Electional Astrology (Muhurat Shastra) Arun Bansal, Electional Astrology (Muhurt Shastra) is the science of determination of auspicious periods for desired activities. Electional astrology, also known as event astrology, is a branch found in most traditions of astrology in which a practitioner decides the most appropriate time for an event based on the astrological auspiciousness of that time. Historically being used primarily to plan battles, electional astrology has been used by its proponents to plan a number of events, including weddings and trips. This is an ancient practice which is considered highly useful in modern times too. Early Vedic astrologers used a sophisticated form of electional astrology known as Muhurta (Muhurat) that was used for choosing the start of yajnas, travel, warfare, marriage and even filmmaking (muhurat shot) etc. Our great Rishis gave importance to take the shelter of Muhurat for performing all auspicious deeds including Solah Sanskaar and auspicious ceremonies like Muhurat for Dev Pratishtha (consecration of an idol), house warming, determination of an auspicious Lagna, Muhurat for joining a job, Muhurat for purchase of a vehicle, Muhurat for Namkaran, construction Muhurat, Muhurat for journey, and marriage etc. This book on Muhurat Shastra contains all necessary information which is required to become an efficient Muhurat expert (Muhurat Shastri). In electional astrology, an astrologer is given an event the querent

intends to plan. The astrologer then finds a date and time most auspicious for the event to take place, around which the querent bases the following plans. The method of coming to these conclusions is based on the relative positions of stars, planets and other celestial bodies at various times.[6] Each celestial body's placement means something particular to the tradition the individual astrologer is using, in combination with the natal chart of the querent. For the determination of Muhurat the astrologers are primarily dependent on Panchang. The methods of determination of various Muhurats based on the combination of Tithi, Vaar, Nakshatra, Yoga and Karan have been simplified in this book. All Panchangs contain guidelines for Muhurat. First of all look in the Panchang for the activity for which Muhurat is to be determined. First of all try to understand the method recommended in the Panchang. Now look into the details of the day when work is to be performed. Find whether it is suitable or not. Work performed only on suitable day is successful.

The Astrology Book James R Lewis, 2003-03-01 The scientific, historic, and popular basis behind the ancient art of astrology is explored in this comprehensive reference. The guide also includes a table of astrological glyphs and abbreviations, a section on casting a chart, and a chapter that explains and interprets every planet in every house and sign.

Sûrya-Siddhânta Phanindralal Gangooly, 1989 The oldest and most important treatise of the post-Christian period on Indian Astronomy that has come down to us is the Surya Siddhanta consisting 14 chapters written in slokas. Alberuni says that Lata was the author of this work. According to the introductory verses Surya the sun-god revealed it to Asura Maya in the city of Romaka.

The Modern Text-Book of Astrology Margaret E. Hone, 2010-07 It was a long time ago and few alive now remember what life was like in England in the years after World War II. Yes, the Luftwaffe and Vengeance weapons had made a fine mess in the south of the country, but during the war years the Yanks were there, millions of them, seducing the womenfolk, brawling in pubs, and, most importantly, spending their pay with local shopkeepers. May, 1945, the war ended and all the Americans left. Most went home, but a sizeable contingent set up shop in Germany, where, to the best of their ability given the local ruins, they carried on as before, seducing the womenfolk, brawling in pubs and spending their pay with the surviving shopkeepers. The Americans were joined by contingents of English, French and Soviet troops. As a result, the surprising fact, long forgotten, is that after the war, conditions in England were even worse than they were in post-Third Reich Germany. Some in Britain rued winning the war, as deprivation became their fate. In London after the war books were so scarce that used vendors had long lists of people waiting for the few books that turned up. For schools in London which taught astrology, the situation was impossible. Responding to the post WWII book shortage, Margaret Hone published this ultimate Astrology Text-Book. She was born in Birmingham, England, on October 2, 1892, at 2:13 am. Her ascendant was 27 Leo; her Sun was 9 Libra; her Moon was 13 Aquarius. Her midheaven was 15 Taurus. Of Ms Hone, James Holden wrote, English astrologer, educator, and author. She was a professional astrologer and private teacher for many years and later was Principal and Director of Studies of the Faculty of Astrological Studies 1954-1969 and Vice President of the Astrological Lodge of

