress Laseen's rule remains absolute, enforced by her dread Claw assassins. For Sergeant Whiskeyjack and his squad of Bridgeburners, and for Tattersail, surviving cadre mage of the Second Legion, the aftermath of the siege of Pale should have been a time to mourn the many dead. But Darujhistan, last of the Free Cities of Genabackis, yet holds out. It is to this ancient citadel that Laseen turns her predatory gaze. However, it would appear that the Empire is not alone in this great game. Sinister, shadowbound forces are gathering as the gods themselves prepare to play their hand... Conceived and written on a panoramic scale, *Gardens of the Moon* is epic fantasy of the highest order--an enthralling adventure by an outstanding new voice. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

*Making the Modern World* Vaclav Smil, 2013-12-16 How much further should the affluent world push its material consumption? Does relative dematerialization lead to absolute decline in demand for materials? These and many other questions are discussed and answered in *Making the Modern World: Materials and Dematerialization*. Over the course of time, the modern world has become dependent on unprecedented flows of materials. Now even the most efficient production processes and the highest practical rates of recycling may not be enough to result in dematerialization rates that would be high enough to negate the rising demand for materials generated by continuing population growth and rising standards of living. This book explores the costs of this dependence and the potential for substantial dematerialization of modern economies. *Making the Modern World: Materials and Dematerialization* considers the principal materials used throughout history, from wood and stone, through to metals, alloys, plastics and silicon, describing their extraction and production as well as their dominant applications. The evolving productivities of material extraction, processing, synthesis, finishing and distribution, and the energy costs and environmental impact of rising material consumption are examined in detail. The book concludes with an outlook for the future, discussing the prospects for dematerialization and potential constraints on materials. This interdisciplinary text provides useful perspectives for readers with backgrounds including resource economics, environmental studies, energy analysis, mineral geology, industrial organization, manufacturing and material science.

*Introduction to Applied Linear Algebra* Stephen Boyd, Lieven Vandenbergh, 2018-06-07 A groundbreaking introduction to vectors, matrices, and least squares for engineering applications, offering a wealth of practical examples.

Moon Viorel Badescu, 2012-03-22 The Earth has limited material and energy resources. Further development of the humanity will require going beyond our planet for mining and use of extraterrestrial mineral resources and search of power sources. The exploitation of the natural resources of the Moon is a first natural step on this direction. Lunar materials may contribute to the betterment of conditions of people on Earth but they also may be used to establish permanent settlements on the Moon. This will allow developing new technologies, systems and flight operation techniques to continue space exploration. In fact, a new branch of human civilization could be established permanently on Moon in the next century. But, meantime, an inventory and proper social assessment of Moon's prospective energy and material resources is required. This book investigates the possibilities and limitations of various systems supplying manned bases on Moon with energy and other vital resources. The book collects together recent proposals and innovative options and solutions. It is a useful source of condensed information for specialists involved in current and impending Moon-related activities and a good starting point for young researchers.

The Student's Sanskrit-English Dictionary Vaman Shivaram Apte, 1988 The present Dictionary is designed to meet the long-felt need of the English knowing reader, who is interested in the study of classical as well as modern Sanskrit. It covers a very large field-epics such as the Ramayana and Mahabharata, Puranas and Upapuranas, Smṛti and Niti literature, Darsanas or Systems of Philosophy, such as Nyaya, Vedanta, Mimamsa, Sankhya and Yoga, Grammar, Rhetoric, Poetry in all its branches, Dramatic and Narrative literature, Mathematics, Medicine, Botany, Astronomy Music and other technical or scientific branches of learning. Thus it embraces all words occurring in the general post-Vedic literature. It includes most of the important terms in Grammar. It gives quotations and references to the peculiar and remarkable meaning of words, especially such as occur in books prescribed for study in the Indian and foreign universities. It also renders explanation of important technical terms occurring in different branches of Sanskrit learning. To add to its usefulness,

*Man, Play, and Games* Roger Caillois, 2001 According to Roger Caillois, play is an occasion of pure waste. In spite of this - or because of it - play constitutes an essential element of human social and spiritual development. In this study, the author defines play as a free and voluntary activity that occurs in a pure space, isolated and protected from the rest of life.