London. Mrs. Hone was an advocate of the Equal House system of house division. She is best known in the U.S. for her two instruction manuals. This book is dedicated to Charles E.O. Carter, 1887-1968. Carter succeeded Alan Leo as head of the Astrological Lodge (1920-1952) and was First Principal of the Faculty of Astrological Studies, which he helped found in 1948. Hone succeeded Carter at FAS. She passed away on October 14, 1969. In his Preface, while quick to praise Hone, a personal friend, Charles Carter also pointed out that this book's high price was justified, that padding has been rigorously excluded. He goes on to praise the workmanship, the carefully worded definitions, as well as the fact that the book was complete and entire in itself. Save for ephemeris and tables of houses, this one book would suffice beginning as well as advanced students for some years. In addition, Hone also includes one of the earliest modern histories of astrology, short biographies of leading astrologers past and present, astrology and public opinion (daily horoscopes in the newspapers were a recent innovation). On a more practical side, Hone gives a thorough analysis of the principal house systems of the day (Equal, Campanus, Regiomontanus, Placidus), and even mentions C.G. Jung's recently developed Depth Psychology.

Yoga in Transformation Karl Baier, Philipp André

Maas, Karin Preisendanz, 2018 This volume explores aspects of yoga over a period of about 2500 years. In its first part, it investigates facets of the South Asian and Tibetan traditions of yoga, such as the evolution of posture practice, the relationship between yoga and sex, yoga in the theistic

context, the influence of Buddhism on early yoga, and the encounter of Islam with classical yoga. The second part addresses aspects of modern globalised yoga and its historical formation, as for example the emergence of yoga in Viennese occultism, the integration of yoga and nature cure in modern India, the eventisation of yoga in a global setting, and the development of Patañjali's iconography. In keeping with the current trend in yoga studies, the emphasis of the volume is on the practice of yoga and its theoretical underpinnings.

From China to Paris Yvonne Dold-Samplonius, 2002
The reports of a conference of 11 scholars who began the task of examining together primary sources that might shed some light on exactly how and in what forms mathematical problems, concepts, and techniques may have been transmitted between various civilizations, from antiquity down to the European Renaissance following more or less the legendary silk routes between China and Western Europe.

Literature of Java Theodore G. TH. Pigeaud, 2013-06-29
The third, concluding volume of Literature of Java contains Addenda and a General Index, preceded by Illustrations, Facsimiles of Manuscripts, Maps and some Minor Notes, additions which may be of use to students of Javanese literature. The older catalogues of collections of Indonesian manuscripts (Javanese, Malay, Sundanese, Madurese, Balinese), which were written in Dutch, did not offer such additional aids to interested readers. One of the reasons was, that the authors (Vreede, Brandes, van Ronkel, Juynboll, Berg) presupposed a certain knowledge of the Indonesian peoples, their countries and their culture with Dutch students. As often as not the latter, or their families, had lived for many years in Java, and they were destined, when they had completed their studies in

The Netherlands, to pass one or more decades of 'their active life in the ,tropics in the service of Government, the Christian Missions or the Bible Society. The Archipelago was their second home country. Some familiarity with things Indonesian was found in several circles of society in The Netherlands before the second world war, and information (though not always scholarly and exact) was supplied by quite a number of books and periodicals. For this reason it was thought superfluoU's to encumber specialistic books like catalogues of manuscripts with maps and general information which could be found easily elsewhere, for instance in the Dutch Encyclopaedie van Nederlandsch-Indie. As circumstances have changed it is.

The Madura Country James Henry Nelson,1989

Vedic Astrology Demystified Chandrashekhar

Sharma,2014-08-24 Vedic Astrology Demystified is written for Jyotish students. The purpose of the book is to introduce the reader to the basics of Jyotish, starting with its origin. All essential information required for interpreting a chart is detailed, with a comprehensive look at each of the rasis, grahas and the 12 different bhavas. An overview is provided of many of the important yogas to look for in a chart and also emphasizes why a particular yoga gives its results in order to teach students how to interpret combinations themselves. After setting out the basics of a chart interpretation, Vedic Astrology Demystified details how to predict using Vimshottari Dasha system and how to incorporate transits into a prediction. The book finishes with a practical review of various charts and the timing of events using the knowledge learnt. Vedic Astrology Demystified is written in a friendly style, so that the reader feels he is having a personal lesson from the author. As there is much conjecture on various topics within Jyotish, the author has incorporated into the book his own practices when interpreting and predicting from a chart.

When Did the Mahabharata War Happen? Nilesh Nilkanth Oak,2011-06-01 In a drastic re-evaluation of astronomy observations from Mahabharata, using high-tech tool of modern astronomy and low-tech tool of the logic of scientific discovery, Nilesh Oak's extraordinary book presents ordinary theory of astronomy observations that would lead to a quantum jump in our understanding of the Mahabharata War: How a theory based on single unifying idea corroborates 100+ astronomy observations Where to search for the year of the Mahabharata War - Epoch of 6500 years & Compact time interval of 3000 years How a single observation, previously known but unexplained, falsifies 96% of all proposals for the year of the Mahabharata War Why does it matter how long Bhishma was lying on the bed

of arrows How ancient is the tradition of meticulous astronomy observations. Acceptance of his theory leads to surprising conclusions about our current understanding of world civilizations, domestication of horses, dating of Ramayana or Vedas and antiquity of meticulous astronomy observations. Rejection of his theory would compel us to search for the likes of Newton and Lagrange, among the Sages of India, at least thousand years before Sir Isaac Newton & Joseph-Louis Lagrange. Praise for 'When did the Mahabharata War Happen?: The Mystery of Arundhati' You have done a great job. I requested astronomers to consider if Arundhati had gone ahead of Vasisth in 1971, when I published 'Swayambhu' . But nobody cared. You are the first to do the great job - P V Vartak (Author of 'Swayambhu' & 'Wastav Ramayana')--- Grueling and unfaltering logic--- I have to thank you for being the cause for a quantum leap in my own knowledge of general astronomy as well as Hindu astronomy / calendrical systems over a very short span of time. In some ways the effect of your book has some parallels with Rajiv Malhotra's 'Being Different', though in a very different context. RM never intended his book as a primer on Dharma / Hinduism - but nevertheless it introduced many aspects of Dharma in a light which would be new even to a practitioner. Similarly, even though I am sure you never intended your book to act as an exploration of key astronomical principles and Vedic astronomy - that has definitely been a key side benefit, at least from my perspective.--- Indology has been populated by linguists and my respect for their work has gone down by several notches when I look at the shoddy assumptions many are prone to make. Science and rigor the way Nilesh Oak has used seems to be unknown to these Indologists. I bet that not one of those horse bone chewers can understand what Archeo-astronomy means. Their awareness extends to

looking at Archeo-asses and saying it was not Equus caballus.--- I am simply 'natmastak' to Shri Oak for the amazing piece of deductive reasoning applied by him in interpreting the 'Arundhati is leading Vasistha' remark. I think Shri Oak is not only on sound footing but also has clearly exhibited every 'lakshan' of a true seeker of knowledge in the finest Indian traditions. I cannot recall if he mentioned whether anybody else (other than him) thought of the EOA approach. If he is the first one, he deserves billions of thanks from all the Bharatiyas in the last 7000+ years. Oak saheb, aamcha maanacha mujra sweekar karava hee vinanti.--- It is interesting how all Indologists the world over talk about linguistics and horse, but never mentions archaeoastronomy Perhaps the focus of the national and international debate on Aryan Invasion/Migration Theory needs to change.--- I do not want to sound obsequious, but the work you have done is nothing less than tremendous. Thank you, and keep it up.--- I have verified Nilesh Oak's elimination of errors. A bow Excellent --
- Your rigorous methodology was simply a pleasure to read and that got me started off on my efforts to dabble in archaeoastronomy.