*Carmen Astrologicum* Dorotheus of Sidon, 2005 Dorotheus of Sidon, who appears to have lived in Alexandria, flourished in the first century AD. He wrote his Pentateuch (five books) on astrology in Greek, in verse. This translation, from 1976 by David Pingree, is from a fourth century Pahlavi (Persian) source. The first book is on the judgement of nativities. Book two concerns marriage and children. Book three is on the length of life. Book four is on the transfer of years, i.e., forecasting. Book five is on interrogations, i.e., electional astrology. In this book are the earliest known astrological charts. Dorotheus bases much of his interpretative methods on the triplicity rulers, by day and by night. All fire signs have the same rulers. All earth signs have their rulers, as do air and water signs. He uses Egyptian terms. He, like the Greeks of his day, also uses the Dodecatemoria, which are the twelfths of a sign. And many, many lots, all defined. For the first time in this edition: Pingree's Preface newly translated. An appendix with charts in modern format. A complete table of terms and triplicity rulers. A table to calculate Dodecatemoria. Newly reset to match Pingree's original 1976 edition. Written a century before Ptolemy, here is the mainstream of Greek astrology. It will handsomely repay study.

Primary Directions Sepharial, 2006-05-01 The definitive text on Primary Directions, written by a 20th century master. Sepharial (1864-1929) was one of the leading astrologers in the early 20th century English astrological revival. Primaries were his favorite means of forecasting. Primaries, unlike simple transits or secondary directions, are not immediately obvious to the average student. So in this book, the author starts with the basic definitions. He then explains how to calculate directions in mundo, directions in the zodiac, as well as parallel directions. He suggests methods of organization and describes what effects primary directions may produce. In the process he gives an overview of the three main schools of forecasting: The Fatalists, the Casuists, and the Idealists, and gives the pros and cons of each. Sepharial then discusses the two major individuals behind primaries. These are Claudius Ptolemy, who invented the semi-arc (primary) method in the second century AD, and the 17th century Italian monk, Placidus de Titis, who devised the complex house system that enabled primaries to be calculated easily and rapidly. Sepharial next tackles directions under Poles, which were a favorite of R.C. Smith, the first of several men known as Raphael. Then, the resolution of problems unique to Primaries: The proper method to calculate the Part of Fortune (Oblique Ascension/ Descension, rather than simple zodiacal longitudes), various unique challenges with primary directions and the moon, and the true way to calculate directions to house cusps, along

with some novel shortcuts. This book, originally entitled Directional Astrology, was the revised and expanded successor to the author's earlier Prognostic Astrology. It is also superior to his better known Primary Directions Made Easy. Using this system, Sepharial made many notable forecasts, most famously that of the end of World War I and the abdication of the Kaiser. Interest in this fascinating system has increased since the mid-1990's. This is the finest book ever published on the subject, one that will repay study.

Archaeology Anthropology and Interstellar Communication Douglas A. Douglas A.

Vakoch, 2015-03-24 Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.

*The Poetry of Li He* Robert Ashmore, 2023-06-19 Li He (790-816) holds a place in China's poetic history somewhat outside the mainstream, but in every generation of readers there have been those who have found his intense and often cryptic lyrical visions irresistibly fascinating and utterly without parallel. He is renowned particularly for his lyrical reimaginings of song traditions from the ancient past, and his premature death, along with the otherworldly quality of many of his works, led later readers to view him as the emblematic cursed poet, whose fascination with ancient history, with ghosts, and with celestial and demonic beings seemed to presage the brevity of his own existence. Li He's style and diction are often idiosyncratic and even hermetic, and his work presents daunting challenges to readers wishing to follow the flights of his imagination, or simply to construe the basic sense of his language. This volume presents close translations of all of Li He's poetry, in facing-page format with the original texts, with explanatory notes on literary and historical references and difficult points of interpretation, along with endnotes briefly discussing textual variants and other technical matters. Taken together, these features will be a welcome aid to readers wishing to explore Li He's poetic worlds first-hand.

**Ask a Manager** Alison Green, 2018-05-01 From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager "A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work."—Booklist (starred review) "The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to

improve their work experience.”—Library Journal (starred review) “I am a huge fan of Alison Green’s Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor.”—Robert Sutton, Stanford professor and author of *The No Asshole Rule* and *The Asshole Survival Guide* “Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way.”—Erin Lowry, author of *Broke Millennial: Stop Scraping By and Get Your Financial Life Together*
